Funding Strategy Statement Investment Strategy Statement	3	5	15	The triennial valuation includes provision for restoring the fund to full funding over 19 years The current risk score partly reflects that the fund was 86% funded at the last valuation. An improvement in the funding level will reduce the likelihood of the risk occurring at some point in the future	2	5	10		Review again at next Valuation - 2022		This risk encapsulates the purpose of the fund in trying to always have sufficient assets to meet uncertain future liabilities with a pool of assets with uncertain future investment performance. There is also the need to balance the funding needs of the fund with the desire to keep contributions as low and constant as possible.
1. PF3 2. Stephen Morton	The insolvency of an employer places additional liabilities on the fund and ultimately the remaining employers.	Admission agreements Guarantee bonds	3	3	9	Ensure the on-going suitability of the guarantees in place with a review after each formal valuation Review of actuarial results to consider employer specific funding ratios and employer 'Hot Spots'	2	2	4	Stephen Morton	on-going with quarterly review		'Hot Spots' refers to employers whose benefits in payment exceed their contributions in a given period.

1. PF9 2. Anton Sweet	Insolvency of the fund's Global Custodian	Fund's assets held in client accounts not as assets of the custodian Review of credit worthiness and inherent business risk of custodian at tender phase	2	4	8		2	4	8		on-going with quarterly review		The designation of the fund's assets as client assets ensures that they cannot be appropriated by creditors of the Custodian bank in the case of that entity going into administration. As a result we should be able to recover substantially all of the assets of the fund held in custody but there would be considerable administrative and liquidity disruption
