Local Policing in Somerset East

- Somerset East will be moving to a new local policing structure from Monday 28th July
- This will deliver a single team approach to improve the service to the public.
- This model will be rolled out across the constabulary during 2015. We would really value your feedback.
- We have conducted a comprehensive review of demand, and in doing so have allocated the correct amount of officers to each community to deliver the best service to the public.

Our intention

- We will continue prioritising local neighbourhood resources dedicated to your community
- Every community across East Somerset will benefit from an increase in neighbourhood police officers
- The new structure will bring patrol and neighbourhood policing together, delivering more resources when the public most need us.
- Local PCSOs and PCs will continue to work in the same way and will remain your local contact
- Patrol and neighbourhood policing teams will join under the same manager. By working together, this will improve our problem solving and put more staff on duty at the times when they are needed

Neighbourhood Policing

- Each local policing area will be split into 5 areas referred to as **Clusters**. These areas have been worked out based on demand, but also with consideration to existing parish boundaries.
- Each team Inspector will be responsible for one of these clusters and will be expected to allocate the correct officers to tackle areas of community concern.
- They will be supported by a dedicated team of officers led by a sergeant, who is responsible for the cluster and the local link to communities.
- A new role of Neighbourhood Manager has been created. They will continue to work with other key agencies and partners to deal with long term issues.
