

### **Future Service**

Our co-created (engagement with more than 2,000 women and families) LMS vision is for all women to have a safe and positive birth and maternity experience and to be prepared to approach parenting with confidence.

### Our future offer to our women and families will include:

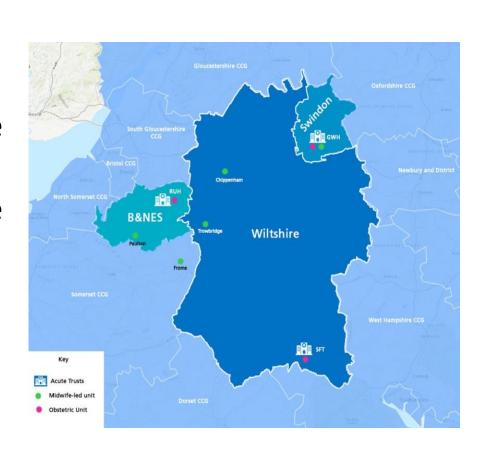

- Continuity of carer (20% by 2019)
- Improved personalised care and choice with parity of access
- Creation of Clinical Maternity Hubs to provider ante and postnatal care close to home – including Frome
- Delivery of seamless pathways across organisational and geographical boundaries

# **BSW Local Maternity System**

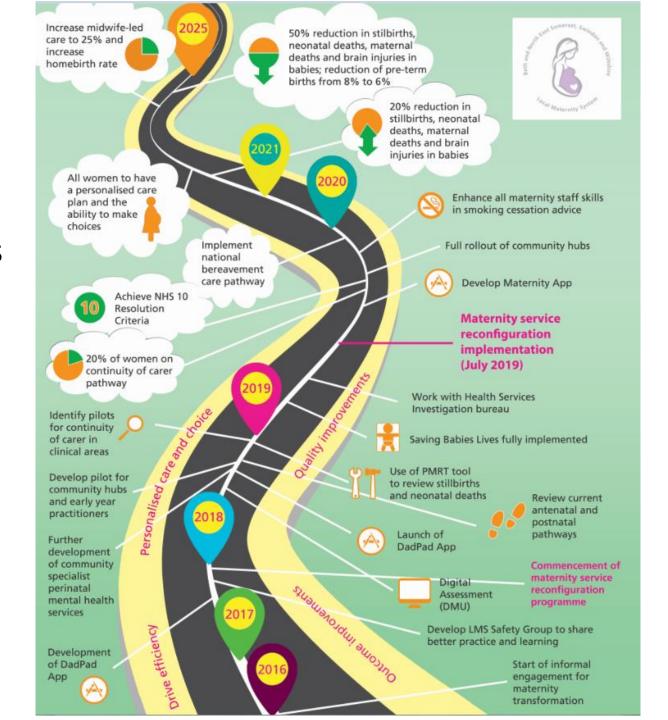

# Maternity Transformation workstreams

- Continuity of carer
- Antenatal and postnatal care
- Safer care
- Personalised care and choice
- Perinatal Mental Health
- Workforce transformation
- Working across boundaries / multi agency working

Engagement with Somerset since project commencement in Jan 2017

### Roadmap of the BSW MTP ambitions

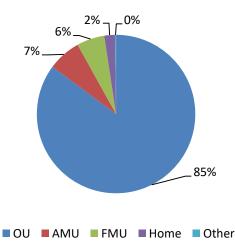

## **BSW LMS Maternity Services**

	Maternity care and birth provision				
Organisation	Antenatal and	Obstetric Unit	Home birth	Freestanding	Alongside
	postnatal care			Midwifery Unit	Midwifery Unit
Royal United				Trowbridge	
Hospitals Bath				Chippenham	
NHS Foundation	•	•	•	Frome	×

Trust					

- Choice currently not equitable across the LMS footprint
- Proposals for change will ensure choice options are met for majority of population across the LMS footprint

# Choice of place of birth

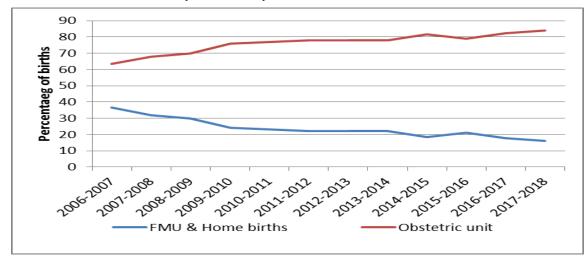

#### LMS Place of birth

RUH Maternity services has used a number of strategies to promote and encourage the Freestanding midwife units or home as a place of birth, yet despite these initiatives, the number of births continues to decline

- 11,247 births across the LMS in 2017/18, of which 85% were in an obstetric unit
- 7% were in a Alongside Midwife Unit (GWH) and
  6% in a Freestanding Midwife Unit (RUH)
- RUH has seen an increase in numbers of births at the Obstetric Unit and a corresponding decline in numbers of births in their FMUs / home birth

Place of birth percentages for RUH, comparing Freestanding Midwifery Units to the Obstetric Unit from 2006/07 to 2017/18

### What have women and families said

- One of the greatest fears is transfer in labour
- More women want choice of having their baby in an Alongside Midwifery Unit
- Improved continuity of carer and safety high on agenda

Formal public consultation will capture more views and wishes with independent analysis of feedback from University of Bath

# LMS Challenges

Challenge	Potential solutions
Lack of parity of provision	Review current birth offer across the LMS
Future sustainability	Capacity review based on population growth, housing policy and demographics
Under-utilisation	Review current provision of services across the LMS
Workforce – Right staff, right place, right time	Match workforce to demand – start planning new role for the future
Delivery of Better Birth agenda	Broader LMS Transformation Plan
Reduce the number of mums who smoke in pregnancy	Dedicated MSLC work stream

### Indicative timeline
