

Somerset West and Taunton Council

Executive – 15 March 2023

2022/23 Housing Revenue Account Financial Monitoring as at Quarter 3 (31st December 2022)

This matter is the responsibility of Executive Councillor Fran Smith, Housing

Report Author: Kerry Prisco (Management Accounting and Reporting Lead)

1 Executive Summary

1.1 This report provides an update on the projected outturn financial position of the Council's Housing Revenue Account (HRA) for the financial year 2022/23 (as at 31 December 2022).

1.2 The headline estimates for **revenue** costs are:

Revenue Budget	£91k forecast underspend	Green
General Reserves	£3.134m forecast balance = favourable compared to £2m minimum requirement	Green
Earmarked Reserves	£54k opening balance	Green

1.3 It is well reported that the economic situation is challenging with the cost of living crisis, high inflation, and rising interest rates. These factors will hit our communities and businesses, and the Council is also not immune as seen in the latest forecasts.

1.4 The Q1 forecast outturn position reported an overspend of £745k. In response to this variance the Senior Management Team undertook a thorough and in-depth review of all budgets, updated projections based on mid-year information, requested services to manage inflationary pressures within services where possible (e.g. pay award, utilities and material costs) and focused on essential spend only where possible in order to bring the position back to budget. There were also some contractual delays on delivering capital schemes pushing spend into future years and a need increase reserve balances this year to provide budget flexibility and financial resilience in 2023/24 on the face of significant financial pressures. This resulted in an improved position report at Q2 of an overspend of £330k.

1.5 The Senior Management Team have continued to monitor spend closely and explore options to bring the position back to budget. The Q3 forecast outturn position reports an

underspend of £91k. This has been achieved mainly by an increase in investment income as a direct result of a reduction in spend on the capital programme and increasing interest rates, capitalisation of material costs and a reduction in central recharges. These have offset the main financial pressures including depreciation charges, the recently agreed national pay award, the rising cost of materials for void and general repairs, and tenancy management costs.

- 1.6 Whilst forecasts have been updated and management continue to control the overall position to remain within budget, the final outturn position may still present further underspends or variances to budget. This will be carefully monitored over the next few months by management and the final outturn position will be reported to Members.
- 1.7 The level of General Reserves has improved providing the service with some resilience to mitigate the risk of an overspend or additional pressures. However, in light of the volatile nature of the business these levels may not be sufficient, and a more secure reserves position will need to be maintained in future years.
- 1.8 The HRA **Capital Programme** has a total approved budget of £110.9m. The profiled budgeted spend for 2022/23 is £36.447m and this is currently forecast to underspend in the year by £15.892m; £15.627m due to slippage of work into 2023/24 and net budget of £266k budget to be returned.

2 Recommendations

- 2.1 This report is to be noted as the HRA's forecast financial performance and projected reserves position for 2022/23 financial year as at 31 December 2022.

3 Risk Assessment

- 3.1 Financial forecasts are based on known information and projections based on assumptions. As such any forecast carries an element of risk. The current forecasts included in this report are considered reasonable given the extra element of risk around inflation being experienced in the current economic operating environment and based on experience it is feasible the year end position could change. It is common for underspends to emerge during the year, reflecting an optimism bias within previous forecasting. There may also be matters beyond the Council's control that affect the final outturn position.
- 3.2 Salient in year budget risks are summarised in section 9 in this report. The Council manages financial risk in several ways including setting prudent budgets, carrying out appropriate monitoring and control of spend, operating robust financial procedures, and so on. The Council also holds both general and earmarked reserves which include contingencies to manage budget risk, though these are low for the HRA.

4 Background and Full details of the Report

- 4.1 This report provides the Housing Revenue Account (HRA) forecast end of year financial position for revenue and capital expenditure as at 31 December 2022.

- 4.2 The regular monitoring of financial information is a key element in the Council's HRA Performance Management Framework. Crucially it enables remedial action to be taken in response to significant budget variances, some of which may be unavoidable. It also provides the opportunity to assess any consequent impact on reserves and the HRA's Medium Term Financial Plan and 30-Year Business Plan.
- 4.3 Members will be aware from previous experience that the position can change between 'in-year' projections and the final outturn position, mainly due to demand-led service costs and income levels and where actual costs and income can vary from initial estimates and assumptions. The budget monitoring process involves a detailed review of the more volatile budgets and a proportionate review of low risk/low volatility budget areas. Budget Holders, with support and advice from their finance business partners, update their forecasts monthly based on currently available information and knowledge of service requirements for the remainder of the year. As with any forecast there is always a risk that some unforeseen changes could influence the position at the year-end, and several risks and uncertainties are highlighted within this report. However, the following forecast is reasonable based on current information.

5 HRA Revenue Budget 2022/23 Forecast Outturn

- 5.1 The HRA is a ring-fenced, self-financing, account used to manage the Council's housing stock of some 5,700 properties, with the Council acting as the Landlord.
- 5.2 The Council retains all rental income to meet the costs of managing and maintaining the housing stock, as well as meeting the interest payments and repayment of capital debt.
- 5.3 The current year end forecast outturn position for the Housing Revenue Account for 2022/23 is a net underspend of £91k.

Table 1: HRA Revenue Outturn Summary

	Current Budget	Forecast Outturn	Forecast Variance	
	£000	£000	£000	%
Gross Income	-28,188	-28,128	61	0.2%
Service Expenditure	16,721	16,713	-8	0.0%
Other Expenditure	11,468	11,324	-143	-0.5%
Total	0	-91	-91	-0.3%

- 5.4 The variances to budget are shown in more detail in Table 2 and further explanations for variances over £50k below.

Table 2: Summary of Forecast Variances for the Year

	Current Budget	Outturn	Q3	Q2	Q1
	£000	£000	Variance	Variance	Variance
			£000	£000	£000
Dwelling Rents	-25,581	-25,627	-46	-54	-139
Non-Dwelling Rents	-767	-709	58	16	49

Charges for Services / Facilities	-1,649	-1,556	93	106	-2
Other Income	-192	-235	-43	16	14
Sub-Total Gross Income	-28,188	-28,128	60	84	-78
Service Expenditure:					
Development & Regeneration	60	87	27	-15	-5
Community Resilience	153	153	0	0	-6
Tenancy Management	3,012	3,224	212	248	186
Maintenance	5,598	6,040	442	320	496
Assets	420	342	-78	-24	-1
Capital Investment	563	367	-196	-262	14
Compliance	1,829	1,702	-127	-115	-150
Performance	5,084	4,798	-286	-236	31
Pay Award Shortfall	0	0	0	0	269
Sub-Total Service Expenditure	16,720	16,713	-7	-82	834
Central Costs / Movement in Reserves:					
Revenue Contribution to Capital	0	0	0	0	0
Interest Payable	2,883	2,788	-95	-88	-94

Capital Debt Repayment	1,021	0	-1,021	-1,021	0
Movement In Reserves	-200	-200	0	0	0
Sub-Total Central Costs / Movement in Reserves:	11,468	11,324	-144	329	-12
Net Surplus(-) / Deficit for the Year	0	-91	-91	330	745

Income

- 5.5 **Dwelling Rent Income:** The budgeted income for 2022/23 is £25.581m, which reflects an assumption of 2% void losses and applying a 52-week year. The overall current projections suggest that more income will be recovered than predicted when setting the budget and providing an allowance for voids. The current projection for dwelling rent income is an over recovery against budget of £47k which partly relates to timings of predicted stock changes and levels of voids.

- 5.6 **Charges for Services / Facilities:** The budgeted income of £1.649m for 2022/23 includes (a) £1.406m for the Service Charge Income for Dwellings (after discounts have been applied to tenants such as Piper Charge to Sheltered Housing and Extra Care) less an average 2% void loss and applying a 52-week year, (b) £233k for Leaseholder Charges for Services, and (c) £10k for Meeting Halls.
- 5.7 The Leaseholder Charges for Services is forecasting an under recovery of income of £100k. The leaseholds are invoiced a year in arrears. The routine repairs continued to be low again last year due to COVID and lockdown. The major repairs were also lower and capped at £250 again.

Expenditure

- 5.8 **Tenancy Management:** This area covers lettings, supported housing, rent recovery, leaseholders and other tenancy management support activities. The total current budget is £3.012m and it is forecasting an overspend of £211k. This mainly relates to an overspend on staffing costs due to additional resources required to manage the increasing number of cases raised by tenants following the aftermath of COVID, as well as backfill for maternity and sick leave and the pay award. Part of the overspend relates to a budget saving for 2022/23 by undertaking RTB surveys using our in-house resources, however this resource is now unavailable, and the activity is now being procured externally.
- 5.9 **Maintenance:** The overspend relates to the ongoing repairs and maintenance of the housing stock through void activity undertaken to ensure our Lettable Standard is met before reletting. Whilst this is a very demand led and reactive service based on the condition of the properties being returned this service is experiencing an increase in cost pressures as inflation drives up the cost of materials (as seen nationally). There is an in-house initiative called the "Leaving Well" scheme which aims to work with and support the tenants to leave their homes in a suitable manner to reduce the time and cost of work then required on void properties before reletting.
- 5.10 Since the Q2 report further work has been undertaken to identify opportunities for the capitalisation of material costs. For example, where the activity is of a capital nature and has an impact on the major works replacement programme. So far c£850k of costs have been identified and is reflected in the change in variance from Q2 to Q3.
- 5.11 **Assets:** The budget estimate for 2022/23 was £90k on SAP EPCs and Stock Validation which are now being covered and paid for as part of the majors and improvement capital programme. This change has been reflected in the budgets for 2023/24.
- 5.12 **Capital Investment:** The Capital Investment Team are responsible for driving the delivery of the Majors and Improvement capital programme. Since the Q1 report, and in light of the predicted overspend, the opportunities for capitalisation have been revisited and these salary costs of £254k are now being capitalised. This saving is offset in part by an overspend on pre-planned maintenance costs where previous years painting and

cyclical repairs were delayed, so some additional costs have been incurred this year for repairs to previously painted surfaces, due to their deterioration.

- 5.13 **Compliance:** The service is forecasting an underspend of £127k. Following a validation of apparatus / installations on site, the service has identified that the previous data estimations were greater than those required in year.
- 5.14 **Performance:** Of the total budget of £5.084m, £3.920m relates to shared costs such as support services, pension deficit, and governance, leaving £1.164m on operating costs such as staffing, insurance, training, travel, stationery, printing and bank charges, as well as the Tenants Empowerment and Tenants Action Group.
- 5.15 The forecast underspend of £286k mainly relates to a £380k favourable adjustment following the completion of a thorough review of the non-staff related cost apportionments between the General Fund and Housing Revenue Account (HRA), to ensure this reflects the up-to-date position and reasonable assumptions around the relative use of resources. This is offset by staffing pressures related to the pay award, job evaluation and performance team restructure.
- 5.16 **Interest Payable:** The budget estimate for 2022/23 was £2.883m. This was based on assumptions for the refinancing of £10m of debt repaid in March 2022 which differ to the actual cost of borrowing and the term of the loan resulting in an underspend of £95k.
- 5.17 **Interest Receivable:** The budget estimate for 2022/23 was £83k. The outturn position is dependent on the final capital financing requirement for the year, as well as levels of borrowing and reserves. The current capital outturn forecast reporting an underspend against profiled budget of £15.892m. The current projections of capital spend, and level of reserves suggest that there will be £431k of interest income for the year, though it is highly likely that this will change by the end of the year.
- 5.18 **Depreciation:** The depreciation charge for the HRA is calculated at the end of the financial year and then transferred to the Major Repairs Reserve (MRR) to be reinvested in the housing stock through financing of the capital programme and/or repay capital debt.
- 5.19 In prior years, elements of the depreciation calculation saw some components of the assets having a useful life over 100 years. For 2021/22 there was a recommended technical accounting update requiring components to have a maximum useful life of 70 years. This was applied to the calculation for 2021/22 resulting in an increase in the dwelling depreciation charge. This financial impact was managed strategically in 2021/22 by reducing the voluntary repayment of debt through the revenue account and replacing this with existing capital receipts to eliminate the financial impact on repaying debt as well as the impact on the revenue account.
- 5.20 Due to timings of the annual budget preparation, this technical accounting update was not applied to the budget estimates for depreciation for 2022/23. As such an early provisional calculation has been undertaken to estimate the depreciation charge for the year. This has resulted in an adverse variance against budget of c£1.4m. This variance

results from a combination of the reduction in useful life that may reasonably be applied, in line with accounting standards, as well as the increase in year-end "existing use" valuations, which are driven by the effects of economic conditions impacting upon house price inflation.

- 5.21 This financial impact will again be managed strategically by offsetting this pressure in part against the voluntary repayment of debt through the revenue account and replacing this with existing capital receipts to eliminate the financial impact on repaying debt as well as the impact on the revenue account. The other land and buildings depreciation charge has been estimated for the year resulting in a saving of £106k against budget. This leaves a £300k pressure which is expected to change once final year end calculations are undertaken.
- 5.22 **Capital Debt Repayment:** As per the Budget Setting Report for 2022/23 (Full Council Feb 2022) the HRA financial strategy presented a one-off reduction in budget (from £1.821m) of £800k to provide revenue capacity in 2022/23 replacing this with £800k of non-RTB capital receipts. The budget of £1.021m is being used to offset the adverse variance on the depreciation charge as described above.

6 Capital Programme

- 6.1 The HRA current approved Capital Programme is £110.9m. This consists of £14.4m of new schemes approved for 2022/23 plus £95m of previously approved schemes in prior years and a supplement of £1.5m (see **Appendix A**).
- 6.2 The Council plans to finance this investment through the Major Repairs Reserve, Capital Receipts, Capital Grants, Revenue Funding and Borrowing (see **Appendix B**).
- 6.3 The HRA Capital Programme relates to in-year works and longer-term schemes that will be completed over the next nine years. The current planned profiled spend is summarised in **Appendix C**. The budget has been profiled to reflect the estimated timing of costs for the approved schemes, with £36m profiled to be spent in 2022/23 with the balance of £74m projected forward into future years.
- 6.4 Further information on the three distinct areas of the HRA capital programme and its financial performance to date against this financial year can be found below and in **Appendix D**. The current forecast outturn is £20.555m. The programme will underspend against profiled budget for 2022/23 by £15.892m; £15.625m slipping into subsequent years and net budget of £266k being returned.
- 6.5 **Major Works:** The approved budget of £14.9m is funded by the Major Repairs Reserve and Borrowing and relates to spend on major works to existing dwellings. New schemes approved for 2022/23 total £11m with slippage from the prior year of £3.9m.
- 6.6 The 2022/23 capital programme includes major programmes such as:
- Kitchens
 - Bathrooms
 - Heating improvements

- Insulation and ventilation
- Door entry systems
- External doors
- Fasciae and soffits
- Roofing
- Windows

- 6.7 The current forecast projected spend is £6.3m resulting in an underspend against budget of £8.6m which will fall into subsequent years. Progress on a number of capital work programmes continues on-site; including kitchen and bathroom replacements, roofing, replacement gutters and fasciae, and door entry systems. It should be noted, however, that available contractor resource remains a challenge and accordingly some programmes may not be completed by the end of this financial year.
- 6.8 **Improvements:** The approved budget of £5.2m is funded by the Major Repairs Reserve and relates to spend on improvements to existing dwellings and related assets. New schemes approved for 2022/23 total £3.3m with slippage from the prior year of £1.9m.
- 6.9 The current forecast projected spend is £3m resulting in an underspend against budget of £2.2m of which £1.9m will fall into subsequent years and £338k proposed to be returned. Progress on fire safety works (replacement fire doors, fire safety flooring and emergency lighting) is progressing well on site, although again it should be noted that available contractor resource remains an ongoing challenge.
- 6.10 The budget return relates to (a) the implementation of a new accounting standard (IFRS16 - Leases) being deferred, meaning the finance lease costs for the fleet contract will be accounted for in revenue, and (b) a forecast underspend on related assets.
- 6.11 **Social Housing Development Programme:** The current approved budget of £90.8m is for the provision of new housing through schemes such as Phases A-E for North Taunton Regeneration (NTWP), Seaward Way, Oxford Inn and Zero Carbon Affordable Homes to increase the Council's housing stock. This will be funded through by RTB Capital Receipts, Capital Grants and Borrowing.
- 6.12 The current Social Housing capital programme for 2022/23 is progressing with contractors on site at phase A of NTWP and Seaward Way, together developing 101 new homes. The contract for phases B&Ci and Di remains outstanding and although the service expected to conclude the contract negotiations and commence demolition a new procurement may now be required due to a change of the current contractor's appetite for new work in the South-West. The service is working to understand the implications for the current contract and the contractual position. The Oxford Inn development has planning permission including support from Natural England for its phosphate mitigation strategy. A procurement exercise is concluding following the shortlisting of three contractors. Unfortunately, the refurbishment of properties at Oake and NTWP phase E will not progress under current designs as the procurement of contractors has failed twice on value for money criteria. These non-traditional defective woolaway properties will now undergo a new option appraisal which is likely to include the sale of a small number of void dwellings.

6.13 Members should note that the economic environment is very challenging in relation to the building of homes. SWTs keys risks include inflation, especially in relation to the NTWP which spans several phases and is delivered over many years, contractors risk appetite, availability of staff and sub-contractors, insurance premiums and materials shortages are also challenges. In addition, statutory and voluntary requirements in terms of energy efficiency and climate change, highway infrastructure, phosphates and fire prevention are also increasing the time and cost pressures relating to the development of new homes. The Council is delivering affordable housing for rent and therefore does not have the ability to benefit from house price inflation to offset some of the additional costs. The HRA’s Medium Term Financial Plan (MTFP) and 30-Year Business Plan is being reviewed to ensure the capital programme expenditure remains affordable.

7 HRA Earmarked Reserves

7.1 The HRA Earmarked Reserves at the beginning of 2022/23 totalled £54k (see **Table 3** below). A further £77k climate change contribution towards electric vehicles has been received in-year. The remaining funds have been earmarked to be spent within the next two years.

Table 3: Earmarked Reserves Balances

Description	Opening Balance 01/04/2022 £000	Transfers £000	Projected Balance 31/3/2023 £000
HRA One Teams	6	0	6
HRA Hinkley	48	0	48
HRA Electric Vehicles	0	77	77
HRA Total	54	0	131

8 HRA General Reserves

8.1 The opening HRA general reserves balance as at 1 April 2022 is £3.413m, representing unearmarked reserves held to provide ongoing financial resilience and mitigation for unbudgeted financial risks. This is £1.413m above the minimum recommended reserve level of £2m.

8.2 As part of the budget setting proposals to Full Council on 8 February 2022 £200k of current reserves will be used to support the base budget in 2022/23. Further approved (or proposed) allocations to / from general reserves are shown in the table below.

Table 4: HRA Unearmarked Reserves Balance

	Approval	£'000
Balance Brought Forward 1 April 2022		3,413
Budgeted Contribution to support base budget 2022/23	FC - 08/02/22	-200
Current Balance		3,213
Forecast: Housing Policy Review		-30
Forecast: Procurement Support		-140

Forecast: 2022/23 Projected Overspend		91
Projected Balance 31 March 2023		3,134
Recommended Minimum Balance		2,000
Projected Balance above Minimum Reserve Balance		1,134

8.3 The current outturn position is forecast to be a net underspend of £91k. The improved forecast outturn position has helped to bolster reserve balances to £3.134m, which is £1.134m above the recommended minimum balance of £2m. It is essential for the service to maintain adequate reserves to provide financial resilience to mitigate against the volatile economic environment and regulatory pressures within which it operates.

9 Risk and Uncertainty

9.1 Budgets and forecasts are based on known information and the best estimates of the housing service's future spending and income. Income and expenditure over the 2022/23 financial year are estimated by budget holders and then reported through the budget monitoring process. During this process risks and uncertainties are identified which could impact on the financial projections, but for which the likelihood, and/or amount are uncertain. The Council carries protection against risk and uncertainty in several ways, such as insurances and maintaining reserves. This is a prudent approach and helps to mitigate unforeseen pressures.

9.2 The following general risks and uncertainties have been identified:

9.3 **Inflation:** The current economic operating environment is placing financial risk on the Council in terms of rising inflation increasing the cost of supplies such as utilities and materials. The Council is seeing price increases on our corporate contracts of c60% on electricity, c80% on gas and c45% on fuel. However further variances may come to light during the year based on levels of usage in these areas. There is also uncertain inflationary pressures on other revenue and capital contracts. Budget Holders have undertaken an impact assessment of the inflationary pressure placed on their services and included best estimates as part of their quarterly review.

9.4 **Bad Debt Provision:** The budgeted bad debt provision of £180k provides financial capacity for any increase in arrears and / or aging debt from one year to the next as well as any in-year write offs. This is a year-end technical accounting adjustment. The key challenges facing the arrears position are the pressures on SWT to maximise rental income in an environment of reduced government support and greater need to utilise internal resources; the 'cost of living crisis' marked by reductions in real income accompanied by increases in fuel costs and food prices; welfare reforms which have made extensive use of sanctions and reductions in eligibility; and the impact of the COVID pandemic. On average 25% of SWT HRA tenants are in arrears at any one time.

9.5 The approaches incorporated at SWT to aid the HRA's enforcement of debt and support to tenants include providing direct welfare benefit advice and support; facilitating access to employment and training, support and advice; facilitating access to debt prevention support; and opportunities for flexible rent payment.

- 9.6 **Recruitment:** There are a number of vacancies across the Council and assumptions have been made as to when these vacancies will be filled. The Council is experiencing recruitment issues (as seen country-wide) therefore assumptions and forecasts may change, in addition to higher agency costs to cover roles where permanent recruitment is not successful.
- 9.7 **Capital Programme Forecasts:** Engaging with Contractors at all tiers continues to be very challenging, therefore the risk to the capital programme and forecast costs should be considered. The labour and materials market is still in short supply, with Contractors unable to resource both tenders being issued on projects on site. As such, competition in the market is more limited than it has been for some time.
- 9.8 The cost pressure created by inflation, the liquidation of a number of contractors, logistics challenges and the general acceleration to get projects to site post-lockdown, is causing previous fixed price contracts to be re-appraised within a matter of months of a successful tender. This could move schemes to the limits of viability. The resulting impact of this cost pressure is resulting in Tier One (larger scale) Contractors often turning down tender opportunities unless an inflation clause (requiring the Client to take the risk of inflation), is included in Contracts, whilst smaller Contractors are withdrawing tenders after submission or operating on such a small margin as to put them at risk of failure.
- 9.9 The forecast tender price inflation for 2022 is 8–10% (although some materials are seeing 30-40% increases) and there is limited prediction from the marketplace of the rate of inflation easing until Quarter 3 2024. Whilst due diligence is undertaken on tenderers during the process, both in flight and imminent projects will continue to be at risk whilst resource and materials are scarce and/or increasing in cost at current trajectories.
- 9.10 **Fleet Contract / IFRS16 Leases:** CIPFA has delayed the implementation of IFRS16 however we could have chosen to adopt this early but due to the implementation of the Unitary Council all Somerset Councils have made the decision to delay adoption. Therefore, where SWT had budgeted for the lease as a capital cost these now fall to revenue. The services hope to absorb this cost through in-year underspends and delays in receiving new vehicles.
- 9.11 **Repairs & Maintenance:** Overall this is a very demand led and reactive service based on the needs of the tenants. There are also a number of uncontrollable variables associated with this service such as the weather (e.g. cold winters causing burst pipes, roof leaks, etc), condition of properties when returned (e.g. void refurbishments), consumer demand on minor internal / external repairs (e.g. broken door or fence) and the type of repair work required. Market pricing of materials etc can also be volatile with some unit costs increasing in recent months. As such the levels of demand do not always follow a recognisable trend. We therefore caveat the forecasts in these areas to account for fluctuations.
- 9.12 **Landlord Compliance:** A review of all compliance areas against every property for which Somerset West and Taunton Council has landlord property compliance responsibility has largely been undertaken. The compliance works required following this

review are currently being procured and delivered. Whilst additional budget provision has been added previously, new regulatory requirements and assurance process are still emerging, the full extent of the full financial pressure of these remains uncertain.

- 9.13 **Cost of living crisis, Welfare Reform and Universal Credit (UC):** The impacts of these are significant with the number and value of rent accounts in arrears expected to increase considerably. Several mitigations are already in place to help support tenants affected particularly by the rising cost of living such as debt advice, access to discretionary housing payments and an arrears management team with redesigned workflow processes. These issues may require the Council to revise future income projections.
- 9.14 **Responding to increased stock quality standards:** Changes to the Regulator of Social Housing's decent home standard as well as higher thermal efficiency standards which may not be fully supported by additional external grant funding would place an additional burden on HRA resources available for elemental investment in homes. Once the detail is known, we will need to adapt to ensure we continue to maintain stock at the Decent Homes Standard and prepare to meet all the evolving expectations, incorporating the financial impacts into the Business Plan.
- 9.15 **Housing White Paper:** In November 2020 the Government published the Housing White Paper which sets out the changes to how social landlords will operate. It will require several changes to home safety, tenant satisfaction measures, complaints handling, a new inspection regime for social landlords and a strengthened role for the Regulator of Social Housing. Many of the new changes in the white paper have already been mitigated in Housing by strengthening our compliance activities, setting up the new Housing Performance Team to be responsible for communications, performance data and engagement but this will need to be kept under review and self-assessment has begun.
- 9.16 **Right To Buy (RTB) Receipts:** This is a government policy that enables tenants to purchase their homes at a discount, subject to meeting qualifying criteria. The receipts allowed to be retained by the Council can now fund up to 40% of new social housing costs and must be used within five years of receipt. To date, the Council has successfully fully spent all of their retained 1-4-1 receipts within the require timescales resulting in no returns being made to the Treasury/DLUHC.
- 9.17 Whilst projected spend on new build developments is currently adequate to meet 1-4-1 spend requirements this is dependent on the successful delivery of these social development schemes. Therefore, there is still a risk that the current delivery plan on new build schemes could be delayed and may result in funds being return to DLUHC/Treasury.
- 9.18 **Unitary Council:** The transition to the new Unitary places a significant demand on management and staff. It is currently unknown what the future potential HRA costs will be and whether these costs will need to be funded using revenue or capital budgets. From a capital perspective the business plan does provide some headroom to allow non-right to buy receipts to be used as flexible capital receipts to fund transformation costs. Revenue costs of implementation are not currently budgeted and will place additional

pressures on the HRA budget and reserves, thus we will need to review planned expenditure and reserves to make this affordable.

- 9.19 **Forecasting Assumptions:** It is conceivable that, whilst budget holders are optimistic that they will spend all their budget, experience shows an increase in underspends often reported in the last quarter of the financial year. The pace of spending may also reduce as capacity and delivery of priorities is affected by local government structural change.
- 9.20 **Fluctuation in demand for services:** We operate many demand-led services and the levels of demand do not always follow a recognisable trend, which may lead to fluctuations in costs and income compared with current forecasts.
- 9.21 **Year-end Adjustments:** There are certain items that are not determined or finalised until the financial year-end. For example, the final assessment of provisions required for bad debts and final allocations of support service recharges. These can result in potentially significant differences to current forecasts.

10 Links to Corporate Strategy

- 10.1 The financial performance of the Council underpins the delivery of corporate priorities and therefore all Corporate Aims.

11 Unitary Council Financial Implications and S24 Direction Implications

- 11.1 The main considerations within scope of this report is the impact of in-year financial performance on year end reserve balances that will transfer to the new unitary council on 1 April, and potential impact of variances on future budget estimates. Reserves are currently projected to remain above the minimum requirement. Finance officers and budget managers will feed in ongoing and future risks and implications through the budget setting process for 2023/24.

12 Partnership Implications

- 12.1 A range of HRA services are provided through partnership arrangements such as MIND, citizen's advice, Taunton East Development Trust, North Taunton and Wiveliscombe Area Partnership. The cost of these services is reflected in the Council's financial outturn position for the year.

13 Scrutiny Comments / Recommendations

- 13.1 This report was considered by Community Scrutiny on 22 February 2023. A summary of the comments and recommendations discussed are provided here for the Executive to consider.
- 13.2 There were a few comments made with regard to the current economic operating environment and the impact this is having on our social housing development and regeneration schemes. The challenges being faced such as inflation increasing the price

of materials, the uncertainty of these prices over the next few years and the impact this has on supplier tenders / contracts.

- 13.3 The delays in delivering the capital schemes was noted and an enquiry as to how this impacts the budgets was made.
- 13.4 An enquiry was made to the correlation of the condition of the property when returned by the tenant and the cost of voids.
- 13.5 An enquiry was made to the recruitment issues being faced by the council and what campaigns the council is / will be undertaking to resolve this.

Democratic Path:

- **Community Scrutiny – 22 February 2023**
- **Executive – 15 March 2023**
- **Full Council - No**

Reporting Frequency: Quarterly
