

SWT Planning Committee

Thursday, 14th October, 2021,
1.00 pm

Somerset West
and Taunton

The John Meikle Room - The Deane
House

[SWT MEETING WEBCAST LINK](#)

Members: Simon Coles (Chair), Marcia Hill (Vice-Chair), Ian Aldridge, Mark Blaker, Ed Firmin, Roger Habgood, John Hassall, Mark Lithgow, Chris Morgan, Craig Palmer, Ray Tully, Sarah Wakefield, Brenda Weston, Keith Wheatley and Loretta Whetlor

Agenda

1. Apologies

To receive any apologies for absence.

2. Minutes of the previous meeting of the Planning Committee

To approve the minutes of the previous meeting of the Committee held on 12th August 2021 and 2nd September 2021.

(Pages 5 - 14)

3. Declarations of Interest or Lobbying

To receive and note any declarations of disclosable pecuniary or prejudicial or personal interests or lobbying in respect of any matters included on the agenda for consideration at this meeting.

(The personal interests of Councillors and Clerks of Somerset County Council, Town or Parish Councils and other Local Authorities will automatically be recorded in the minutes.)

4. Public Participation

The Chair to advise the Committee of any items on which members of the public have requested to speak and advise those members of the public present of the details of the Council's public participation scheme.

For those members of the public who have requested to

speak, please note, a three minute time limit applies to each speaker and you will be asked to speak before Councillors debate the issue.

Temporary measures during the Coronavirus Pandemic

Due to the temporary legislation (within the Coronavirus Act 2020, which allowed for use of virtual meetings) coming to an end on 6 May 2021, the council's committee meetings will now take place in the office buildings within the John Meikle Meeting Room at the Deane House, Belvedere Road, Taunton. Unfortunately due to capacity requirements, the Chamber at West Somerset House is not able to be used at this current moment.

Following the Government guidance on measures to reduce the transmission of coronavirus (COVID-19), the council meeting rooms will have very limited capacity. With this in mind, we are requesting that only those members of the public who have registered to speak to attend the meetings in person in the office buildings, if they wish (we will still be offering to those members of the public that are not comfortable in attending, for their statements to be read out by a Governance and Democracy Case Manager). Please can we urge all members of the public who are only interested in listening to the debate to view our live webcasts from the safety of their own home to help prevent the transmission of coronavirus (COVID-19).

5. **3/02/21/002** (Pages 15 - 22)
Replacement of dwelling Pleasant View, Parish Quarry Road, Brompton Ralph, TA4 2SA
6. **10/21/0011** (Pages 23 - 28)
Change of use of land from agricultural to mixed agricultural and equine use and laying of hardstanding at Merlands, Stapley Road, Biscombe, Churchstanton (in accordance with amended plans received on 16 April 2021)
7. **3/24/21/003** (Pages 29 - 48)
Erection of an agricultural livestock building with creation of access track from highway Land north of Beggearn Huish Manor, Washford 304357.139755
8. **3/24/21/004** (Pages 49 - 58)
Erection of 1 No. temporary agricultural workers dwelling Land north of Beggearn Huish Manor, Washford, 304357, 139755

- | | |
|---|-------------------------|
| <p>9. 3/37/21/006
Application for Outline Planning Permission with all matters reserved, except for access, for the erection of 1 No. dwelling Land Between Beverley Drive and Goviers Lane, Watchet, TA23 0DF</p> | <p>(Pages 59 - 72)</p> |
| <p>10. 38/21/0222
Demolition of garage and erection of two storey extension to the side of 2 Glenthorne Road, Taunton</p> | <p>(Pages 73 - 76)</p> |
| <p>11. 53/21/0006
Change of use of live/work unit to ancillary accommodation at 6 Luscombe Road, Cotford St Luke (retention of works already undertaken)</p> | <p>(Pages 77 - 84)</p> |
| <p>12. Latest appeals and decisions received</p> | <p>(Pages 85 - 140)</p> |

**JAMES HASSETT
CHIEF EXECUTIVE**

Please note that this meeting will be recorded. You should be aware that the Council is a Data Controller under the Data Protection Act 2018. Data collected during the recording will be retained in accordance with the Council's policy. Therefore unless you are advised otherwise, by taking part in the Council Meeting during Public Participation you are consenting to being recorded and to the possible use of the sound recording for access via the website or for training purposes. If you have any queries regarding this please contact the officer as detailed above.

Following Government guidance on measures to reduce the transmission of coronavirus (COVID-19), we will be live webcasting our committee meetings and you are welcome to view and listen to the discussion. The link to each webcast will be available on the meeting webpage, but you can also access them on the [Somerset West and Taunton webcasting website](#).

If you would like to ask a question or speak at a meeting, you will need to submit your request to a member of the Governance Team in advance of the meeting. You can request to speak at a Council meeting by emailing your full name, the agenda item and your question to the Governance Team using governance@somersetwestandtaunton.gov.uk

Any requests need to be received by 4pm on the day that provides 2 clear working days before the meeting (excluding the day of the meeting itself). For example, if the meeting is due to take place on a Tuesday, requests need to be received by 4pm on the Thursday prior to the meeting.

The Governance and Democracy Case Manager will take the details of your question or speech and will distribute them to the Committee prior to the meeting. The Chair will then invite you to speak at the beginning of the meeting under the agenda item Public Question Time, but speaking is limited to three minutes per person in an overall period of 15 minutes and you can only speak to the Committee once. If there are a group of people attending to speak about a particular item then a representative should be chosen to speak on behalf of the group.

Please see below for Temporary Measures during Coronavirus Pandemic and the changes we are making to public participation:-

Due to the temporary legislation (within the Coronavirus Act 2020, which allowed for use of virtual meetings) coming to an end on 6 May 2021, the council's committee meetings will now take place in the office buildings within the John Meikle Meeting Room at the Deane House, Belvedere Road, Taunton. Unfortunately due to capacity requirements, the Chamber at West Somerset House is not able to be used at this current moment.

Following the Government guidance on measures to reduce the transmission of coronavirus (COVID-19), the council meeting rooms will have very limited capacity. With this in mind, we will only be allowing those members of the public who have registered to speak to attend the meetings in person in the office buildings, if they wish (we will still be offering to those members of the public that are not comfortable in attending, for their statements to be read out by a Governance and Democracy Case Manager). Please can we urge all members of the public who are only interested in listening to the debate to view our live webcasts from the safety of their own home to help prevent the transmission of coronavirus (COVID-19).

Full Council, Executive, and Committee agendas, reports and minutes are available on our website: www.somersetwestandtaunton.gov.uk

For further information about the meeting, please contact the Governance and Democracy Team via email: governance@somersetwestandtaunton.gov.uk

If you would like an agenda, a report or the minutes of a meeting translated into another language or into Braille, large print, audio tape or CD, please email: governance@somersetwestandtaunton.gov.uk

SWT Planning Committee - 12 August 2021

Present: Councillor Simon Coles (Chair)
 Councillors Marcia Hill, Ian Aldridge, Ed Firmin, Roger Habgood, John Hassall, Mark Lithgow, Craig Palmer, Ray Tully, Brenda Weston and Loretta Whetlor

Officers: Rebecca Miller (Principal Planning Specialist), Alison Blom-Cooper (Assistant Director), Roy Pinney (Shape Legal), Briony Waterman and Tracey Meadows (Governance and Democracy) and Marcus Prouse (Specialist, Governance and Democracy)

(The meeting commenced at 1.00 pm)

34. **Apologies**

Apologies were received from Councillors Blaker and Wakefield.

35. **Minutes of the previous meeting of the Planning Committee**

(Minutes of the meeting of the Planning Committee held on 22 July, not circulated with the agenda but circulated separately)

Resolved that the minutes of the Planning Committee held on 22 July be confirmed as a correct record.

Proposed by Councillor Hill, seconded by Councillor Palmer

The **Motion** was carried.

36. **Declarations of Interest or Lobbying**

Members present at the meeting declared the following personal interests in their capacity as a Councillor or Clerk of a County, Town or Parish Council or any other Local Authority:-

Name	Application No.	Description of Interest	Reason	Action Taken
Cllr C Palmer	3/21/20/0104	Previous Chair of Minehead Town Council when this application was discussed. Did not take part in	Personal	Spoke and Voted

		the discussion or the vote. Discretion not fettered.		
Cllr L Whetlor	3/21/20/0104	Applicant was known by the Cllr and family member.	Personal	Took part in the debated but did not Vote

37. **Public Participation**

Application No.	Name	Position	Stance
3/21/20/0104	Mr B Slade	Local Resident	Objecting

38. **Public Question Time**

Question from Mr Martin Pakes

Regarding the proposed demolition of swimming pool and erection of mixed-use development comprising of retail, commercial, restaurant, residential, car park and associated public realm at Coal Orchard, Taunton

Although the development is progressing, Conditions 3 (Surface water drainage) and 13 (Materials) have not been complied with. What steps are the Planning Committee taking to enforce these conditions?

Response from the Planning Specialist;

With regards to the water drainage scheme, whilst it had not technically and formally signed off, the submission and the technical design of a surface water drainage had been approved and agreed with the Lead Local Flood Authority who were the regulators for surface water drainage. How the Coal Orchard had been constructed was technically satisfactory. The final paperwork with regards to surface water details were to follow.

A Case Officer visited the site in September with regards to the materials used on site and these had been verbally agreed. The reason that this issue had not been finally signed off was because of a Section 73 Planning Application. The Section 73 sought to amend the original permission and it sought to amend the material condition. The Section 73 was accepted for the surface water drainage works for pre-commencement which would eventually become a compliance condition. The reason that this had not been issued yet was because we needed a Deed of a variation to the Section 106 agreement. When you arrange a Section 73 application you have effectively granted a new planning permission so any obligations that we secured on the original scheme would no longer exist if we did not prepare a Deed of Variation effectively the legal paperwork needed to be prepared which linked the original Section 106 to the new Section 73 application. This work was currently with our Solicitors in Shape Legal.

The Case Officer had written a report and this had been reviewed by the Principal Planning Specialist and the Chair of the Planning Committee, and based on the level of comments received, it was decided that this would be a Chair a delegated decisions referral decision and subject to those final technical points being resolved.

The developer had not been treated any differently to any of the other developers. The position that we were now in was to resolve those issues mentioned.

39. **3/21/20/0104**

Demolition of workshop and erection of 1 No. detached dwelling with associated works at Workshop, Quay Lane, Minehead, TA24 5QU

Comments by members of the public included;

- Concerns the application site once formed part of the residential curtilage of Proctors, Northfield Road'. 'Proctors 'never owned this site area in question. The conveyance document dated October 1946, when the house name was 'Glenleigh', and it makes reference to parts of this site area and the property to the West, as having belonging to 'The Minehead Land Company', and 'The Minehead Electric Supply Company Ltd.' Also at some time, the MOD had a Drill Hall on the site, and following that, the 'Brotherhood 'used it as a mission hall;
- There was no vehicle access from Quay Lane to Martlet Road, only pedestrian access;
- Concerns that the dwellings surrounding the site have all been erected through garden development from host dwellings along Northfield Road and Blenheim Road. Again this statement is incorrect, as 'Proctors ', formerly 'Glenleigh', at no time owned this land;
- Concerns with the statement that the existing building was in sound weather tight condition, and currently used as a workshop and store as ancillary space to the former owners residential dwelling. This statement was incorrect, as this building and site was never under the ownership of the 'Proctors' property, except for an area around the garage to the North of the workshop site;
- Concerns with right of way over a 3m wide section of the site for vehicle parking within the garage;
- Character and Appearance;
- Concerns that most of the dwellings were relatively modern and formed part of the rear gardens of dwellings along Northfield Road and Blenheim Road;

- Concerns with discrepancies with the existing floor plan and the proposed floor plan drawings. The North side wall of the existing garage is one distance from the South wall of my garage, then the North wall of the proposed building, has moved more than halfway across the shared maintenance access way, towards my garage. On their drawing, my boundary line is shown to the West of the rear of my garage, and then shown dotted between the two garages, but no boundary line to the front of my garage, is not shown. This, as shown on my documents, runs from the East end of the workshop garage, in a North direction to my boundary, and this area is within the 'Proctors ' boundary;
- Access to this site was very constricted. Concerns with the uninterrupted access to my garage and rear gateway, while the work proposed, was being carried out;
- Concerns with the adverse effect that this would have on its foundations, being an old pre-cast concrete building;
- Concerns with the reservations as to the viability of this proposal because the construction traffic arising would create a completely unacceptable degree of obstruction off Quay Lane. This being a public highway upon which the proposed dwelling also has the use of the external space to the rear of the Eastern garage. Construction of the bike store and enclosed external space would be a breach of my legal easement, being also enjoyed by the affected neighbouring garage;

Comments by Members included;

- Over development of the site;
- Access issues for emergency vehicles;
- Concerns with the footprint and overlooking;
- No objections from Highways;

Councillor Habgood proposed and Councillor Hill seconded a motion for the application to be APPROVED with Condition 4 requiring either a licence from Natural England or a bird and bat roost assessment from the licensed ecologist removed.

The **Motion** was carried.

40. **Latest appeals and decisions received**

Latest appeals and decisions noted.

(The Meeting ended at 2.00 pm)

SWT Planning Committee - 2 September 2021

Present: Councillor Simon Coles (Chair)

Councillors Marcia Hill, Ian Aldridge, Mark Blaker, Roger Habgood, John Hassall, Mark Lithgow, Craig Palmer, Ray Tully, Sarah Wakefield, Brenda Weston and Loretta Whetlor

Officers: Rebecca Miller (Principal Planning Specialist), Alison Blom-Cooper (Assistant Director), Martin Evans (Shape Legal Partnership), Denise Todd (Planning Specialist), Briony Waterman (Planning Specialist),

Sarah Wilsher (Planning Officer), Tracey Meadows (Governance and Democracy) and Marcus Prouse (Specialist, Governance and Democracy)

Also Present: Adam Garland (Somerset County Council Highways) via Zoom

(The meeting commenced at 1.00 pm)

41. Apologies

Apologies were received from Councillors Firmin and Morgan.

42. Minutes of the previous meeting of the Planning Committee

(Minutes of the meeting of the Planning Committee held on 12 August (to be approved at the meeting on the 23 September.

43. Declarations of Interest or Lobbying

Members present at the meeting declared the following personal interests in their capacity as a Councillor or Clerk of a County, Town or Parish Council or any other Local Authority:-

Name	Application No.	Description of Interest	Reason	Action Taken
Cllr M Blaker	09/21/0007	Ward Member	Personal	Spoke and Voted
Cllr S Wakefield	3/39/20/008	Previously acted for the Applicant. Discretion not fettered	Personal	Spoke and Voted
Cllr L Whetlor	3/39/20/008	Ward Member	Personal	Spoke and Voted

44. Public Participation

Application No.	Name	Position	Stance
09/21/0007	Mr and Mrs Morrow	Applicants	In favour

45. **3/39/20/008**

Outline planning application with all matters reserved, except for access, for the redevelopment of the site to provide a food store E(a), retail shops E(a), professional and financial services E(c)(i),(ii) and (iii), food and drink uses E(b), health services E(e), residential dwellings (C3) (no change), vehicle and pedestrian accesses, associated car parking and landscaping." Land off Bank Street with link to Fore Street, Williton

Comments from members of the public included;

- This development would re-establish the economy of Williton as residents would not have to travel to Minehead to shop;
- Concerns with getting in and out of the site;
- Highway concerns regarding increased traffic/HGV's and the tightness of the roundabout;
- The development would increase employment in Williton;
- The roundabout could be made larger by demolishing one of the surrounding buildings;
- Concerns with delivery and operational hours;

Councillor Hill proposed and Councillor Habgood seconded a motion for the Application to be **APPROVED** subject to the Conditions set out and a S106 to secure the following;

- The Travel Plan
- The access junction works
- The pedestrian link to Fore Street
- Local Employment Agreement

(The Committee suggested that the owner had meaningful discussions with SCC Highways to ensure the best use of the land available to make traffic movements safer in that area)

The **Motion** was carried

46. **3/07/21/007**

Erection of a first floor balcony extension to clubhouse with siting of additional 34 No. static caravan pitches and changes to internal road layout at Quantock Orchard Caravan Park, Station Road, Crowcombe, TA4 4AW

Comments from Members included;

- Concerns with increased traffic to the site;

- Concerns with odour control;
- Concerns that the maximum length of occupancy did not exceed 11 months;
- Sewage concerns;
- Tree screening should be replaced;

Councillor Hill proposed and Councillor Habgood seconded a motion for the Application to be **APPROVED** subject to Conditions and for Condition 8 to be tightened up to include Odour Control.

The **Motion** was carried

47. **09/21/0007**

Erection of a single storey extension to the rear of The Old Waterworks, Chipstable Road, Chipstable

Comments from members of the public included;

- The previous building was a drab rendered utility building with no windows and only one key feature;
- The slate gable roof would be kept and mirrored on the extensions;
- An unloved, ugly building would be transformed into an attractive family home;
- Local stone would be used to build the stone walls and patios;
- This build was supported by the Parish Council and the local community;

Comments from Members included;

- The building was very tasteful;
- Glad to see that the building was being brought back into use;

Councillor Hill proposed and Councillor Habgood seconded a motion for Conditional Approval to be **APPROVED**

The **Motion** was carried.

48. **Latest appeals and decisions received**

Latest appeals and decision received noted.

(The Meeting ended at 2.30 pm)

Application No:	3/02/21/002
Parish	Brompton Ralph
Application Type	Full Planning Permission
Case Officer:	Briony Waterman
Grid Ref	Easting: 307193 Northing: 133523
Applicant	Mr Anthony Branfield
Proposal	Replacement of dwelling
Location	Pleasant View, Parish Quarry Road, Brompton Ralph, TA4 2SA

Recommendation

Recommended decision: Grant

Recommended Conditions

- 1 The development hereby permitted shall be begun within three years of the date of this permission.

Reason: In accordance with the provisions of Section 91 Town and Country Planning Act 1990 (as amended by Section 51(1) of the Planning and Compulsory Purchase Act 2004).

- 2 The development hereby permitted shall be carried out in accordance with the following approved plans:

(A4) DrNo 1112/01A Existing Location Plan
 (A4) DrNo 1112/02 Existing Block Plan
 (A3) DrNo 1112/03 Existing Plan
 (A3) DrNo 1112/04 Existing Elevations
 (A4) DrNo 1112/05 Proposed Block Plan
 (A3) DrNo 1112/06 Proposed Plans
 (A3) DrNo 1112/07 Proposed Elevations 1 of 2
 (A3) DrNo 1112/08 Proposed Elevations 2 of 2
 (A3) DrNo 1112/09 Existing & Proposed Section
 (A3) DrNo 1112/10 Distant Views

Reason: For the avoidance of doubt and in the interests of proper planning.

- 3 Prior to construction above damp proof course level, a "lighting design for bats" shall be submitted to and approved in writing by the Local Planning Authority. The design shall show how and where external lighting will be installed (including through the provision of technical specifications) so that it can be clearly demonstrated that areas to be lit will not disturb or prevent bats using

their territory or having access to their resting places. All external lighting shall be installed in accordance with the specifications and locations set out in the design, and these shall be maintained thereafter in accordance with the design. Under no circumstances should any other external lighting be installed without prior consent from the Local Planning Authority.

Reason: In the interests of the 'Favourable Conservation Status' of populations of European protected species and in accordance with policy NH6 of the West Somerset Local Plan

- 4 Windows on the south elevations of the dwelling will be provided with measures to reduce the risk of bird strike. A specification will be submitted to an approved in writing by the Local Planning Authority prior to ground works commencing and the measure applied prior to the first occupation of a building. The approved measures shall be implemented and maintained as agreed for the duration of the development.

Reason: In the interests of priority bird species listed on s41 of the Natural Environment and Rural Communities Act 2006, and in accordance with policy NH6 of the West Somerset Local Plan

Informative notes to applicant

In accordance with paragraph 38 of the National Planning Policy Framework the Council has worked in a positive and pro-active way and has imposed planning conditions to enable the grant of planning permission.

Proposal

Permission is sought for the demolition of existing dwelling and erection of replacement dwelling.

The replacement dwelling will be constructed in vertical timber cladding and zinc sheet cladding with metal windows and a zinc cladding and timber decking roof. The proposed dwelling will be set across three floors with the ground floor consisting of an open planned kitchen/dinning room/sitting room a snug, playroom, utility and shower room. At first floor there is to be 4 bedrooms and two bathrooms and at second floor a guest bedroom with ensuite and viewing room.

Site Description

Pleasant View is a detached bungalow with agricultural buildings located to the north east. The site is accessed via Parish Quarry Road. The site is bounded by existing trees and hedging.

Relevant Planning History

3/02/10/001 - Removal of agricultural occupancy condition on permission 52912 - granted 17/03/2010

3/02/09/005 - Application for lawful development certificate for an activity in breach of agricultural workers occupancy condition - refused 11/08/2009

52912 - Erection of a bungalow on land adjoining Green Lane and formation of vehicular access - approved 3/05/1961.

Consultation Responses

Brompton Ralph Parish Council - Objects

- Size - is larger than original and will overlook other properties
- Design - not in keeping with the character of properties in the local area
- Proposed is neither suitable nor an affordable dwelling
- An unspoilt area of countryside bordering the ENPA proposal would have an adverse impact
- Beech hedge must not be removed.

Highways Development Control - Standing advice

SCC - Ecologist - No comments received

Wessex Water Authority - No comments received

Landscape - Objection

- conflict with the character of the sites context
- sparsely development landscape and open character means the changes would be seen from a wide area would diminish the quality of the views and add to light pollution
- conflicts with the requirements of good design and paragraphs 123 and 124 of NPPF
- be visible within the landscape

Habitats Regulations Assessment

The proposals do not require a HRA.

Representations Received

Six letters of objection making the following comments (summarised):

- Design is too modern
- Can be seen from a distance
- Would not object to a classic stone built farmhouse of the same footprint
- Unique part of West Somerset with buildings in natural stone

- highest point and visible for miles
- The proposed building will result in overlooking
- not in keeping with the surroundings.

One letter of support making the following comments (summarised);

- Good to see a contemporary and environmentally responsible design

Planning Policy Context

Section 38(6) of the Planning and Compulsory Purchase Act 2004 requires that applications are determined in accordance with the development plan unless material considerations indicate otherwise.

The development plan for the West Somerset planning area comprises the West Somerset Local Plan to 2032, retained saved policies of the West Somerset District Local Plan (2006) Somerset Minerals Local Plan (2015) and Somerset Waste Core Strategy (2013).

Relevant policies of the development plan are listed below.

West Somerset Local Plan to 2032

- | | |
|------|-----------------------------------|
| OC1 | Open Countryside development |
| NH13 | Securing high standards of design |

Retained saved policies of the West Somerset Local Plan (2006)

- | | |
|------|-----------------------------------|
| OC1 | Open Countryside development |
| NH13 | Securing high standards of design |

Determining issues and considerations

The main consideration in determining this application is the principle of development, the impact upon the visual amenity and the impact upon the residential amenity.

Principle of development

The site lies outside of any defined settlements limits as per policy SC1 and therefore policy OC1 applies. Whilst policy OC1 does not support new dwellings except subject to uses such as for a rural worker, the proposed development replaces an existing dwelling with a new one.

There are no adopted or retained policies in the West Somerset Local Plan to 2032 that directly address replacement dwellings however as a rule it is considered that replacement dwellings are acceptable. The proposal is located further south from the boundary with the road than the existing and replaces a bungalow with a three storey dwelling. The proposal is considered acceptable in principle.

Residential amenity

The nearest neighbour is approximately 280m to the south of the proposed site. Whilst the site is an elevated position it is considered that due to the distance involved there would not be a significant impact on overlooking.

Highways

There are no alterations proposed to the access and there is sufficient parking and turning on site it is therefore considered that there would be no adverse impact upon the highway.

Visual impact.

The majority of comments received from both neighbours and the Parish Council focussed on the design of the building. The proposal is in an isolated location away from other properties it is therefore considered that the modern design would not have a detrimental impact upon the streetscene or vernacular of the area. The use of materials will mimic those used on agricultural buildings which result in the finished product being read in context with the existing farm buildings.

Sustainability

The design of the proposal includes the following sustainability measures, the building will be insulated and heated by a combination air and ground source heat pumps, use grey-water recycling and sustainable drainage.

Conclusion

In conclusion whilst the proposal is a modern design it makes good use of space and materials without having a significant impact upon the visual or residential amenity of the neighbouring properties. It utilises sustainable principles within its design and is therefore recommended that planning permission be granted.

In preparing this report the planning officer has considered fully the implications and requirements of the Human Rights Act 1998.

10/21/0011

MRS G PEATFIELD

Change of use of land from agricultural to mixed agricultural and equine use and laying of hardstanding at Merlands, Stapley Road, Biscombe, Churchstanton (in accordance with amended plans received on 16 April 2021)

Location: MERLANDS, STAPLEY ROAD BISCOMBE, CHURCHSTANTON,
TAUNTON, TA3 7PZ

Grid Reference: 317563.113324

Full Planning Permission

Recommendation

Recommended decision: Conditional Approval

Recommended Conditions (if applicable)

1. The development hereby permitted shall be begun within three years of the date of this permission.

Reason: In accordance with the provisions of Section 91 Town and Country Planning Act 1990 (as amended by Section 51(1) of the Planning and Compulsory Purchase Act 2004).

2. The development hereby permitted shall be carried out in accordance with the following approved plans:

(A4) Site Plan
(A4) Location Plan

Reason: For the avoidance of doubt and in the interests of proper planning.

3. No jumps or other structures shall be erected on the land without the prior written consent of the Council.

Reason: To protect the landscape and visual amenity of the area in accordance with policy CP8 of the Core Strategy.

4. None of the fields shall be subdivided by way of hedges or fences without the prior written consent of the Council.

Reason: To protect the landscape and visual amenity of the area in accordance with policy CP8 of the Core Strategy.

Notes to Applicant

- . In accordance with paragraph 38 of the National Planning Policy Framework the Council has worked in a positive and pro-active way with the applicant and has negotiated amendments to the application to enable the grant of planning permission.

Proposal

The application, submitted partly in retrospect, proposes the change of use of agricultural land to a mixed agricultural and equine use. The application also includes the laying of a hardstanding at the field entrance from Merlands to the field to the east. The site area measures 9.4 acres.

The applicants agent has confirmed that all other accesses shown on the submitted plan are existing.

The applicant has requested a mix use to allow the recreational grazing of horses as well as the grazing of livestock. The application does not propose any physical changes to the land except for the laying of an area of hardstanding at the entrance to the field from Merlands. The land is to be used for the grazing of horses in connection with and ancillary to the recently approved stables and turnout area on an adjoining site (10/19/0030)

Site Description

The site lies to the east of the village of Hemyock and two miles south of Churchstanton in an area of open countryside within the Blackdown Hills AONB. There are a number of residential properties along the road in close proximity to the application site and accessing onto Stapley Road. The parcels of land the subject of this application lie to the north and south of the highway and are bounded by mature hedgerows and trees.

Relevant Planning History

10/91/0027 -CA granted in March 1992 for the change of use of garage and store to form a granny annex at Merlands, Biscombe, Churchstanton

10/03/0034 - CA granted in March 2003 for the use of existing annex as holiday accommodation in addition to annex use at Merlands, Biscombe, Churchstanton

10/09/0022- CA granted in September 2002 for the erection of single and double storey extension to rear at Merlands, Biscombe, Churchstanton

10/10/0012 - CA in October 2012 for alterations to fenestration, incorporation of balcony into bedroom into bedroom and provision of balustrade at Merlands, Biscombe, Churchstanton (non material amendment to permission 10/09/0022) as amended by revised proposed elevations and proposed first floor plan (reference

PM0971 Rev D)

10/19/0032 - Conversion of annex to dwelling - Approved 31 January 2020

10/19/0030 - Change of use of land from agricultural to equestrian with erection of stable block and formation of turning area at Merlands, Biscombe, Churchstanton - Approved

Consultation Responses

CHURCHSTANTON PARISH COUNCIL - The Parish Council support this application.

SCC - ECOLOGY - As long as the proposal does not result in any change in the existing ecological (including removal of vegetation/greenspace and changes in lighting levels), I do not foresee any ecological constraints relating to this proposal.

SCC - TRANSPORT DEVELOPMENT GROUP - Standing advice can be applied on the basis that this is ancillary to 10/19/0030 and for private use and not a business/commercial use

PLANNING ENFORCEMENT - No comments received

TREE OFFICER - Hedgerow Regs

If the hedge was part of the domestic curtilage then no hedge removal notice would have been necessary, as these hedges are not covered by the 1997 Regs.

If the hedge was covered by the Regs, you can make an access if you have no other way into your land (such as if you have purchased a new field), or if you are replacing an old access which would then be blocked with new planting

BLACKDOWN HILLS AONB SERVICE - We do not wish to submit any detailed comments on this occasion other than to note that should the council be minded to approve the application we would support restrictive conditions relating to jumps and similar, and the sub-division/fencing of fields in the interests of landscape and visual amenity of the AONB.

Habitats Regulations Assessment

Not applicable

Representations Received

Ward Councillor (Cllr Henley) - I am the ward District Councillor for this Parish and I would like to request that this planning application is determined by the Planning Committee. Due to comments made by local residents raising a number of objections I would like this to go to committee. I think it would be premature to determine this application also while complaints about previous applications are still yet to be determined.

Two representations received objecting to the proposal and the objections are summarised below:

- Current use of the land not approved (since April 2020)

- Impact of equine use on neighbouring property having a negative impact on the health and welfare of horses and dogs
- personal safety whilst caring for own horses
- no evidence that the use is a benefit to the area and land, the only benefit being for the applicant
- Access to the fields - one access to the south of Stapley Road has been blocked off with a post and wire fence, the access from Merlands to the adjoining field was created in 2019 during the protected nesting season
- Previous use of the land (prior to April 2020) for cows is disputed
- Proposed expansion of equine use of the land would impact on the use and enjoyment of property and would lead to further harm to the surrounding area
- Proposed continued agricultural use of the land
- Adherence of planning requirements
- the proposed use would not be sensitive to the surroundings and consideration of the existing neighbours have not been taken into account
- discrepancies in the application

Planning Policy Context

Section 38(6) of the Planning and Compulsory Purchase Act 2004 requires that applications are determined in accordance with the development plan unless material considerations indicate otherwise.

The development plan for Taunton Deane comprises the Taunton Deane Core Strategy (2012), the Taunton Site Allocations and Development Management Plan (2016), the Taunton Town Centre Area Action Plan (2008), Somerset Minerals Local Plan (2015), and Somerset Waste Core Strategy (2013).

Relevant policies of the development plan are listed below.

DM1 - General requirements,
 DM2 - Development in the countryside,
 NPPF - National Planning Policy Framework,
 CP8 - Environment,

The National Planning Policy Guidance (NPPF) is a material consideration.

Local finance considerations

Community Infrastructure Levy

Not applicable

Determining issues and considerations

Policy DM1 sets out the general requirements for development. There are no specific policies relating to the change of use to mixed agriculture and equestrian.

Policy CP8 - Environment requires the conservation and enhancement of the natural environment and will not permit development proposals that would harm these interests.

The site lies within the Blackdown Hills AONB. The use of the land for mixed equine and agriculture would not affect the landscape character in this location. The AONB officer has requested conditions restricting jumps and similar and no subdivision of fields in the interests of landscape and visual amenity. Appropriate conditions have been included.

An area of hardstanding (approx. 200m²) has been laid between Merlands garden and the field access to the east. The application was amended to include this component and reconsultation was carried out. Given the size, materials and location of the hardstanding in close proximity to the domestic curtilage, it is not considered it harms the landscape character of the area.

No additional traffic is likely to be created by the development. The stables in connection with this use are located on an adjoining field on the northern side of Stapley Road.

The issues raised in the representations raise concerns that the land is already being used for equine purposes, the application is incorrect as the use has been applied for retrospectively and the impact of the equine use on the adjoining site currently used for equine purposes.

Following the investigation by the Council into the unauthorised use, this application has been submitted for consideration and it is acknowledged it is retrospective.

The applicants agent has confirmed that the access from Merlands into the adjoining field was created in August 2019. Permission for the removal of the hedgerow was not required under the Hedgerow Regulations. Following the comments from the ecologist the details of the creation of the access were forwarded for clarification and further comment. No comments have been received. Confirmation has been received from the applicants agent that all other access points indicated on the plan are existing.

The site is located in a rural area where the keeping of animals is not an unusual feature. The use of the land for the grazing of horses would not be dissimilar to other animals grazing the land. Consequently it is not considered that the proposal would have a greater impact in terms of residential amenity or the rural character of the area. The horses are kept for private use and not for business purposes.

The existing stables on the adjoining site have planning permission (10/19/0030) and the proposal is for the grazing of the horses in the adjoining and nearby fields. The level of activity is restricted to some extent by the number of loose boxes in the stable block. The application is not proposing additional horses so there would be no greater impact on the adjoining land use.

Other issues raised in the representations relate to the non-compliance of conditions attached to the application for stables and turnout area (10/19/0030). However these matters have been investigated by the enforcement officer and the case is now closed.

The Ward Councillor raised concerns that the application should not be determined until the complaint to the Ombudsman regarding the adjoining site had been determined. The Ombudman has concluded his investigation and issued his decision. No further action is required.

The proposal is considered acceptable and approval is recommended.

In preparing this report the planning officer has considered fully the implications and requirements of the Human Rights Act 1998.

Contact Officer: Denise Grandfield

Application Details	
Application Reference Number:	3/24/21/003
Application Type:	Full
Description	Erection of an agricultural livestock building with creation of access track from highway
Site Address:	Land north of Beggearn Huish Manor, Washford.
Parish:	Nettlecombe
Conservation Area:	No
Somerset Levels and Moors RAMSAR Catchment area:	No
AONB:	No
Case Officer:	Name and Contact number Briony Waterman 01823 785614 Should you wish to discuss the contents of this report item please use the contact details above by 5pm on the day before the meeting, or if no direct contact can be made please email: planning@somersetwestandtaunton.gov.uk .
Agent:	Acorus
Applicant:	Mr Moore
Reason for reporting application to Members:	Number of objections contrary to officer recommendation.

1. Recommendation

1.1 That planning permission be **GRANTED** subject to conditions.

2. Executive Summary of key reasons for recommendation

2.1 The proposal is considered to comply with policies OC1 open countryside development and retained policy BD/6 agriculture with no significantly adverse impacts upon highway safety or visual amenity.

3 Planning Obligations and conditions and informative

3.1 Obligations – None

3.2 Conditions [full wording in appendix 1]

- Time Limit
- Drawing numbers
- Roofing materials
- Bats
- Reptiles
- Biodiversity net gain

3.3 Informative

- Statement of positive working.
- Badgers
- Rights of way

4 Proposed development, Site and Surroundings

4.1 Details of proposal

The barn is to be approximately 36.6m x 18.3m with a height of 7.3m clad in anthracite (as confirmed by the agent) cement fibre roof sheets and Yorkshire boarding.

4.2 Site and surroundings

The site is open pastureland located to the northwest of Beggearn Huish. The access to the site is via an existing field gate, the boundaries are made up of mature hedging, the site slopes away from the road.

5 Planning (and enforcement) history

Reference	Description	Decision	Date
3/24/21/004	Erection of 1no. temporary agricultural workers dwelling	Awaiting determination	

6 Environmental Impact Assessment

Not applicable.

7 Habitats Regulations Assessment

Not applicable

8 Consultation and Representations

Statutory consultees (the submitted comments are available in full on the Council's website).

8.1 Date of Consultation: 29/04/2021

8.2 Date of revised consultation (if applicable) NA

8.3 **Statutory Consultees** the following were consulted

Statutory consultee	Comments	Officer comments
<p>Nettlecombe Parish Council (NPC).</p>	<p>The NPC members voted against</p> <p>1) Volume and expected size of traffic in our narrow lanes with an especially difficult pinch point between high walls near the entrance to site on both approaches.</p> <p>2) Very large agricultural building compared to the small area of agricultural land and the number of animals on site at any one time. Large foot print and very high building making it visible for some distance, and from the nearby footpath.</p> <p>3) Questions were asked about the viability of the enterprise.</p> <p>4) There is a lot of detail about farming in the application but nothing about power supply, water supply or where the meat is to be distributed from. No details are shown of facilities to chill or butcher the meat on site. There is a large workshop, but it is not clear what this is to be used for.</p> <p>8) Public footpath crossing the land will need adequate strong permanent fencing to protect walkers from inquisitive young cattle and NOT temporary electric fencing</p> <p>9) Initially the night-time noise from each batch of stressed, recently weaned young stock will be disturbing</p>	<p>Officer has removed comments re the dwelling.</p>

Highways Development Control	Standing advice	Further comments sought based on objections, standing advice remains
SCC Ecologist	Initial holding objection pending further information, this was submitted, and Ecology removed their objection imposing conditions and informative.	Conditions and informative added
Rights of Way	Confirm there is a right of way and advises applicant	Informative added

8.4 Internal Consultees

Environmental Health	No comments received	Officer did request via a follow up email
-----------------------------	----------------------	---

8.5 Local representation

8.5.1 This application was publicised by 28 letters of notification to neighbouring properties and a site notice was displayed on the 12/05/2021.

8.5.2 The following issues were raised in representation. Those that are material to the determination of the applications are addressed in substance in the material planning considerations sections of this report.

Material Planning Considerations	
Objections	Officer Comment
Highways <ul style="list-style-type: none"> • access lane is narrow, curving, and steep with a pinch point at the entrance • Traffic too wide for the lane suggest using wider road through Beggearn Huish • Southern approach through Beggearn Huish is also narrow with pinch points. • Concerns new business will increase traffic 	See paragraph 12.2

<ul style="list-style-type: none"> • Large vehicles will not be able to access the site • Lack of vehicle movement information • Poor visibility before the access gate • Parking and turning area will remove the land from agricultural use 	
Design: <ul style="list-style-type: none"> • Accommodation building is large for a temporary building • Building is large and high for a small holding 	Not relevant to this application for the barn See paragraph 12.3
Noise: <ul style="list-style-type: none"> • Increased number of cattle penned in the shed will generate a great deal of noise 	See paragraph 12.5
Landscape: <ul style="list-style-type: none"> • Include adequate screening • Should blend no other agricultural buildings 	See paragraph 12.3

Non-material planning matters	
Objections	Officer Comment
Nothing to explain what would happen to the temporary building after 3 years.	Not relevant to this application for a barn.
No building at all on the site	The site is bare agricultural land which forms part of a new holding.
No mention of service provision	Not a material planning consideration
Historically grazing small numbers of animals, this activity amounts to a change of use	The historic use of the site is agriculture, the proposed use is agriculture
The lower carbon footprint in grass fed cattle will do nothing to mitigate against the sum of carbon embedded in proposed materials	
States no manure will be stored within 250m of any dwelling the site is within 250m of a dwelling	Manure is not to be stored on site but cleared with the bedding straw.
Impact on ENPA and dark skies from external lighting	A condition has been included in relation to lighting.
Permanent fencing to protect walkers is not mentioned in the application	Not a material consideration. – the PROW is in the adjacent field

Disruption to users of the footpath	The site currently has animals grazing in the field, the footpath would be undisturbed.
Animal welfare	Meet the requirements of the RSPCA
the application details plan for stock to be sent to the local abattoir before returning to the site, a workshop is referenced but does not reference the arrangements or facilities for the storing, butchering, packaging, or selling meat from the premises.	Email from agent has confirmed that the meat is not to be packaged on site but off site by the "Meat Men".
Plenty of 2 bed accommodation locally	Not relevant to this application

Support	Officer Comment
Access to field is adequate for agricultural vehicles	No comment to add
Access is single lane which is common in the area	No comment to add
No issues in accessing the site	No comment to add.

9 Relevant planning policies and Guidance

In determining any planning application, the Council is required to have regard to the provision of its Development Plan so far as is material to the application and to any other material considerations and the determination shall be made in accordance with the plan unless material considerations indicate otherwise.

The Council's adopted plan for the former West Somerset area comprises the West Somerset Local Plan to 2032. The Local plans for both former Councils are being reviewed with the aim of producing one new Local Plan covering the entire administrative area.

9.1 Relevant policies of the development plan in the assessment of this applications are listed below:

OC1 – Open Countryside Development
 BD/6 – Agricultural Buildings
 EC11 – Agriculture

9.2 Conclusion on Development Plan

The proposed site is within the open countryside, relevant policies include OC1 - Open Countryside Developments and retained policy BD/6- Agricultural Buildings. The proposal relates to the provision of an agricultural building to support a farming business it is therefore considered to be acceptable in principle.

10 Local Finance Considerations

Not applicable.

11 Material Planning Considerations

11.1 National Planning Policy Framework

Government Guidance is contained in the National Planning Policy framework (NPPF) (2021) and provides the framework for producing Local Plans for housing and other development, which in turn provide the policies against which applications for planning permission are decided. Paragraph 11 of the NPPF sets out a presumption in favour of sustainable development requiring that development which accords with an up to date local plan should be approved without delay.

Where there are no relevant development plan policies, or the policies which are most important for determining the application are out of date, planning permission should be granted unless the application of policies in this Framework that protect areas or assets of particular importance provides a clear reason for refusing the development proposed; or any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the NPPF taken as a whole."

12 The main planning issues relevant in the assessment of this application are as follows:

12.1 Principle of development

12.2 Highways

12.3 Visual amenity

12.4 Use

12.5 Comments

12.1 Principle of development

The proposed site is within the open countryside, relevant policies include OC1 - Open Countryside Developments and retained policy BD/6- Agricultural Buildings. The proposal relates to the provision of an agricultural building to support a farming business it is therefore considered to be acceptable in principle.

12.2 Agricultural Appraisal.

The Council commissioned an independent Agricultural Appraisal to be undertaken by Reading Agricultural Consultants (RAC) in response to the number of objections raised. RAC found the proposals had

changed since the application was submitted with more land being available to the applicants from April 2022 of approximately 172 acres with the potential for a further 60 acres which would increase herd capacity from 22 to around 200. The appraisal found that based on the increased numbers over the three-year period the holding would be treated as a full time holding to support a full-time employee. The report concludes that based on the increase in land and herd sizes the size of the barn is appropriate and based on the evidence submitted and informed expansion plan it is considered that there would be an essential need for on-site accommodation for one key worker in accordance with the PPG and Local Plan Policy OC1.

12.3 Highways

Whilst the lanes surrounding the site are narrow the existing agricultural vehicular access provides good visibility for exiting traffic and the proposed yard area will be sufficient to ensure vehicles are able to park and turn and exit the site in a forward direction. There are no alterations proposed to the existing entrance and a consolidated track will run from east to west which will be porous to allow for surface water to soak away into the field. The proposal is therefore considered not to have a significant impact upon the highway network.

12.4 Visual amenity

Following discussions with the agent the roofing material is to be "anthracite" rather than "grey" a condition has been included to ensure this remains to better allow the building to assimilate into the landscape. The proposed barn is located in a field adjacent to other farm buildings and the hamlet of Beggearn Huish it is therefore considered that the proposal would be read in context and not form an incongruous feature within the landscape.

12.5 Use

The use of the barn is to be for housing of calves and cattle during the winter months, to comply with the RSPCA standards the barn needs to be 680sqm. It is noted that the barn includes space labelled as "storage" and "workshop". Within the submitted details there is mention of a meat packing and meat box business, on seeking further clarification the agent has confirmed that the beef will be cut, packaged and usually sorted into boxes off site by the "Meat Men" before being returned to site to be stored and delivered wholesale by the applicant. There will be no on-site sales at the site.

12.6 Comments

The comments received from neighbours and the Parish Council can be broken down into the following broad categories:

- i) Highways - too much traffic using narrow lanes, the views of the Highway Authority have been sought and they have replied with Standing Advice, having sought further clarification based on the objections the Highway Authority stand by standing advice as there is to be no business run from the site, it is already in agricultural use and therefore acceptable for farm vehicles.
- ii) Size/location of the building - within the statement from Acorus, it is clarified that the size of the building is compliant with the RSPCA regulations for animal welfare, the proposal is for an agricultural barn within the countryside within close proximity to the hamlet of Beggearn Huish it is considered that it is an expected feature within the landscape.
- iii) Viability - based on the agricultural appraisal submitted by Acorus the barn is required for the housing and welfare of livestock.
- iv) Agricultural dwelling - not relevant to this application it is being determined under reference 3/24/21/004.
- v) Details of utilities are not a material planning consideration; the agent has provided details stating the meat is not to be butchered on site.
- vi) PROW - there is a right of way through the site, a site which currently holds grazing stock, the applicant is reminded that any works to the right of way would need a separate consent from the Rights of Way team.
- vii) Noise - Within the countryside noise from animals is an expected occurrence, following discussions with Environmental Health they state that have been no complaints received based on the noise from farm animals, it is noted that the noise of the recently weaned animals may be distressing to some.
- viii) Lighting - a condition will be included to ensure no external lighting to maintain the dark skies

13 Planning Balance and Conclusion

- 13.1 For the reasons set out above, having regard to all the matters raised, it is therefore recommended that planning permission is granted subject to conditions.
- 13.2 In preparing this report the planning officer has considered fully the implications and requirements of the Human Rights Act 1998 and the Equality Act 2010.

Appendix 1 – Planning conditions and Informative

- 1 The development hereby permitted shall be begun within three years of the date of this permission.

Reason: In accordance with the provisions of Section 91 Town and Country Planning Act 1990 (as amended by Section 51(1) of the Planning and Compulsory Purchase Act 2004).

- 2 The development hereby permitted shall be carried out in accordance with the following approved plans:

(A4) DrNo SMOS Rev4 Block Plan
(A4) DrNo SMPB Rev1 Location Plan as proposed
(A3) DrNo SMPB Rev4 Floor Plan and Elevations

Reason: For the avoidance of doubt and in the interests of proper planning.

- 3 Prior to construction above damp-proof course level, a lighting design for bats, following Guidance Note 08/18 Bats and artificial lighting in the UK (ILP and BCT 2018), shall be submitted to and approved in writing by the Local Planning Authority. The design shall show how and where external lighting will be installed (including through the provision of technical specifications) so that it can be clearly demonstrated that areas to be lit will not disturb or prevent bats using their territory. The design should accord with Step 5 of Guidance Note 08/18, including submission of contour plans illustrating Lux levels. All external lighting shall be installed in accordance with the specifications and locations set out in the design, and these shall be maintained thereafter in accordance with the design. Under no circumstances should any other external lighting be installed without prior consent from the Local Planning Authority.

Reason: In the interests of the 'Favourable Conservation Status' of populations of European protected species and in accordance with West Somerset Local Plan to 2032: Policy NH6: nature conservation and the protection and enhancement of biodiversity

- 4 Any vegetation in the construction area should initially be reduced to a height of 10 centimetres above ground level by hand, brushings and cuttings removed and the remainder left for a minimum period of 48 hours of fine warm weather (limited rain and wind, with temperatures of 10°C or above) before clearing to minimise the risk of harming/killing any reptiles that may be present and to encourage their movement onto adjoining land. This work may only be undertaken during the period between March and October. Written notification of the date of the operations will be submitted to the Local Planning Authority prior to the works being undertaken. Once cut vegetation should be maintained at a height of less than 10cm for the duration of the construction period. A letter confirming these operations and any findings will be submitted to the Local Planning Authority.

Reason: In the interests of UK protected and priority species and in accordance with West Somerset Local Plan to 2032: Policy NH6: nature conservation and the protection and enhancement of biodiversity.

- 5 The following will be integrated into the design of the proposal
- A.I Installation of 2x Schwegler No. 10 swallow nesting cups, or similar, to be erected on a main beam of the open side of the barn at a height above 3m and maintained thereafter.
 - B. Provision shall be made for barn owls in the form of a barn owl box, a scheme for the installation, shall be submitted to and approved in writing by the Local Planning Authority. The approved scheme will be implemented and hereafter maintained.
 - C. 1x reptile hibernacula will be created in the retained grassland. Along the north western boundary.

Plans and photographs of the installed features will be submitted to and agreed in writing by the Local Planning Authority prior to first use.

Reason: In accordance with Government policy for the enhancement of biodiversity within development as set out in paragraph 170(d) of the National Planning Policy Framework

Informative

- 1 In accordance with paragraph 38 of the National Planning Policy Framework the Council has worked in a positive and pro-active way and has imposed planning conditions to enable the grant of planning permission.
- 2 The developers are reminded of the legal protection afforded to badgers and their resting places under the Protection of Badgers Act 1992 (as amended). It is advised that during construction, excavations, or large pipes (>200mm diameter) must be covered at night. Any open excavations will need a means of escape, for example a plank or sloped end, to allow any animals to escape. In the event that badgers, or signs of badgers are unexpectedly encountered during implementation of this permission it is recommended that works stop until advice is sought from a suitably qualified and experienced ecologist at the earliest possible opportunity.
- 3 Development, insofar as it affects the rights of way should not be started, and the rights of way should be kept open for public use until the necessary Order (temporary closure/stopping up/diversion) or other authorisation has come into effect/ been granted.

Failure to comply with this request may result in the developer being prosecuted if the path is built on or otherwise interfered with.

Appendix 2 – Neighbour representations summary

Ten letters making the following comments (Summarised):

- No objections in general highlight the problem concerning highway access using the lane 'north to Torre Rocks', the lane is extremely narrow and steep
- Problems in the past with traffic that is too wide using the lane causing damage
- Suggestion that any farm traffic resulting from this must use the wider road through Beggearn Huish via Egypt Cottage and out on to the B3224/A39.
- northern approach not suitable for lorry access due to steep and curving nature of the road, high walls and pinch point at the site entrance.
- all traffic will therefore use the southern approach passing all properties in Beggearn Huish, which is also narrow comprising a single lane with passing places, high walls and pinch points
- accommodation building is very large for a temporary building, bigger than many cottages in the area and is noted that elsewhere in the application there is reference to 'permanent residence'
- Nothing to explain what would happen to the 'temporary building' once the 3-year period has expired nor plans for the return of the site to non-residential
- there is no building at all currently on the site.
- The agricultural building is very large and high, will be visible from some distance
- No mention of service provision arrangements such as water, electricity etc
- Should be noted the site is within 50m of the Exmoor National Park Boundary which has a dark skies policy, not clear within the application as to the external lighting arrangements
- regularly use the footpath, temporary electric fencing is currently used to fence off this path when stock is in the field - provision for permanent fencing to protect walkers is not detailed in the application.
- the application details plan for stock to be sent to the local abattoir before returning to the site, a workshop is referenced but does not reference the arrangements or facilities for the storing, butchering, packaging, or selling meat from the premises.
- Object to the scale of planning proposal and its included business
- historically the fields in question have been used for grazing relatively small number of animals - cattle, sheep and horses, the proposal amounts to a change of use for the types of activity going on the fields
- concerned that the new business will greatly increase traffic through Beggearn Huish, the issue of the greater volume is compounded by the fact that neither approach to the property is suitable for large vehicles
- Concerned that the larger vehicles will not be able to access the tight entrance to the fields that the entrance will be enlarged and re-formed by the removal of hedges and trees, any alterations might negatively affect the character of the lane
- proposed building is very large 668sqm., the stated business of grass fed cattle to be supplemented by calf fattening appears inconsistent with the need for such a large building and suggests that the grass fed business will be subordinate to the more intensive calf fattening enterprise

- the laudable aim of lower carbon footprint product in grass fed cattle will do nothing to mitigate the sums of carbon embedded in the proposed construction materials
- concerned the increased number of animals proposed to be farmed, many of which will be penned in the shed will create a great deal of noise, noise generated by a shed full of animals is different to a field of animals at a lower density.
- Inconsistencies and unclear statements - planning statement states no manure will be stored within 250m of any dwelling, map shows that no field is further than 250m away from a dwelling no plan for waste removal or recycling- Q20 claims that no machinery or commercial activities will take place yet included in the proposal is the explicit aim to process, butcher and sell meat, further to this will the enterprise be operating retail sales from the site?
- No objection in principle to an agricultural outbuilding object to this proposal, it is a small holding of approximately 25 acres comprising of 3 fields with 21 acres of pasture
- Access via a steep narrow lane with a sharp access to the site entrance, even refuse lorries do not attempt it
- Sets out animal welfare, whilst important not a planning consideration
- Application is incomplete due to the lack of vehicle movement information
- The approach from the south would go past every property in Beggearn Huish
- The batch numbers will involve a large number of livestock transport vehicles bringing animals in and removing them for sale.
- It is estimated that the beef box business will also generate large numbers of vehicle movements, likely to produce a further 50 vehicle movements per year.
- Large building for a small holding, the size would confirm that the calf rearing not the beef box business is the primary focus
- The proposal and the linked application would turn an open countryside location into a full farm building/residential setting
- No mention of service provision, some mention of a soakaway and tank but details have not been provided
- Exmoor National Park known for dark skies and this should be taken into account
- No mention is made of noise from housing calves
- Use to be part of Beggearn Huish Farm, and used for horses or sheep, the choice of cattle rearing is not appropriate for a small holding where on-site attention is required
- Long access track across an open field, meaning a significant area of grazing would be lost
- The turning and parking will permanently remove this area from agricultural use
- The trees at the road end are saplings not an established feature
- The highways and traffic considerations outweigh the benefits for agriculture
- House and barn on a small acreage of land
- Narrow corners with high stone walls
- Lanes are all narrow and single track and access to the site is very steep with banks either side
- Poor visibility before the access gate to the site
- Increase the amount of traffic
- There is parking on the side of the road

- Potential for structural damage to residential properties
- Increase in heavy vehicles could damage the culvert
- Like to encourage new agricultural activity but unfortunately the proposed location is on a very narrow country lane with blind bends and few passing places which could cause traffic problems
- Proposed 'temporary' log cabin is a substantial building what makes it temporary compared to a non-temporary building?
- Will create a permanent carbon footprint
- There is plenty of 2-bedroom accommodation available locally
- The building should appropriately blend into the environment, there are no other agricultural buildings seen along here
- Should include adequate screening
- Lighting should be minimal to maintain the "dark skies" as a feature of the area
- Disruption to users of the footpath
- Narrow country land with blind bends cause traffic problems and damage to vulnerable lane banks.

Three letters of support making the following comments (Summarised):

- Access into the fields is more than adequate for agricultural vehicles
- The access is single lane which is common for this area of Somerset with the majority of farmland being served by this type of lane. Therefore, building should use most appropriate materials
- As a local farmer who has transported to the site, can confirm there are no issues in accessing the field
- No problems accessing the field.

Appendix 3 – Statutory consultee responses

Nettlecombe Parish Council - At the Monday 10th May meeting of the Nettlecombe Parish Council the 2 applications were considered. Taking into account the views of the Beggearnhuish and Torre residents, who were nearly all against both applications going ahead, and following detailed discussions at the meeting, the NPC members voted against the applications for the following reasons:

- 1) Volume and expected size of traffic in our narrow lanes with an especially difficult pinch point between high walls near the entrance to site on both approaches.
- 2 Very large agricultural building compared to the small area of agricultural land and the number of animals on site at any one time. Large footprint and very high building making it visible for some distance, and from the nearby footpath.
- 3 Questions were asked about the viability of the enterprise.
- 4) There is a lot of detail about farming in the application but nothing about power supply, water supply or where the meat is to be distributed from. No details are shown of facilities to chill or butcher the meat on site. There is a large workshop, but it is not clear what this is to be used for.
- 5) Dwelling is described as temporary, but the application asks for a permanent residence, as the application says it is needed for caring of stock; the timescale is unclear.
- 6) It was pointed out that other applications in the area showed that once the qualifying period expired, the reason for needing the house disappeared, but the dwelling remained. Strict agricultural ties would be required.
- 7) Dwelling is bigger than many cottages.
- 8) Public footpath crossing the land will need adequate strong permanent fencing to protect walkers from inquisitive young cattle and NOT temporary electric fencing
- 9 Initially the night-time noise from each batch of stressed, recently weaned young stock will be disturbing

Highways Development Control - standing advice

SCC - Ecologist - Holding objection, pending further information

The site falls within impact risk zones for Dunster Park Heathlands SSSI and Nettlecombe Park SSSI. Natural England will need to be consulted for perceived impacts.

I believe the size of the site exceeds 0.1ha. I am also slightly concerned about the proposed access track so close to the hedgerow, with regards to any possible badger setts and damage to the root protection zones of the hedge itself.

Therefore, the applicant will be required to commission a Preliminary Ecological Appraisal, which may recommend further surveys and mitigation, as required. Surveys shall be undertaken in accordance with nationally recognised guidelines (BS 42020:2013 Biodiversity - Code of practice for planning and development and CIEEMs Guidelines for Preliminary Ecological Appraisal 2017, with the Ecologist being a member of the Chartered Institute for Ecology and Environmental Management (CIEEM).

This action is required in line with:

- Section 99 of the Government circular 2005/06 on biodiversity and geological conservation states that *'It is essential that the presence or otherwise of protected species, and the extent that they may be affected by the proposed development, is established before the planning permission is granted, otherwise all relevant material considerations may not have been addressed in making the decision.'*
- The Government circular 2005/06 on biodiversity and geological conservation states that *'Use of planning conditions to secure ecological surveys after planning permission has been granted should only be applied in exceptional circumstances.'*
- Natural England advice requires that all developments likely to affect European Protected Species should have surveys carried out to inform the planning decision. They cannot be conditioned. This was confirmed in case law through Woolley v Cheshire East Borough Council and Millennium Estates Limited in 2009.
- Establishing presence of/implications upon protected species/habitats in the National Planning Policy Guidance (NPPG) (<https://www.gov.uk/guidance/natural-environment#biodiversity-and-ecosystems>) and Standing Advice/Gov.uk Guidance (<https://www.gov.uk/guidance/protected-species-how-to-review-planning-applications#when-applicants-need-a-species-survey>)

This consultation response should be recorded as a: **No Objection subject to inclusion of specified condition and informative**

Dear Briony,

An Ecological Appraisal of the application site (for both 3/24/21/003 and 3/24/21/004) was carried out in July 2021 by Quantock Ecology. The results of which are relevant to both applications and inform the conditions that are also valid to both applications:

Habitats:

- The footprint of both buildings will be situated on Poor Semi-Improved Grassland. It was determined that the hedgerow and all of the trees on site will remain physically unaffected by the proposed developments.

Bats:

- Commuting and foraging opportunities only.

Badgers:

- Commuting and foraging opportunities only.

Reptiles:

- The report determines low suitability due to the shortness of the grass. However, if unmanaged suitability will increase.

Recommendations

To comply with local and national policy, wildlife legislation, and the requirements of the mitigation hierarchy and for biodiversity net gain, please attach the following conditions to the planning permission if granted.

Bats

As no bat activity surveys have been submitted, I have to assume the presence of light adverse species. It is unclear if external lighting will be included, if so, the proposals should avoid lighting boundary features, please attach the following condition (if lighting is required):

- Prior to construction above damp-proof course level, a lighting design for bats, following Guidance Note 08/18 Bats and artificial lighting in the UK (ILP and BCT 2018), shall be submitted to and approved in writing by the Local Planning Authority. The design shall show how and where external lighting will be installed (including through the provision of technical specifications) so that it can be clearly demonstrated that areas to be lit will not disturb or prevent bats using their territory. The design should accord with Step 5 of Guidance Note 08/18, including submission of contour plans illustrating Lux levels. All external lighting shall be installed in accordance with the specifications and locations set out in the design, and these shall be maintained thereafter in accordance with the design. Under no circumstances should any other external lighting be installed without prior consent from the Local Planning Authority.

Reason: In the interests of the 'Favourable Conservation Status' of populations of European protected species and in accordance with West Somerset Local Plan to 2032: Policy NH6: nature conservation and the protection and enhancement of biodiversity.

Badgers

Due to the potential for badgers to use the habitat on site the following informative will be attached:

- The developers are reminded of the legal protection afforded to badgers and their resting places under the Protection of Badgers Act 1992 (as amended). It is advised that during construction, excavations, or large pipes (>200mm diameter) must be covered at night. Any open excavations will need a means of escape, for example a plank or sloped end, to allow any animals to escape. In the event that badgers, or signs of badgers are unexpectedly encountered during implementation of this permission it is recommended that works stop until advice is sought from a suitably qualified and experienced ecologist at the earliest possible opportunity.

Reptiles

In order to avoid harm to reptiles the grassland area must be maintained short. Due to the possibility of the grassland growing in the interim period before implementation the following will be conditioned:

- Any vegetation in the construction area should initially be reduced to a height of 10 centimetres above ground level by hand, brushings and cuttings removed and the remainder left for a minimum period of 48 hours of fine warm weather (limited rain and wind, with temperatures of 10°C or above) before clearing to minimise the risk of harming/killing any reptiles that may be present and to encourage their movement onto adjoining land. This work may only be undertaken during the period between March and October. Written notification of the date of the operations will be submitted to the Local Planning Authority prior to the works being undertaken. Once cut vegetation should be maintained at a height of less than 10cm for the duration of the construction period. A letter confirming these operations and any findings will be submitted to the Local Planning Authority.

Reason: In the interests of UK protected and priority species and in accordance with West Somerset Local Plan to 2032: Policy NH6: nature conservation and the protection and enhancement of biodiversity.

Biodiversity Enhancement (Net Gain)

As compensation and enhancement measures, and in accordance with National Planning Policy Framework (NPPF) and draft Environment Bill, please apply the following conditions to any planning permission granted.

- The following will be integrated into the design of the proposal
 - A) Installation of 2x Schwegler No. 10 swallow nesting cups, or similar, to be erected on a main beam of the open side of the barn at a height above 3m and maintained thereafter.
 - B) Provision shall be made for barn owls in the form of a barn owl box, a scheme for the installation, shall be submitted to and approved in writing by the Local Planning Authority. The approved scheme will be implemented and hereafter maintained.
 - C) 1x reptile hibernacula will be created in the retained grassland. Along the north western boundary.

Plans and photographs of the installed features will be submitted to and agreed in writing by the Local Planning Authority prior to first use.

Reason: In accordance with Government policy for the enhancement of biodiversity within development as set out in paragraph 170(d) of the National Planning Policy Framework

Provided the above conditions are applied as worded, I have no objection to this application.

Environmental Health Team - Chased

Rights of Way Protection Officer - I can confirm that there is a public right of way (PROW) recorded on the Definitive Map that abuts the site at the present time (public footpath WL 16/20). The long-distance trail, the Macmillan Way, runs along the adjacent road. I have attached a plan for your information.

The Definitive Map and Statement are legally conclusive of the existence and status of those public rights of way that they show. However, they are not conclusive as to what they omit. Therefore, the fact that a right does not appear either on the Map and Statement, does not necessarily mean that it does not exist.

We have no objections to the proposal, subject to the following:

1 General Comments

Any proposed works must not encroach onto the width of the PROW. The following bold text must be included as an informative note on any permission granted:

Development, insofar as it affects the rights of way should not be started, and the rights of way should be kept open for public use until the necessary Order (temporary closure/stopping up/diversion) or other authorisation has come into effect/ been granted.

- 2 Failure to comply with this request may result in the developer being prosecuted if the path is built on or otherwise interfered with. The health and safety of the public using the PROW must be taken into consideration during works to carry out the proposed development. Somerset County Council (SCC) has maintenance responsibilities for the surface of a PROW, but only to a standard suitable for the public use. SCC will not be responsible for putting right any damage occurring to the surface of a PROW resulting from vehicular use during or after works to carry out the proposal. It should be noted that it is an offence to drive a vehicle along a public footpath, public bridleway, or restricted byway unless the driver has lawful authority (private rights) to do so.

If it is considered that the development would result in any of the outcomes listed below, then authorisation for these works must be sought from Somerset County Council Rights of Way Group:

- A PROW being made less convenient for continued public use.
- New furniture being needed along a PROW.
- Installing any apparatus within or across the PROW
- Changes to the surface of a PROW being needed.
- Changes to the existing drainage arrangements associated with the PROW.
- If the work involved in carrying out this proposed development would:
 - make a PROW less convenient for continued public use; or:-

- create a hazard to users of a PROW, then a temporary closure order will be necessary, and a suitable alternative route must be provided. For more information, please visit Somerset County Council's Rights of Way pages to apply for a temporary closure: <https://www.somerset.gov.uk/roads-and-transport/apply-for-the-temporary-closure-of-a-right-of-way/>

Application No:	3/24/21/004
Parish	Nettlecombe
Application Type	Full Planning Permission
Case Officer:	Briony Waterman
Grid Ref	
Applicant	Mr Sam Moore
Proposal	Erection of 1 No. temporary agricultural workers dwelling
Location	Land north of Beggearn Huish Manor, Washford, 304357, 139755

Recommendation

Recommended decision: Grant

Recommended Conditions

- 1 The building hereby permitted shall be removed and the land restored to its former condition on or before three years from the date of this decision in accordance with a scheme of work that shall be submitted to and approved by the Local Planning Authority prior to those approved works being carried out.

Reason: To ensure the building is used for agricultural purposes related to the barn on the same site.

- 2 The development hereby permitted shall be carried out in accordance with the following approved plans:

(A3) DrNo HTS SMPC R4 Floor Plan and elevations
 (A4) DrNo HTS SMPCC R1 Location Plan as proposed
 (A4) DrNo HTS SMPCDL R1 Location Plan as existing

Reason: For the avoidance of doubt and in the interests of proper planning.

- 3 The occupation of the dwelling shall be limited to a person solely or mainly working, or last working in the locality in agriculture or in forestry, or a widow or widower of such a person, and to any resident dependants.

Reason: The site lies in area where new development is generally restricted to that for which there is a proven need.

- 4 Prior to construction above damp-proof course level, a lighting design for bats, following Guidance Note 08/18 Bats and artificial lighting in the UK (ILP and BCT 2018), shall be submitted to and approved in writing by the Local Planning Authority. The design shall show how and where external lighting will be

installed (including through the provision of technical specifications) so that it can be clearly demonstrated that areas to be lit will not disturb or prevent bats using their territory. The design should accord with Step 5 of Guidance Note 08/18, including submission of contour plans illustrating Lux levels. All external lighting shall be installed in accordance with the specifications and locations set out in the design, and these shall be maintained thereafter in accordance with the design. Under no circumstances should any other external lighting be installed without prior consent from the Local Planning Authority.

Reason: In the interests of the 'Favourable Conservation Status' of populations of European protected species and in accordance with West Somerset Local Plan to 2032: Policy NH6: nature conservation and the protection and enhancement of biodiversity.

- 5 Any vegetation in the construction area should initially be reduced to a height of 10 centimetres above ground level by hand, brushings and cuttings removed and the remainder left for a minimum period of 48 hours of fine warm weather (limited rain and wind, with temperatures of 10°C or above) before clearing to minimise the risk of harming/killing any reptiles that may be present and to encourage their movement onto adjoining land. This work may only be undertaken during the period between March and October. Written notification of the date of the operations will be submitted to the Local Planning Authority prior to the works being undertaken. Once cut vegetation should be maintained at a height of less than 10cm for the duration of the construction period. A letter confirming these operations and any findings will be submitted to the Local Planning Authority.

Reason: In the interests of UK protected and priority species and in accordance with West Somerset Local Plan to 2032: Policy NH6: nature conservation and the protection and enhancement of biodiversity.

- 6 The following will be integrated into the design of the proposal

A. Installation of 2x Schwegler No. 10 swallow nesting cups, or similar, to be erected on a main beam of the open side of the barn at a height above 3m and maintained thereafter.

B. Provision shall be made for barn owls in the form of a barn owl box, a scheme for the installation, shall be submitted to and approved in writing by the Local Planning Authority. The approved scheme will be implemented and hereafter maintained.

C. 1x reptile hibernacula will be created in the retained grassland. Along the north western boundary.

Plans and photographs of the installed features will be submitted to and agreed in writing by the Local Planning Authority prior to first use.

Reason: In accordance with Government policy for the enhancement of biodiversity within development as set out in paragraph 170(d) of the National Planning Policy Framework

- 7 Construction of the barn, granted under 3/24/21/003 shall be completed and the first batch of livestock brought to site prior to the log cabin being erected on site.

Reason: To enable the temporary dwelling to fulfil its need as an agricultural building.

- 8 Prior to the log cabin being brought to site a review of the condition of the land should be submitted to and approved in writing by the Local Planning Authority.

Reason: To ensure after the three year permission has expired the land can be returned to the current position.

Informative notes to applicant

- 1 In accordance with paragraph 38 of the National Planning Policy Framework the Council has worked in a positive and pro-active way and has imposed planning conditions to enable the grant of planning permission.
- 2 The developers are reminded of the legal protection afforded to badgers and their resting places under the Protection of Badgers Act 1992 (as amended). It is advised that during construction, excavations or large pipes (>200mm diameter) must be covered at night. Any open excavations will need a means of escape, for example a plank or sloped end, to allow any animals to escape. In the event that badgers, or signs of badgers are unexpectedly encountered during implementation of this permission it is recommended that works stop until advice is sought from a suitably qualified and experienced ecologist at the earliest possible opportunity.

Proposal

Permission is sought for the erection of 1no. temporary agricultural workers dwelling.

The temporary building complies with the regulations of the Caravan Act to be regarded as a mobile home. It is to be constructed in timber boarding with double Roman tiles. It will measure approximately 20m x 6.2m and is to be located to the south of the hedgerow and north west of the road that runs through Beggearn Huish. Permission is sought for the temporary dwelling to support the establishment of a new farming enterprise.

Site Description

The proposed site lies to the north east of the hamlet of Beggearn Huish, the field is

accessed via an existing field gate. The site is bounded by existing mature hedging and a public right of way begins to at the entrance to the site and runs through the adjacent field.

Relevant Planning History

3/24/21/003 - Erection of an agricultural livestock building with creation of access track from highway - awaiting determination.

Consultation Responses

Nettlecombe Parish Council - Objects

- 1) Volume and expected size of traffic in our narrow lanes with an especially difficult pinch point between high walls near the entrance to site on both approaches.
- 2) Very large agricultural building compared to the small area of agricultural land and the number of animals on site at any one time. Large foot print and very high building making it visible for some distance, and from the nearby footpath.
- 3) Questions were asked about the viability of the enterprise.
- 4) There is a lot of detail about farming in the application but nothing about power supply, water supply or where the meat is to be distributed from. No details are shown of facilities to chill or butcher the meat on site. There is a large workshop but it is not clear what this is to be used for.
- 5) Dwelling is described as temporary but the application asks for a permanent residence, as the application says it is needed for caring of stock; the timescale is unclear.
- 6) It was pointed out that other applications in the area showed that once the qualifying period expired, the reason for needing the house disappeared, but the dwelling remained. Strict agricultural ties would be required.
- 7) Dwelling is bigger than many cottages.
- 8) Public footpath crossing the land will need adequate strong permanent fencing to protect walkers from inquisitive young cattle and NOT temporary electric fencing
- 9) Initially the night time noise from each batch of stressed, recently weaned young stock will be disturbing

Highways Development Control - Standing advice

SCC - Ecologist - : No objection subject to conditions

Following the original holding objection from the Ecology service and Ecological Appraisal was undertaken which recommended the following:

Bats

Prior to construction above damp-proof course level a lighting design for bats is required.

Badgers

Due to the potential for badgers to use the habitat on site the following informative will be attached:

- The developers are reminded of the legal protection afforded to badgers and their resting places under the Protection of Badgers Act 1992 (as amended). It is advised that during construction, excavations or large pipes (>200mm diameter) must be covered at night. Any open excavations will need a means of escape, for example a plank or sloped end, to allow any animals to escape. In the event that badgers, or signs of badgers are unexpectedly encountered during implementation of this permission it is recommended that works stop until advice is sought from a suitably qualified and experienced ecologist at the earliest possible opportunity.

Reptiles

Vegetation reduced to a height of 10cm for 48 hrs in case of reptiles.

Biodiversity Enhancement (Net Gain)

Installation of swallow nesting cups, barn owl box and reptile hibernacula as part of the biodiversity net gain.

Wessex Water Authority - No comments received

Reading Agricultural - An independent appraisal was commissioned and undertaken by Reading Agricultural. The report found that:

- There is an essential need for a dwelling to provide the necessary on-site supervision otherwise the establishment and proper functioning of the business will be severely affected.
- The need relates to a full time worker
- there is clear evidence that the business has been planned on a sound financial basis
- There is no alternative accommodation available either on the holding or in the locality
- This is considered to be sustainable development in a rural area.

Habitats Regulations Assessment

Due to the location of the proposal it is considered that a HRA is not required.

Representations Received

Five letters of objection making the following comments (summarised)

- Traffic - not suitable for lorry access steep and curving road with pinch points
- will therefore use other access going past all properties in Beggearn Huish

- increase in vehicle movements and possibility of vehicles becoming stuck
- no information on vehicle movements
- building - is very large for temporary
- nothing to explain what happens after the 3 years
- currently no buildings at all on the site
- agricultural building is large and high visible from distance
- 50m from Exmoor national park boundary
- footpath provision for permanent fencing to protect walkers is not detailed in this application.
- meatbox sales - application does not reference the arrangements for storing, butchering, packaging or selling of the meat
- little detail is given as to the construction of the dwelling and its suitability for dismantling
- the building is large does it fit the notion of a temporary agricultural dwelling.
- must be considered with application 3/24/21/003
- applies for temporary but references paragraph 79 of the NPPF for a permanent dwelling
- seek clarification of the applicants intentions to the date of removal and the return of the site to non- residential use
- large 2 bedroom bungalow extending to about 136sqm if granted occupancy should be restricted
- applicant states it is 25 acres however it is not all pasture, 3 acres of woodland accordingly only 21 acres of pasture
- road is very narrow and steep with high banks either side
- no reference of traffic to and from the site a large number of vehicle movements is involved which is dangerous given the narrow access
- application states temporary but references permanent residency
- applicants already live near the proposed business
- livestock including cattle currently use the fields with no resident worker on site
- visual impact from across the valley if a building is allowed it should be appropriate materials, sufficient screening and minimal light pollution
- no full dwellings visible in that area only rooftops etc
- Beggearn huish is unusual no new builds for a long time
- this land has only recently been separated from the farm
- whilst it is useful agricultural land i feel it is more useful as sheep/pony pasture rather than for cattle rearing with increasing irregular weather patterns
- proposed barn seems huge for 20 acres
- temporary cabin is a substantial building with all mod cons, what makes it temporary compared to non temporary?
- There are plenty of 2 bedroom accommodation available locally
- all roads are single traffic and don't generally get through traffic

Two letters of support making the following comments (Summarised):

- confirm the access into the fields is more than adequate for agricultural vehicles
- whilst the access is single lane this is common for this area of Somerset.

Planning Policy Context

Section 38(6) of the Planning and Compulsory Purchase Act 2004 requires that applications are determined in accordance with the development plan unless material considerations indicate otherwise.

The development plan for the West Somerset planning area comprises the West Somerset Local Plan to 2032, retained saved policies of the West Somerset District Local Plan (2006) Somerset Minerals Local Plan (2015) and Somerset Waste Core Strategy (2013).

Relevant policies of the development plan are listed below.

West Somerset Local Plan to 2032

OC1	Open Countryside development
SD1	Presumption in favour of sustainable development
EC11	Agriculture

Retained saved policies of the West Somerset Local Plan (2006)

OC1	Open Countryside development
SD1	Presumption in favour of sustainable development
EC11	Agriculture

Determining issues and considerations

The main considerations in determining this application is the need for an agricultural workers dwelling, the impact upon the visual amenity and highways.

Principle

The site lies within the open countryside as such policy OC1 is considered relevant. The policy states that development is not generally appropriate and will only be permitted where such a location is essential for a rural worker engaged in agricultural employment, where permission is granted consideration would be given to this being initially made on a temporary basis. Paragraph 84 of the National Planning Policy Framework (NPPF) states that planning decisions should enable growth and expansion of all types of business in rural areas and the development of agricultural rural businesses. The proposal based on the use of a temporary dwelling to support the cattle rearing on the site is considered acceptable in principle to support a new and untested agricultural enterprise.

Agricultural Appraisal.

The Council commissioned an independent Agricultural Appraisal to be undertaken by Reading Agricultural Consultants (RAC) in response to the number of objections raised. RAC found the proposals had changed since the application was submitted with more land being available to the applicants from April 2022 of approximately 172 acres with the potential for a further 50 acres which would increase herd capacity from 22 to around 200. The appraisal found that based on the increased numbers over the three year period the holding would be treated as a full time holding to support a full time employee. The report concludes that based on the increase in land and herd sizes the size of the barn is appropriate and based on the evidence submitted and informed expansion plan it is considered that there would be an essential need for on-site accommodation for one key worker in accordance with the PPG and Local Plan Policy OC1.

Viability

The application is accompanied by an agricultural appraisal prepared by Acorus, a recognised agricultural consultancy, setting out their clients functional and economic need for a new dwelling in association with the animal welfare of the new farming business they are seeking to establish. The dwelling would be a superior log cabin style dwelling, initially on a temporary three year period, to provide opportunity for the applicants to demonstrate a viable agricultural enterprise, in accordance with Policy OC1. This is accepted by your officers.

Highways

Within the planning statement the agent details the traffic movements and after seeking clarification on the meatboxing elements of the proposal it was confirmed that there would be no daily visitors to the site with the butchering, cutting, packaging and sorting being done off site and returned for wholesale distribution.

Whilst the lanes surrounding the site are narrow the existing agricultural vehicular access provides good visibility for exiting traffic and the proposed yard area will be sufficient to ensure vehicles are able to park and turn and exit the site in a forward direction. There are no alterations proposed to the existing entrance and a consolidated track will run from east to west which will be porous to allow for surface water to soak away into the field. The proposal is therefore considered not to have a significant impact upon the highway network.

Impact on visual amenity

The proposed temporary building is a single storey log cabin with a tiled roof which satisfies the legislation under the Caravan Act in terms of size, and ability to be moved/dismantled.

The land slopes away towards the Washford River and is well screened from the north west by the existing tree and hedges, likewise the views towards the site from

Beggearn Huish will be interrupted by the existing trees and hedging it is therefore considered that due to the location, the use of materials and the natural landscaping that would be no significantly adverse impact upon the visual amenity of the area.

Comments

Comments received from the Parish Council can be broken down into the following sections.

1. Traffic - concerns over the lanes and volume and size of the traffic, no objections have been raised by the Highway Authority over the establishment of a farming business based in this location given that the site will be accessed via an existing field gate.
2. Agricultural building - this comments cannot be considered with this application for the temporary building although it is noted the applications are linked
3. Viability - covered above
4. Details - the provision of water is not a material planning consideration in relation to the meat box business that has been covered above.
5. Temporary nature - the application is for a temporary building, conditions have been included reiterating the use as temporary for those employed in agriculture.

Conclusion

It is recommended that planning permission be granted based on the positive assessment from Reading Agricultural Consultants who were appointed by the Local Planning Authority and the provision within policy for a temporary agricultural workers dwelling. The access is considered acceptable and there is not a significant impact upon the landscape amenity of the area.

In preparing this report the planning officer has considered fully the implications and requirements of the Human Rights Act 1998.

Application No:	3/37/21/006
Parish	Watchet
Application Type	Outline Planning Permission
Case Officer:	Abigail James
Grid Ref	
Applicant	Mr Vincent
Proposal	Application for Outline Planning Permission with all matters reserved, except for access, for the erection of 1 No. dwelling
Location	Land Between Beverley Drive and Goviers Lane, Watchet, TA23 0DF

Recommendation

Recommended decision: Grant

Recommended Conditions

- 1 Approval of the details of the layout, scale, appearance and landscaping of the site (hereinafter called 'the reserved matters') shall be obtained from the Local Planning Authority in writing before any development is commenced.

Application for approval of the reserved matters shall be made to the Local Planning Authority not later than the expiration of two years from the date of this permission. The development hereby permitted shall be begun not later than the expiration of two years from the approval of the reserved matters, or, in the case of approval on different dates, the final approval of the last such matter to be approved.

Reason: This is an outline permission and these matters have been reserved for the subsequent approval of the Local Planning Authority, and as required by Section 92 of the Town and Country Planning Act 1990 (as amended).

- 2 The development hereby permitted shall be carried out in accordance with the following approved plans:

(A4) Site Location Plan
 (A4) Outline Site Plan
 (A3) DrNo 5459/E/01 Access Arrangements

Reason: For the avoidance of doubt and in the interests of proper planning.

- 3 Prior to construction above damp-proof course level, a lighting design for bats, following Guidance Note 08/18 Bats and artificial lighting in the UK (ILP and BCT 2018), shall be submitted to and approved in writing by the Local Planning

Authority. The design shall show how and where external lighting will be installed (including through the provision of technical specifications) so that it can be clearly demonstrated that areas to be lit will not disturb or prevent bats using their territory. The design should accord with Step 5 of Guidance Note 08/18, including submission of contour plans illustrating Lux levels. Lux levels should be below 0.5 Lux on the identified horseshoe bat commuting routes. All external lighting shall be installed in accordance with the specifications and locations set out in the design, and these shall be maintained thereafter in accordance with the design. Under no circumstances should any other external lighting be installed without prior consent from the Local Planning Authority.

Reason: In the interests of the 'Favourable Conservation Status' of populations of European protected species and in accordance with Policy NH6 of the Local Plan and the Framework

- 4 No removal of hedgerows, trees or shrubs or works to or demolition of buildings or structures shall take place between 1st March and 30th September inclusive, unless a competent ecologist has undertaken a careful, detailed check for active birds' nests immediately before the vegetation is cleared or works to or demolition of buildings commences and provides written confirmation that no birds will be harmed and/or that there are appropriate measures in place to protect nesting bird interest on site. Any such written confirmation should be submitted to the Local Planning Authority by the ecologist accompanied by dated photos showing the site before and after clearance. In no circumstances should netting be used to exclude nesting birds.

Reason: In the interests of nesting wild birds and in accordance with policy Policy NH6 of the Local Plan and the Framework.

- 5 Any vegetation in the construction area should initially be reduced to a height of 10 centimetres above ground level by hand, brushings and cuttings removed and the remainder left for a minimum period of 48 hours of fine warm weather (limited rain and wind, with temperatures of 10°C or above) before clearing to minimise the risk of harming/killing any reptiles that may be present and to encourage their movement onto adjoining land. Written notification of the date of the operations will be submitted to the Local Planning Authority prior to the works being undertaken. Once cut vegetation should be maintained at a height of less than 10cm for the duration of the construction period. A letter confirming these operations and any findings will be submitted to the Local Planning Authority by the ecologist responsible.

Reason: In the interests of UK protected and priority species and in accordance with Policy NH6 of the Local Plan and the Framework

- 6
 - One Vivara Pro Woodstone Nest Box (32mm hole version) or similar shall be mounted between 1.5m and 3m high on the northerly facing aspect of a tree or a similar structure to be agreed in writing by the LPA and maintained thereafter.

- One Vivara Pro Barcelona Woodstone Bird Box (open front design) or similar shall be mounted between 1.5m and 3m high on the northerly facing aspect of a tree or a similar structure to be agreed in writing by the LPA and maintained thereafter.
- Installation of one insect hotel (National Trust Apex insect House or similar), shall be installed on the southern or eastern boundary, the position to be agreed in writing by the LPA and maintained thereafter.

Photographs of the installed features will be submitted to the Local Planning Authority prior to first occupation of the development.

Reason: In accordance with Government policy for the enhancement of biodiversity within development as set out in paragraph 174(d) of the National Planning Policy Framework

- 7 The parking area as shown on the Proposed Site Plan shall be constructed and made good prior to occupation of the dwelling.

Reason: To ensure that there is a satisfactory off street parking for the dwelling.

- 8 Prior to occupation of the building, works for the disposal of sewage and surface water drainage shall be provided on the site to serve the development, hereby permitted, in accordance with details that shall previously have been submitted to and approved in writing by the Local Planning Authority. The works shall thereafter be retained and maintained in that form.

Reason: To ensure the adequate provision of drainage infrastructure.

- 9 Prior to first occupation of the development hereby permitted the provision of facilities for the charging of electric vehicles shall be provided on site in accordance with details to be submitted to and approved in writing by the Local Planning Authority and maintained thereafter.

Reason: In the interests of securing sustainable development.

- 10 Cycle storage facilities details of which shall have been submitted to and approved in writing by the Local Planning Authority shall be fully available prior to the development being first occupied and shall be maintained thereafter for those purposes.

Reason: To ensure that adequate facilities are included for bikes, in the interests of sustainable transport.

Informative notes to applicant

- 1 The developers and their contractors are reminded of the legal protection

afforded to bats and bat roosts under legislation including the Conservation of Habitats and Species Regulations 2017. In the unlikely event that bats are encountered during implementation of this permission it is recommended that works stop, and advice is sought from a suitably qualified, licensed and experienced ecologist at the earliest possible opportunity.

- 2 In accordance with paragraph 38 of the National Planning Policy Framework the Council has worked in a positive and pro-active way and has imposed planning conditions to enable the grant of planning permission.

Proposal

Application for Outline Planning Permission for the erection of 1 No. 2 bedroom dwelling, all matters reserved except for access.

Site Description

The site is located to the north of Almyr Terrace and to the south east of Sea View Terrace. It is accessed from Beverley Drive. Goviers lane is located further West. A stone wall, approximately 1.6m high forms the southern boundary between the site and Alymr Terrace. The site is a rectangular patch of land that forms part of a row of mixed garden/garage/parking areas. Almyr Terrace is a terrace of houses with stone walls, slate roofs and small front gardens with a narrow access from South Road. Sea View Terrace consists of a number of properties with render walls and slate roofs.

Relevant Planning History

Opposite the application site and adjacent to Sea View terrace, planning permission has been granted for the erection of three dwellings, originally in 2007, with a new permission granted in 2010 under reference 3/37/10/018.

At this site planning application 3/37/12/036 for the erection of one two-storey three bedroom house was refused at planning committee on the 28/09/2012 for the following reason:

“The proposed dwelling would be located 18 metres from the front elevation of properties in Almyr Terrace. Due to the height of the proposed dwelling and proximity to the front of Alymr Terrace the proposed dwelling would result in an overbearing impact on the occupants of the dwellings in Alymr Terrace to the rear of the proposed dwelling (Numbers 15 – 17). As such it is considered that the proposal does not accord with Policy BD/2 of the West Somerset District Local Plan which requires that the siting of new buildings has regard to its relationship with adjoining

buildings.”

The decision was appealed (appeal reference:APP/H3320/A/13/2193879) and dismissed. The inspector concluded:

“...Whilst the proposed dwelling has been designed in a chalet style with low eaves, the overall height would not be markedly different to that of properties in Almyr terrace. These matters do not lead me to conclude differently in relation to the harm identified above.

10.I noted on my site visit a pair of single storey semi-detached bungalows sited in close proximity Almyr Terrace. Their different relationship with Almyr Terrace in that they are sited end on rather than front to rear, in conjunction with their lower ridge heights mean they are not directly comparable to the scheme before me. There are also a number of garage/outbuildings located on the land to the front of Almyr Terrace but these are sited closer to Beverley Drive than the proposed dwelling and are single storey, low level buildings. Consequently I afford these matters limited weight.

11.Taking the above points together the proposal therefore conflicts with saved policy BD/2 of the West Somerset Local Plan (1998) which requires the siting of new development to have regard to its relationship with adjoining buildings and open spaces. Local Plan policy BD/2 accords with the core planning principle of securing a good standard of amenity for all existing and future occupiers of land set out in the National Planning Policy Framework (Framework).”

Officer comment: The inspector did not find that the principle of the proposal was unacceptable. It was the detailed design that was found to cause amenity impacts for the properties at Almyr Terrace.

Representations Received

15 representations were received which raised concerns regarding:

- Inappropriate development/size of property disproportionate to the space available
- Amenity – visual/privacy/noise/overshadowing & loss of light.
- Access
- Traffic
- Parking
- Environment
- Trees
- Ecology
- Loss of green space
- Character
- Conservation Area and Listed Buildings
- Issues with statements made in Design and Access Statement

- Various issues with detail of plans
- Drainage
- Street lighting

1 further representation was made by Watchet Conservation Society which raised concerns regarding:

- Effect on listed buildings
- The private road and parking
- Foul waste and sewerage

Consultation Responses

Watchet Town Council - Committee stands by its comments made previously on planning application 3/37/12/036 detailed below:

Although that application was for the erection of one two-storey three-bedroom house and the design and access statement shows a two-bedroom house on this application, it is unclear how many stories are actually proposed.

The Committee strongly object to this application:

- We are fully supportive of the Somerset County Council Highways' comments and feel that this development and any terrace development on this side of the lane would be over-development of the site.
- The Committee feels strongly that acceptance of this application may encourage further development therefore creating a separate terrace between Almyr Terrace and Seaview Terrace which the Committee feel is totally unacceptable.

The Committee also endorses the reasons for refusal from the Planning Authority after Appeal by the applicant as follows:

The proposed dwelling would be located 18 metres from the front elevation of properties in Almyr Terrace. Due to the height of the proposed dwelling and proximity to the front of Almyr Terrace the proposed dwelling would result in an overbearing impact on the occupants of the dwellings in Almyr Terrace to the rear of the proposed dwelling (Numbers 15 – 17). As such it is considered that the proposal does not accord with Policy BD/2 of the West Somerset District Local Plan which requires that the siting of new buildings has regard to its relationship with adjoining buildings.

Committee's Considerations:

Character of the area

Curtilage of Listed Building

Boundary of Conservation Area

Overbearing development

Overlooking of neighbouring properties

Highway safety

Parking issues

Loss of amenity area

The Committee also support the Watchet Conservation Society concerns on the previous application which cited the impact of the neighbouring grade 2 listed Sea View Terrace, and share Somerset County Council Highways' concerns that right of

access over the private road had not been demonstrated.

Wessex Water Authority – Holding objection.

Highways Development Control – Standing Advice.

The red line of the application site does not extend to a public adopted highway therefore means of access has not been established and it is not clear if the Applicant has access rights in perpetuity over the private road.

SCC - *Ecologist* - Quantock Ecology undertook a Preliminary Ecological Assessment of Land Between Beverley Drive and Goviers Lane in July 2021.

Site Description

The site is detached garden comprising of lawns, occasional shrubs and a wooden shed, all enclosed by fences and walls.

The site is located within the town of Watchet, Somerset, immediately surrounded by residential housing and gardens. The local area is dominated by the town, beyond which is the Severn Esuary to the north (~300m) with its marine and intertidal habitats. Open countryside is found ~500m-1km from the site in all directions. This is mainly dominated by pastoral and arable farmland, along with occasional rivers, small woodlands and unimproved grassland features.

Desk Study

A review of the MAGIC database suggests there are two statutory designated sites located within a 2km search area:

Blue Anchor to Lilstock Coast Site of Special Scientific Interest (SSSI) ~350m north of the site at its closest. Of national value –notified for its' geological interest.

Cleeve Hill Site of Special Scientific Interest (SSSI) ~1.3km west of the site. Of national value – “Cleeve Hill supports a rich and diverse calcareous grassland community with associated mixed woodland and scrub. The site contains two species of plant which are nationally rare in Great Britain”. – Taken from the Natural England citation.

The MAGIC database also shows a number of priority habitats present within the 2km search area. These include strips of mudflats ~350m north of the site, along with occasional maritime cliff habitats (the closest being ~650m west). Grassland habitats include a number of lowland calcareous grasslands from west ~650m to the west, two large strips of coastal floodplain grazing marsh (~1km west and 1.4km east), and a single block of good quality semi-improved grassland ~750m southeast. Regular small patches of deciduous woodland are also scattered across the search area, of which the closest is ~250m southwest of the site.

The MAGIC database suggests there are no granted European Protected Species Mitigation Licences present within 2km of the site.

Habitats

The site is a detached lawned garden, surrounded by walls and fences. A dilapidated wooden shed is present in the west. The following habitats/features

have been identified as being present on site:

Amenity Grassland: _

The majority of the site is comprised of a species poor lawn, mown short (to ~3cm). This is dominated by grasses such as common bent *Agrostis capillaris* and occasional cocksfoot *Dactylis glomerata*, along with common herbs such as abundant dandelion *Taraxacum* agg. and white clover *Trifolium repens*, occasional greater plantain *Plantago major* and rare spotted medick *Medicago arabica*.

Introduced Shrub:

Various garden shrubs are present around the edge of the lawn, with species including lilac *Syringa vulgaris* and ornamental rose *Rosa* sp. bushes, along with single small hawthorn *Crataegus monogyna* and elder *Sambucus nigra* shrubs.

Buildings: _

A small wooden shed is present in the west, in poor condition. This is of a simple construction, with single layered wooden walls and a pitched bitumen roof to ~2m high. Large holes are present in the side, with the shed being somewhat dilapidated.

Fences and Walls:

The site is enclosed by fences and walls on three sides. In the west the boundary is a simple wooden boarded fence, with little ecological interest. In the south this is a wall, with occasional ivy *Hedera helix* growth, but little other vegetation. In the east the boundary is made up of a wire fence, covered by a narrow band of plants such as Red valerian *Centranthus ruber*, bramble *Rubus fruticosus* agg., hogweed *Heracleum sphondylium*, large bindweed *Calystegia silvatica* and false oat grass *Arrhenatherum elatius*.

Hedgerow – species poor: _

A small section of single species (Wilson's honeysuckle *Lonicera nitida*) hedgerow is present in the north.

Protected Species

Amphibians

No ponds are present on site. Habitats are predominantly closely managed, and rather exposed: with little suitability for amphibians.

Badger

No evidence of badgers recorded on site, such as latrines, sett holes, runs etc. The site is rather cut off and surrounded by walls and fences on most sides preventing access to badgers.

Bats

No suitable features for roosting bats were found in the shed on site. No good

foraging habitats are present either. However, there is potential for some bats to commute across the site, should any roosts be present within nearby houses, and some foraging may occur around the general area.

Barn Owl

The site is located within a town away from suitable habitat for barn owls.

Birds

No evidence of nesting birds was noted within the shed or shrubs present on site. However, these may be utilised by breeding birds during the nesting season.

Dormice

The site is located within a town with no suitable habitat present for dormice

Invertebrates

The site does not offer habitat to support large populations of rare and/or protected invertebrates. Floral assemblages are poor. It does, however, offer limited potential for more generalist species within the grassland and small hedge.

Otter/Water Vole

No suitable habitat is present on site. There are no rivers nearby to support otter or water vole populations.

Reptile

The site is closely maintained with only negligible habitat present for reptiles. Suitability could improve if the site were allowed to grow up in the future, although the likelihood of reptile colonisation is very limited.

Based on the above, conditions have been recommended.

Habitats Regulations Assessment

Not applicable to this area.

Planning Policy Context

Section 38(6) of the Planning and Compulsory Purchase Act 2004 requires that applications are determined in accordance with the development plan unless material considerations indicate otherwise.

The development plan for the West Somerset planning area comprises the West Somerset Local Plan to 2032, retained saved policies of the West Somerset District Local Plan (2006) Somerset Minerals Local Plan (2015) and Somerset Waste Core Strategy (2013).

Relevant policies of the development plan are listed below.

West Somerset Local Plan to 2032

SD1	Presumption in favour of sustainable development
SC1	Hierarchy of settlements
NH1	Historic Environment

Determining issues and considerations

At this stage only the principle of development and access to the site is being considered. Design, landscaping, scale and layout are all Reserved Matters to be determined at a later stage.

Policy SD1, advises that there should be a presumption in favour of sustainable development and that proposals should be considered on economic, social historic and natural environmental conditions in the area.

The site lies within the established residential area of Watchet. Policy SC1.4. allows for development within or in close proximity (within 50 metres) to the contiguous built-up area of Minehead/Alcombe, Watchet, Williton and primary and secondary villages will only be considered where it can be demonstrated that:

- A. It is well related to existing essential services and social facilities within the settlement, and;
- B. There is safe and easy pedestrian access to the essential services and social facilities within the settlement, and;
- C. It respects the historic environment and complements the character of the existing settlement, and;
- D. It does not generate significant additional traffic movements over minor roads to and from the national primary and county highway route network, and;
- E. It does not harm the amenity of the area or the adjoining land uses.

The site is well located within the built-up area of Watchet and relates well to existing essential services and social facilities easily accessed by foot.

Whilst there are Grade II listed buildings on the Watchet Conservation Area boundary located approximately 25 metres north east of the site, there is a variety of architectural styles within the immediate area, including 1960s bungalows, garages and a modern courtyard terrace. This application is for a single dwelling that will be located immediately adjacent to a neighbouring bungalow. The proposed dwelling will be seen in this context as a natural extension of the existing built development in the area. The indicative layout illustrates that the size of the dwelling would sit comfortably within the site and would respect the existing building line. It is considered that at reserved matters stage a bungalow could be designed to assimilate with the mix of architectural styles in the surrounding area.

The indicative layout of the proposal illustrates that it will conform to the adjacent building line. The Design and Access Statement states that an appropriate separation distance, of approximately 20 metres from the rear wall of the proposed development and the buildings of Almyr Terrace. This includes an existing and visually significant, 1.6m high, stone wall which forms the boundary of the site and runs the length of Almyr Terrace. This separation distance is considered acceptable and would not harm the amenities of the occupiers of Almyr Terrace. Given that the property would be a bungalow, it is unlikely that at a distance of 20 metres from Almyr Terrace would lead to a sense of overbearingness or loss of light. Further, given the existing wall and as the indicative plans show the property would be a bungalow, it should not lead to inappropriate overlooking into neighbouring properties. As this application is an outline application with all matters reserved except for access, it would be for the appellant to demonstrate at reserved matters stage that the proposed development was appropriately designed to avoid or mitigate any amenity impacts arising. The application can be refused at reserved matters stage if the design is not satisfactory.

In terms of highways impact, it is considered unlikely that traffic generation from one two bed property would generate significant additional traffic movements over minor roads to and from the national primary and county highway route network and it is therefore considered acceptable in highways terms.

It should be noted that a previous application (ref. 3/37/12/036) for a dwelling at this site was refused and subsequently appealed (ref. APP/H3320/A/13/2193879). It was dismissed based on design issues. The principle of the application was acceptable, and this remains to be the case. The Inspector's conclusion, whilst slightly ambiguous, suggested that this site could accommodate a dwelling of an appropriate design and height.

Access

Access to the site is off Beverley Drive and the private lane that serves Sea View Terrace. The site plan clearly shows that two off-street parking spaces will be provided for the dwelling. It has been noted that the red line does not extend to the end of Sea View Terrace because this is a private track. However, issues regarding rights of access are a civil matter. As this access is existing, it would be suitable for use by cars associated with the proposed development.

The Somerset County Council Parking Strategy 2013 defines this area as Zone B, for which there should be 2 parking spaces provided for a 2 bed property. 2 parking spaces have been provided, which is acceptable. 1 cycle space per bedroom would be expected to be provided, which can be conditioned.

The Environment, Trees, loss of green space and Ecology

At full application stage, materials chosen for the build of the property would be expected to be in the best interests of the environment.

The Council's Tree Officer would be consulted at reserved matters stage.

The Council's Ecological Officer has deemed the application acceptable subject to conditions.

'Whilst it is regrettable that an open area of grass and shrubs will be lost. In accordance with the NPPF Paragraph 11 "applications for planning permission must be determined in accordance with the development plan, unless material considerations indicate otherwise." The area of land has been assessed by Quantock Ecology and the Council's Ecological Officer and no material reason has been brought forward as to why this area of land should not be developed.'

Additionally, it was clear from a site visit that this area of land is not used as an amenity area.

Issues with statements made in Design and Access Statement

The LPA makes their own assessment based on all the information provided both by residents and the agent, a site visit and replies from consultees.

Various issues with detail of plans

Applications for outline planning permission seek to establish whether the nature of a proposed development would be acceptable to the local planning authority, before a fully detailed proposal is put forward. This type of planning application allows fewer details about the proposal to be submitted. If outline permission has been granted, the applicant will be required to ask for approval of the details ("reserved matters") before work can start.

Drainage

Details of drainage can be requested by way of condition.

Issues relating to main sewerage and in particular a valid deed of easement across land to connect to foul sewerage is a civil matter.

The holding objection from Wessex Water is noted, but at this stage the layout remains a reserved matter.

Street lighting

The existing street lighting situation is considered to be acceptable.

Noise

Unfortunately, noise is likely to arise as a result of building works. Any noise as a result of occupiers of the development would be equivalent to other noise arising from other residential homes in the area.

In light of the above assessment, it is recommended that outline planning permission be granted subject to further details, including a careful design, pending for reserved matters stage.

In preparing this report the planning officer has considered fully the implications and requirements of the Human Rights Act 1998.

38/21/0222

MR D STUTT

Demolition of garage and erection of two storey extension to the side of 2 Glenthorne Road, Taunton

Location: 2 GLENTHORNE ROAD, TAUNTON, TA2 7PP

Grid Reference: 322960.125578

Full Planning Permission

Recommendation**Recommended decision: Refusal**

- 1 The proposed extension, by virtue of its design and lack of subservience, appears as an incongruous addition to the street scene, detracting from the character and visual amenity of the area. The proposed extension would be harmful to the character of the dwelling and have an unacceptably harmful impact on the street scene. As such it would be contrary to Policy DM1 of the Taunton Deane Core Strategy and Policy D5 of the Sites Allocations and Development Management Plan.

Recommended Conditions (if applicable)

Notes to Applicant

- . In accordance with paragraph 38 of the National Planning Policy Framework the Council has worked in a positive and pro-active way with the applicant and has looked for solutions to enable the grant of planning permission. However in this case the applicant was unable to satisfy the key policy test and as such the application has been refused.

Proposal

The proposal seeks to demolish the existing attached garage and replace it with a two storey extension. This will comprise of a garage at ground floor level with accommodation above. The proposed extension will project 3.4m from the side gable of the property and extend back 6.65 metres. The front of the extension is shown to have a gable fronting onto Glenthorne Road. Materials will match the existing property.

Site Description

Glenthorne Road is a short cul de sac with three pairs of semi detached two storey properties to the north that are all fairly uniform in design and alignment. The properties are finished in brick under a slate roof. Each property has a two storey flat roof bay to the front that have a porch alongside around the front door. 2 Glenthorne Road has a lean to garage to the side with a staggered parapet roof to the front. The garage sits forward to the main elevation of the dwelling. The neighbouring property, 4 Glenthorne Road has two pitched roof dormers at the front, a flat roof dormer to the rear and a lean to garage to the side

Relevant Planning History

38/13/0361 Erection of a two storey side extension Approved (Now lapsed)

Consultation Responses

SCC - TRANSPORT DEVELOPMENT GROUP - Standing advice

Habitats Regulations Assessment

Not applicable

Representations Received

Five letters of support have been received stating the extension would be in keeping with the existing and the surroundings, a number of properties in the street have been altered and planning permission was granted for the same development in 2013.

Planning Policy Context

Section 38(6) of the Planning and Compulsory Purchase Act 2004 requires that applications are determined in accordance with the development plan unless material considerations indicate otherwise.

The development plan for Taunton Deane comprises the Taunton Deane Core Strategy (2012), the Taunton Site Allocations and Development Management Plan (2016), the Taunton Town Centre Area Action Plan (2008), Somerset Minerals Local Plan (2015), and Somerset Waste Core Strategy (2013).

Relevant policies of the development plan are listed below.

DM1 - General requirements,
D5 - Extensions to dwellings,

Local finance considerations

Community Infrastructure Levy

Not payable in this instance.

Determining issues and considerations

The main issues in the determination of this application are the impact on visual and residential amenity. The policies against which it will be considered are D5 (Extensions to dwellings) of the Taunton Deane Adopted Site Allocations and Development Management Plan 2016 (SADMP) and DM1 (General requirements) of the TDBC Adopted Core Strategy (CS) 2011-2028.

Policy DM1 of the (CS) requires proposals for new development to, amongst other things, ensure that the appearance and character of any street scene would not be unacceptably harmed. In addition, Policy D5 A. of SADMP permits extensions provided they do not harm the form and character of the original dwelling and are subservient to it in scale and design.

It is acknowledged that the existing garage is set forward of the main elevation of the dwelling and has a staggered parapet to the front, which is out of keeping with the character of the street. The application proposes the demolition of the garage to allow for the extension.

The street currently has a sense of uniformity, with the front elevations of the houses all on a similar alignment with the front elevation punctuated by two storey flat roof bay windows and mono-pitched porches. The proposed first floor extension would result in a two storey projecting structure along side the main elevation. It would appear as a significant addition to the property and would increase both its bulk and scale. In doing so it would emphasis the difference in setback between the main elevation and the extension, resulting in an appearance which would harm the form and character of the original building.

.It is acknowledged that other properties in the street have been altered, some by way of the introduction of dormers in the roof space, however the original roofline is still clearly visible. The proposal introduces a gable above the first floor extension which disrupts the roofline. The extension would appear in stark contrast to the neighbouring dwellings, extending the existing elevation and introducing a design which would appear out of keeping with its surroundings.

The Draft Design Guide 5.15 indicates side extensions should be set back to reduce impact and retain character of the original dwelling

It is unlikely there would be a greater impact in terms of overlooking or loss of privacy to nearby properties.

Planning permission was granted for the same extension in 2013 (now lapsed). However since that time new policies have been introduced with the adoption of the

SADMP (2016) and the publication of the Draft Design Guide.

Representations have been received in support of the proposal. However for the reasons set out above, the proposal is not considered to be in keeping, the previous approval has lapsed and the application has been assessed against current policies and guidance.

For the reasons set out above the application is recommended for refusal.

In preparing this report the planning officer has considered fully the implications and requirements of the Human Rights Act 1998.

Contact Officer: Denise Grandfield

MS WIDE

Change of use of live/work unit to ancillary accommodation at 6 Luscombe Road, Cotford St Luke (retention of works already undertaken)

Location: 6 LUSCOMBE ROAD, COTFORD ST LUKE, TAUNTON, TA4 1EB

Grid Reference: 317226.127475 Retention of Building/Works etc.

Recommendation

Recommended decision: Conditional Approval

Recommended Conditions (if applicable)

1. The development hereby permitted shall be begun within three years of the date of this permission.

Reason: In accordance with the provisions of Section 91 Town and Country Planning Act 1990 (as amended by Section 51(1) of the Planning and Compulsory Purchase Act 2004).

2. The development hereby permitted shall be carried out in accordance with the following approved plans:

(A2) DrNo 05 Proposed Plans & Elevations
(A4) DrNo 01 Location Plan
(A4) DrNo 02 Block Plan

Reason: For the avoidance of doubt and in the interests of proper planning.

3. The building hereby permitted shall not be occupied at any time other than for purposes ancillary to the residential use of the dwelling currently known as 6 Luscombe Road.

Reason: To prevent the building being occupied separately to the main dwelling.

Notes to Applicant

1. In accordance with paragraph 38 of the National Planning Policy Framework

the Council has worked in a positive and pro-active way and has imposed planning conditions to enable the grant of planning permission.

Proposal

Outline permission was granted in 2018 for the erection of 30 No. dwellings with 3 No. live/work units, details of which were approved under reserved matters application 53/18/0005.

6 Luscombe Road is one of the 3 properties with a live/work unit and retrospective planning permission is sought to change the use of a live work unit to ancillary accommodation. There are no proposals to change the building either externally or internally.

Site Description

6 Luscombe Road is a large detached property on the corner of Luscombe Road facing the highway. The property straddles the settlement limits of Cotford St Luke. To the south of the main dwelling is the detached 2 storey garage/live/work building. On the ground floor is a double garage with parking in front. An entrance door at the front provides access to internal stairs leading to the open plan live/ work unit above which has a kitchenette, shower room and toilet, all installed by the housing developer before the owner bought the property.

Relevant Planning History

53/16/0012 - Outline planning application with all matters reserved, except for access, for a residential development of up to 30 No. dwellings, 3 No. live/work units, public open space, landscaping and associated highways, engineering and infrastructure works. Conditionally approved June 2018.

53/18/0005 - approval of reserved matters for outline application 53/16/0012 - Conditionally approved October 2018.

Consultation Responses

COTFORD ST LUKE - No comments received.

SCC - ECOLOGY - No comments received.

SCC - TRANSPORT DEVELOPMENT GROUP - No observations to make.

ECONOMIC DEVELOPMENT - No comments received.

STRATEGY - In my view there are no policy grounds/defendable justification for refusing the application.

Policy CP2 states:

“Proposals which lead to the loss of existing or identified business, industrial or warehousing land to other uses, including retail, will not be permitted unless the overall benefit of the proposal outweighs the disadvantages of the loss of employment or potential employment on the site.”

In this case the employment floorspace is a live/work unit ancillary to 6 Luscombe Road. The nature and intention of a live/work unit is that it is used by the occupier of the residential unit (potentially with limited employer/visitors) so for the floorspace to ever be used as employment floorspace is entirely dependent on the occupation of the residential occupier. This is in contrast to an employment unit, such as one that may be located on a business/industrial estate, which would offer an opportunity to a much wider range of businesses due to access for deliveries, parking and co-location with other businesses. A live/work unit therefore offers fewer employment opportunities than a purpose-built employment unit.

When balanced against the benefits of additional living accommodation and potentially fewer car movements, the loss of the live/work unit is not considered to cause unacceptable harm. Furthermore, the additional living accommodation could easily be utilised as an office in a 'working from home' scenario maintaining the nature of a B1 use.

Policy SP1 states:

"Minor Rural Centres are identified as Cotford St Luke, Creech St Michael, Milverton, North Curry and Churchinford. New housing development at these locations will include an appropriate balance of market and affordable housing together with some live-work units and will be small scale allocations, sites within the development boundary (primarily on previously developed land) and sites fulfilling affordable housing exceptions criteria outside of development boundaries."

This policy was used as a justification in the decision to allow live/work units in place of the Policy MIN1 requirement for small scale Class B units on the original development site (application 53/16/0012). I note that there is no target number of live/work units in Policy SP1, nor was there a condition ensuring the live/work unit would remain in perpetuity. For these reasons there is not a defensible justification for retaining this live/work unit.

Habitats Regulations Assessment

The live /work unit has a kitchenette and wc and can be used by the family that reside at No. 6 for running a business. In changing this workspace to ancillary accommodation, the same family will use the space so there will be no change in terms of phosphate generation. A condition will be used to ensure that the accommodation remains ancillary to the main dwelling.

Representations Received

30 letters of representation have been received.

27 writers are in full support of the application. They state that a business use in a residential area is not appropriate as it would bring more vehicle movements and parking congestion resulting in a negative impact on the area. Some writers believe this is a common sense approach to become residential.

1 writer states that renting out the premises to a lodger could require more parking and will increase vehicle movements but still wishes to remain impartial.

2 writers object for the following reasons:

- the deeds do not allow this change,
- it would set a precedent to the other live/work units,
- Luscombe Road already has a high residential density and the live/work unit was not intended as a permanent dwelling,
- Luscombe road would resemble a badly designed NCP,
- the current owners are in breach of the planning permission
- live/work units are excellent ideas and should continue to be used for their intended purpose.
- Windows of the unit look towards the master bedroom of the objector resulting in loss of privacy.

Cllr Hassall comments that under the terms of the deeds this change is not permitted. There are 6 clauses in the Deeds put in by Larkfields. Another live/work owner is minded to do the same.

Planning Policy Context

Section 38(6) of the Planning and Compulsory Purchase Act 2004 requires that applications are determined in accordance with the development plan unless material considerations indicate otherwise.

The development plan for Taunton Deane comprises the Taunton Deane Core Strategy (2012), the Taunton Site Allocations and Development Management Plan (2016), the Taunton Town Centre Area Action Plan (2008), Somerset Minerals Local Plan (2015), and Somerset Waste Core Strategy (2013).

Relevant policies of the development plan are listed below.

CP8 - Environment,
A1 - Parking Requirements,
D6 - Ancillary accommodation,
MIN1 - East of Dene Barton, Cotford St Luke,
DM2 - Development in the countryside,
SB1 - Settlement Boundaries,
CP2 - Economy,
SP1 - Sustainable development locations,

Local finance considerations

Community Infrastructure Levy

Work element of Live/Work Unit being used as residential floor space in breach of planning approval.
Approx. 50sqm.

The application is for residential development outside the settlement limits of

Taunton and Wellington where the Community Infrastructure Levy (CIL) is £125 per square metre. Based on current rates, the CIL receipt for this development is approximately £6,250.00. With index linking this increases to approximately £9,000.00.

Determining issues and considerations

The housing development of Luscombe Road was part of the MIN1 allocation in the Site Allocations and Development Management Plan (SADMP) for 60 dwellings and small-scale B1 employment units on approximately 0.25ha of the site. 30 dwellings were permitted to the southern part of the allocation, to include affordable housing, 3 live/ work units and funding for allotments and a further 30 dwellings with affordable housing and 3 no. live/work units to the northern half now Luscombe Road. Policy SP1 of the Core Strategy set out that new development in the Minor Rural Centres (which include Cotford St. Luke) should include an appropriate balance of market and affordable housing together with some live-work units. The development at Luscombe Road therefore was policy compliant providing both open market dwellings, affordable housing and 3 live/work units. A s106 required the provision of the 3 live/work units.

Condition 8 of the outline permission 53/16/0012 required the submission of details to identify the residential floorspace and the business floorspace of the live/work units and that the residential floor space was to be limited to a person solely or mainly employed within the business space, their spouse (or partner) and to any resident dependants or relatives living together as a family unit. The business floor space was limited to any use falling within use class B1 of D1 (now Class E). The reason this condition was imposed was to ensure that the operation of the live/work unit was not detrimental to the neighbouring property.

The approved drawing for the live/work unit shows the ground floor as a double garage with internal stairs leading to a 1st floor with a kitchenette and wc in the corner. The remaining space was allocated as workspace.

Live/work units are units of living accommodation which are specifically designed to accommodate work facilities for those residing therein. They are a concept that emerged in the UK in the 1990's but has since dwindled but with Covid this may again see a rise in popularity as people look to run their business from home (beyond normal homeworking).

Comments has been made that the proposal will conflict with the s106 agreement to the reserved matters permission.

Schedule 2 of the S106 states:

'1.4 - to provide 3 units of live /work, the location of which shall be previously agreed with the LPA before the development is commenced'.

The 3 live/work units were provided as per the s106 but there is nothing in the s106 that says these have to be provided for the perpetuity of the development and therefore there would be no breach of the s106 were this workspace to become ancillary accommodation. The workspace above the garage at No. 6 has in fact

never been used for its permitted purpose. Furthermore there are currently no policies in the local plan that prevent the loss of the live/work space as such.

SADMP policy D6 'Ancillary accommodation' supports the conversion of an appropriate building within the curtilage of a dwelling for ancillary accommodation. There would be no external alterations to the building that would affect the street scene and thus the proposal conforms with Core Strategy Policy DM1 'General requirements'.

In terms of highways, the use of the building as ancillary accommodation could actually reduce the no. of highway movements compared to that associated with a B1/ D1. This is recognised by the large number of neighbours in support of the application who express concern that a business use is not appropriate in a residential area. There would be no change to the parking requirements and in fact the proposal is likely to result in less demand for parking than the permitted B1/D1 use (office use/ creche / health centre / clinic, day nursery) which would need parking for deliveries, collection and visitors.

In addition there are no hours of control for the use of the live/work unit therefore the occupant of No. 6 could run their business at any times which could cause disturbance in this quiet residential area. Use as ancillary accommodation for the family residing at no. 6 would offer clear benefits to the residential amenity of the surrounding area.

Comments regarding the creation of a new dwelling and associated parking are not relevant as the proposal is to use the premises as ancillary accommodation to provide extra living space in particular for the applicant's daughter as she grows older. The unit will be lived in by the same family and a planning condition would be imposed to ensure this.

In terms of loss of privacy, although there are two windows to the front of the unit that look towards the facing property, this would be the same under the use of the premises as a live/work unit. Although the objector states the hours of use of the live/work unit are controlled, there is no planning condition imposed controlling such use. Regardless, the two properties are a significant distance apart and separated by Luscombe Road. The siting of the properties were fully assessed under the reserved matters application.

As the Strategy Specialist confirms, Core Strategy Policy C2 'Economy' protects the loss of business space however this is not entirely relevant to a live/work unit which offers very limited employment opportunity. Even so, Policy CP2 still enables the loss of employment workspace providing the overall benefit outweighs the disadvantages of the loss of employment on the site. Given the clear improvements to residential amenity from less vehicle movements and disturbance from uncontrolled hours of use and the overall support from residents to this change, it is considered acceptable to see the loss of this workspace.

In terms of phosphate generation there is no increase in occupancy as the premises would be occupied by the same family residing in 6 Luscombe Road.

Other matters

With regards to comments that the Deeds do not allow this change, this is outside of the planning process and whether the applicant will ultimately be able to implement the permission will be for them to decide.

Should another live/work unit owner also seek to change its use, this would be subject to a separate planning application that would be judged on its own merits at that time.

Any concerns regarding the retrospective nature of this proposal are not relevant to the consideration of the application.

Conclusion

The live/work unit was originally provided to satisfy policies MIMI of the SADMP and SP1 of the Core Strategy to provide employment opportunity in the village and to increase the sustainability of the village. The village is now well served by public transport and over time Cotford has become a prime residential area for those that commute to work whether by bus, bike or private car. The Parish Council have not commented on the application and expressed any concern at the loss of this workspace. Luscombe Road is on the eastern outskirts of the village and is a quiet residential area. The proposal would result in a more appropriate use in this residential area. Subject to a condition restricting the use of the premises to ancillary accommodation, it is recommended that permission is granted.

In preparing this report the planning officer has considered fully the implications and requirements of the Human Rights Act 1998.

APPEAL DECISIONS –14 OCTOBER 2021

Site: BROOK VIEW, TUDOR PARK, PRIORSWOOD, TAUNTON, TA2 8TD

Proposal: Variation of Condition No. 04 (landscaping) of application 08/17/0037 at Brook View, Tudor Park, Cheddon Fitzpaine

Application number: 08/21/0002

Reason for refusal: Dismissed

Original Decision: Delegated Decision – Refused

The Planning Inspectorate

Appeal Decision

Site visit made on 10 August 2021 by **S D Castle BSc (Hons) MA MRTPI**

an Inspector appointed by the Secretary of State

Decision date: 23 August 2021

Appeal Ref: APP/W3330/W/21/3273767 Brook View, Tudor Park, Cheddon Fitzpaine, Taunton, Somerset

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant planning permission under section 73 of the Town and Country Planning Act 1990 for the development of land without complying with conditions subject to which a previous planning permission was granted.
- The appeal is made by Glenmill Homes Ltd against the decision of Somerset West and Taunton Council.
- The application Ref 08/21/0002, dated 18 January 2021, was refused by notice dated 01 April 2021.
- The application sought planning permission for variation of conditions no 02 (approved plans), 5 (landscaping), 6 (boundary treatment), and 12 (parking detail) and removal of condition no 7 (Protection of hedges) of application 08/14/0020 at Brook View, Tudor Park, Cheddon Fitzpaine without complying with a condition attached to planning permission Ref 08/17/0037, dated 25 June 2018.
- The condition in dispute is no 4 which states that: (i) The landscaping/planting scheme and dry pond shown on the submitted plan (5403/116) shall be completely carried out within the first month of the first available planting season from the date of issue of this decision notice. (ii) For a period of five years after the completion of the landscaping scheme, the trees and shrubs shall be protected and maintained in a healthy weed free condition and any trees or shrubs that cease to grow, shall be replaced by trees or shrubs of similar size and species or other appropriate trees or shrubs as may be approved in writing by the Local Planning Authority. (iii) The dry pond shall be kept clear of any trees and/or shrubs and be grassed over only.
- The reason given for the condition is: To ensure that the proposed development does not harm the character and appearance of the area in accordance with Policy DM1 of the Taunton Deane Core Strategy and in order to accord with the Environment Agency's requirements in relation to development in the flood plain.

Decision

1. The appeal is dismissed.

Preliminary Matters

2. On 1 April 2019 Taunton Deane Borough Council merged with West Somerset Council to become Somerset West and Taunton Council. The development plans for the merged local planning authority remain in place for the former area of Taunton Deane Borough Council until such a time as they are revoked or replaced. It is therefore necessary to determine this appeal with reference to policies set out in the plans produced by the now dissolved Taunton Deane Borough Council.
3. A revised version of the National Planning Policy Framework (the Framework) was published on 20 July 2021, after the Council had determined the application. I am required to consider this appeal based on the current Framework. From reading all the information before me from the Appellant and the Council, I am satisfied that the revised Framework carries forward the main policy areas from the earlier Framework, as relevant to this appeal. As such, it is not necessary to revert to the parties further.

Background

4. Permission was granted in 2013¹ for the erection of a detached dwelling with associated access at Brook View. That development has been subsequently amended by a number of different applications, including permission ref: 08/17/0037, granted 25 June 2018, and referred to in the banner heading above. This appeal relates to the variation of the landscaping condition attached to 08/17/0037 and seeks omission of the tree planting within the area labelled as an orchard on the approved site plan (dwg no 5403/116).

Main Issues

5. The main issues are the effect of the development on the character, appearance and biodiversity of the site and surrounding area.

Reasons

6. The tree planting subject to this appeal is located on a wedge-shaped area of land bounded by the curving A3259 to the north and west, the fenced rear garden of the dwelling at Brook View to the east, and a mature tree belt along its southern boundary with the dwellings on Barbers Mead. The area of tree planting is clearly visible in public views taken from the A3259, both to motorists and pedestrians. The overall landscaping scheme includes a planted raised bank along the site's boundary with the A3259. At the time of my site visit, planting of the raised bank and orchard had already taken place. That planting was, however, in its early stages of establishment.
7. The character of the surrounding area is strongly verdant in appearance, owing to the substantial areas of landscaping to the front of the recently constructed estate opposite the site, in combination with the substantial mature hedges and trees along the boundary to the A3259. Given the early stage of the planting associated with 08/17/0037, the rear elevation and high rear garden fence of Brook View are

prominent in the street scene in stark contrast to the surrounding verdant landscaping and dwelling frontages of the housing estate opposite.

8. As the landscaping on the site matures, it will be highly visible within the street scene and will make a positive contribution to the visual amenities and verdant character of the appeal site and the wider surrounding area. Whilst mature boundary planting will reduce the visibility of the orchard trees, the orchard provides an intrinsically valuable green buffer between the highway and the adjacent residential development. Such green buffers and their trees are characteristic of the surrounding area. As such, the loss of the trees would erode the verdant character of the site and harm the prevailing verdant character of the area.

¹ LPA ref: 08/12/ 0027

9. The Council's reason for refusal also raises concerns regarding the impact of the proposal on wildlife and their habitats. The appellant has not provided any substantive information regarding the impact of the proposal on biodiversity. Trees provide important wildlife habitat and I therefore find that insufficient information has been provided to demonstrate that there would be no unacceptable harm to the biodiversity interests of the site.
10. The appellant has not provided details of any substantive benefits of the proposal and I am mindful of the support within the Framework at paragraph 131 for the role trees play in mitigating climate change. There is no substantive evidence to indicate that there is a significant probability that the trees will be removed at a future date.
11. I have had regard to the concerns of interested parties, including the effect of the proposal on the living conditions of the occupants of Brook View, but none add to my reasons for dismissing the appeal.
12. Overall, the proposal would result in a loss of landscaping that would be harmful to the character and appearance of the area. Furthermore, it has not been demonstrated that there would be no unacceptable harm to the biodiversity interests of the site. As such the proposal would be contrary to Policies DM1, CP8 and CP1 of the adopted Taunton Deane Core Strategy (2012), and Policies ENV1, ENV2 and D7 of the Taunton Deane adopted Site Allocations and Development Management Plan (2016). These policies, taken together, amongst other things, seek the conservation and enhancement of the natural environment, prevention of unacceptable harm to the character of affected areas, and the planting of trees within new developments where this would benefit biodiversity and enhance landscape. The proposal would also conflict with Framework paragraphs 130 and 131 which require development to be sympathetic to local character and to incorporate trees.

Conclusion

13. Planning law requires that applications for planning permission be determined in accordance with the development plan, unless material considerations (including the Framework) indicate otherwise. There are no material considerations, either individually or in combination, of sufficient weight to outweigh the identified conflict with the development plan.
14. For the reasons above, the appeal is dismissed.

Site: LAND TO THE WEST OF BROOK VIEW, TUDOR PARK, PRIORSWOOD, TAUNTON, TA2 8TD

Proposal: Erection of 1 No. single storey dwelling with detached garage on land to the west of Brook View, Tudor Park, Maidenbrook

Application number: 08/20/0006

Reason for refusal: Dismissed

Original Decision: Delegated Decision – Refused

The Planning Inspectorate

Appeal Decision

Site visit made on 10 August 2021 by **S D Castle BSc (Hons) MA MRTPI**

an Inspector appointed by the Secretary of State

Decision date: 23 August 2021

Appeal Ref: APP/W3330/W/21/3268170 Land to the west of Brook View, Tudor Park, Taunton, Somerset

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant planning permission.
 - The appeal is made by Glenmill Homes against the decision of Somerset West and Taunton Council.
 - The application Ref 08/20/0006, dated 20 February 2020, was refused by notice dated 17 August 2020.
 - The development proposed is erection of single storey dwelling and garage thereto.
-

Decision

1. The appeal is dismissed.

Preliminary Matters

2. On 1 April 2019 Taunton Deane Borough Council merged with West Somerset Council to become Somerset West and Taunton Council. The development plans for the merged local planning authority remain in place for the former area of Taunton Deane Borough Council until such a time as they are revoked or replaced. It is therefore necessary to determine this appeal with reference to policies set out in the plans produced by the now dissolved Taunton Deane Borough Council.
3. A revised version of the National Planning Policy Framework (the Framework) was published on 20 July 2021, after the Council had determined the application. I am

required to consider this appeal based on the current Framework. From reading all the information before me from the Appellant and the Council, I am satisfied that the revised Framework carries forward the main policy areas from the earlier Framework, as relevant to this appeal. As such, it is not necessary to revert to the parties further.

Main Issues

4. The main issues are the effects of the proposed development on:
 - the character and appearance of the area;
 - the living conditions of future occupiers of the development and on the occupiers of Brook View; and,
 - Ecology and biodiversity.

Reasons

Character and Appearance

5. The proposed dwelling would be located on a wedge-shaped area of land that is bounded by the curving A3259 to the north and west, the rear garden of the dwelling at Brook View to the east, and a mature tree belt to the south that separates the site from the rear gardens of dwellings on Barbers Mead. Access to the dwelling would be achieved by extending the existing drive to the north of Brook View.
6. The site is currently an area of tree planting (orchard) that is clearly visible in public views taken from the A3259, both to motorists and pedestrians. The boundary with the A3259 comprises a raised bank that has recently been planted with trees and hedgerow vegetation. At the time of my site visit, the planting of the raised bank and the orchard were both in the early stages of establishment.
7. There are a variety of nearby dwelling types, including both new build dwellings such as Brook View, and local vernacular rural buildings, such as Maidenbrook Farmhouse and The Stables. The character of the surrounding area is, however, spacious and verdant, owing to the substantial areas of landscaping and mature boundary vegetation adjacent to the A3259. As the existing landscaping on the site matures, it will be highly visible within the street scene and will make a positive contribution to the visual amenities and verdant character of the appeal site and the wider surrounding area.
8. Whilst the proposed dwelling would be single storey, it would be in close proximity to the A3259 and would result in the loss of a substantial area of landscaping adjacent to the A3259. The road facing elevation lacks interest and the shallow hipped roof would not integrate with the gable roof forms of surrounding dwellings. The lack of space to the front and rear of the dwelling would result in the dwelling appearing cramped on its plot.
9. I acknowledge that the visual impact of the dwelling would decrease as the highway boundary planting matures. Nevertheless, the proposal would result in the loss of an intrinsically valuable green buffer between the highway and the adjacent residential development. The dwelling would be an incongruous and cramped form of development that would detract from the quality of the street scene and fail to integrate with the prevailing verdant character of the area.
10. As such, the proposal would be harmful to the character and appearance of the area contrary to Policies DM1 and CP8 of the Taunton Deane Core Strategy (2012) (CS), and Policy ENV1 of Taunton Deane adopted Site Allocations and Development

Management Plan (2016). These policies, taken together, amongst other things, seek to conserve and enhance the natural environment, minimise the impact on trees and prevent unacceptable harm to the character of affected areas. The proposal would also conflict with Framework paragraphs 130 and 131 which require development to be sympathetic to local character and to retain trees where possible.

Living Conditions

11. The proposed dwelling and its garage would be adjacent to the rear garden of Brook View. The Council is concerned that the proposal would result in an unacceptable impact on the living conditions of the occupants of Brook View by virtue of it appearing visually obtrusive; through the loss of garden space; and due to noise generated by future occupants of the proposed dwelling using the access. I am not persuaded by the Council in these regards. The proposal is single storey and accommodates 2-bedrooms. As such, it will not appear overbearing given its separation distance from the facing windows in Brook View and the existing high closed boarded boundary fence. Furthermore, it would generate only a limited number of vehicular movements that would not materially affect noise levels given the proximity of the A3259. The fenced rear garden to Brook View is of sufficient scale for the range of activities usually associated with a family dwelling.
12. The appellant advises that the nearest first floor window of Brook View to the proposed dwelling's rear garden is 18.8m away. This is a sufficient distance to avoid unacceptable overlooking or loss of privacy.
13. It is not clear from the Council's statement or refusal reasons what requirements of the listed policies it finds the proposal's impact on living conditions to conflict with. I have not found conflict with the policies listed in the refusal reasons with regards to the specific issue of living conditions.

Ecology and Biodiversity

14. The Council's reason for refusal also raises concerns regarding the impact of the proposal on wildlife and their habitats. The appellant has submitted a Preliminary Ecological Appraisal Update (PEA) and the Council's Ecologist has not objected to the proposals subject to conditions. The proposal would, however, result in the loss of the orchard trees and their contribution to wildlife habitat. The PEA does not address the impact of the loss of the orchard and I therefore find that insufficient information has been provided to demonstrate that there would be no unacceptable harm to the biodiversity interests of the site. The proposal is therefore contrary to CS Policy CP 8 which requires development to conserve and enhance the natural environment, mitigating, and where necessary compensating for, adverse impact on important habitats and natural networks.

Other Matters

15. The site is linked to the Somerset Levels and Moors Ramsar Site and Special Protection Area (SPA) hydrological catchment. There is potential for significant effects on these protected sites due to increases in nutrients as a result of foul and surface water discharges from the proposed dwelling. Regulation 63(1) of the Conservation of Habitats and Species Regulations 2017 (as amended) indicates the requirement for an Appropriate Assessment is only necessary where the competent authority is minded to approve planning permission. Thus, given my overall conclusion on the main issues it has not been necessary for me to pursue this matter any further.

16. I have also had regard to other matters raised by interested parties. As I am dismissing the appeal on the main issues, I have not addressed those matters further.
17. Although the Framework supports development that makes efficient use of land, this needs to take into account the desirability of maintaining an area's prevailing character and setting. This is not the case here, based on the harm I have identified with regard to the character and appearance of the area. There is no substantive evidence to indicate that there is a significant probability that the orchard trees will be removed at a future date.
18. The proposal would result in some economic and social benefits, including through the dwellings' construction and as a result of a slight increase in spending and patronage of services in the local area. The proposal would also make a limited contribution to the Government's objective of significantly boosting the supply of homes in a location with good access to services. I am aware of the importance of windfall housing and that housing targets should not be considered as a cap on the delivery of housing. However, as the proposal is for only a single dwelling, the benefits identified attract limited weight.

Conclusion

19. Planning law requires that applications for planning permission be determined in accordance with the development plan, unless material considerations (including the Framework) indicate otherwise. There are no material considerations, either individually or in combination, of sufficient weight to outweigh the identified conflict with the development plan.
20. For the reasons above, the appeal is dismissed.

Site: The Spice Merchant, 14 Market Street, Watchet, TA23 0AN

Proposal: Erection of a storage building ancillary to the restaurant (retention of works already undertaken) (resubmission of 3/37/20/012)

Application number: 3/37/20/024

Reason for refusal: Allowed

Original Decision: Delegated Decision – Refused

Appeal Decision

Site Visit made on 20 July 2021 by **Nick Davies BSc(Hons)**

BTP MRTPI

an Inspector appointed by the Secretary of State

Decision date: 03 September 2021

Appeal Ref: APP/W3330/W/21/3269771 The Spice Merchant, 14 Market Street, Watchet TA23 0AN

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant planning permission.
 - The appeal is made by Mr Afsar Uddin (The Spice Merchant) against the decision of Somerset West and Taunton Council.
 - The application Ref 3/37/20/024, dated 8 December 2020, was refused by notice dated 1 February 2021.
 - The development proposed is the erection of a storage building ancillary to the restaurant.
-

Decision

1. The appeal is allowed and planning permission is granted for the erection of a storage building ancillary to the restaurant at The Spice Merchant, 14 Market Street, Watchet TA23 0AN in accordance with the terms of the application, Ref 3/37/20/024, dated 8 December 2020, and the plans submitted with it, subject to the following conditions:

- 1) The development hereby permitted shall be carried out in accordance with the following approved plans: 028/20/001 – Location Plan; 028/20/002 – Existing Site Plan; 028/20/003 Rev A – Existing Elevations and Floor Plan; 028/20/004

– Pre-Existing Elevations and Floor Plan; 028/20/005 Rev SB – Proposed Elevations and Floor Plan.

- 2) The building shall be modified in accordance with the details shown on Drawing No 028/20/005 Rev SB, including the replacement of the plasticol finish with render, and the removal of the three windows in the west elevation, within 3 months of the date of this decision.

Preliminary Matters

2. The building has already been erected, so I am dealing with this appeal retrospectively.
3. During the appeal, on 20 July 2021, the Government published its revised National Planning Policy Framework (the Framework). The Framework represents the Government's up-to-date planning policies for England and how they should be applied. Both parties have been given the opportunity to make comments relating to the updated Framework.

Main Issue

4. The main issue is whether the proposal preserves or enhances the character or appearance of the Watchet Conservation Area.

Reasons

5. The site lies within the Watchet Conservation Area (the CA), which includes the historic town centre and harbour. I have not been provided with a Conservation Area Character Appraisal, but the evidence, including my visit, indicates that the CA derives its special interest from its historic pattern of streets, lined with traditional buildings of modest scale and fine architectural details. The historic layout is closely associated with the harbour, which was central to the development of the town. Iron ore from the Brendon Hills was transported to the town via the historic Mineral Line, before being shipped to Ebbw Vale for smelting. Although the railway no longer exists, its historic imprint survives in the remaining buildings near the Western Quay.
6. The main building on the appeal site is in use as a restaurant, and is a twingabled structure that faces the harbour. It was originally part of the goods sheds associated with the railway. Although it has been much altered, its historic provenance is still discernible in its relationship with the former station building opposite, which has a large clock on its external wall, and retains its historic functional appearance. The juxtaposition of the historic buildings, either side of the route of the former railway, and close to its termination at the harbour, is an important remnant of the town's history and makes a positive contribution to the significance of the CA.
7. Section 72(1) of the Planning (Listed Buildings and Conservation Areas) Act 1990 requires me to pay special attention to the desirability of preserving or enhancing the character or appearance of the CA.
8. The storage building has been constructed in the yard to the rear of the restaurant. As it is single storey, flat-roofed, and partially tucked behind the two-storey frontage buildings, it is not particularly prominent from public viewpoints. Furthermore, the yard is surrounded by a high boundary fence, so only the upper part of the structure is visible from outside the site. However, it is clad in black plastic-coated sheeting, which has a shiny appearance, giving it a rather industrial character. Together with its flat-roofed design, the overall appearance is somewhat akin to a portable cabin, rather than a permanent building. It is, therefore, out of character with the adjacent historic buildings, and harmful to the appearance of the CA. In view of its limited

visibility, the harm to the heritage asset is less than substantial within the meaning of paragraph 199 of the Framework.

9. The proposal involves modifications to the building, whereby the plastic-coated sheeting would be replaced with a rendered finish, and the three high-level windows in the west elevation would be removed. The proposed render finish would match the external materials of many of the surrounding buildings, including the lower part of the restaurant, and the former station building directly opposite. Furthermore, render is a predominant external material in the wider CA, so the modified building would sit more comfortably in its surroundings than is currently the case.

10. The flat roof would be retained, and would mirror the flat-roofed single storey projections to the rear of the former station building on the opposite side of the lane. It would also be closely associated with the single and two-storey flatroofed additions at the rear of the adjoining building to the west. Its form would not, therefore, be incongruous in this setting. The resultant low-profile of the building would limit its visibility above the surrounding boundary fence, and would ensure that, when viewed from Market Street to the north, the two historic railway buildings would retain their dominance in the street scene. As a result of its much smaller scale, and its position behind the frontage buildings, the storage building would visually recede into the background.

11. The building would also be viewed against the backdrop of rising land to the south west, which lies outside the CA and accommodates buildings that have no historic or architectural interest. Furthermore, it would be closely associated with the commercial paraphernalia in the yard area to the rear of the adjacent workshop, as well as a range of utilitarian garages, which are accessed off the lane to the south. In its modified form, the building would not be a prominent addition to this melange of small-scale and unremarkable structures that form the backdrop to the historic buildings. Consequently, it would not alter their predominance in the street scene, or the positive contribution that they make to the significance of the CA.

12. For these reasons, I conclude that the modified building would have a neutral impact on the CA, thereby preserving its character and appearance. The proposal would, therefore, comply with Policies NH1, NH2, NH13 and WA1 of the West Somerset Local Plan to 2032 (Adopted 2016), which, amongst other aims, seek to ensure that development proposals which affect the CA should preserve or enhance its character or appearance and make a positive contribution to the local environment. It would also accord with the Framework's aim to conserve and enhance the historic environment. Conditions

13. As the building has already been constructed, a condition limiting the period within which the development must commence is not necessary. I have imposed a condition specifying the relevant plans, as this provides certainty for all parties. As the modifications to the building are necessary to remedy the existing less than substantial harm to the CA, I have imposed a condition requiring them to be carried out within a set timescale.

Conclusion

14. There are no material considerations that indicate the application should be determined other than in accordance with the development plan. For the reasons given above, I therefore conclude that the appeal should be allowed.

The Planning Inspectorate

Appeal Decision

Site visit made on 31 August 2021 by **C Cresswell BSc**

(Hons) MA MBA MRTPI

an Inspector appointed by the Secretary of State

Decision date: 07 September 2021

Appeal Ref: APP/W3330/D/21/3269428 Allermoor Barn, Stathe Road, Stathe, Bridgwater TA7 0JN

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant planning permission.
 - The appeal is made by Mr Jones against the decision of Somerset West and Taunton Council.
 - The application Ref 51/20/0006, dated 17 July 2020, was refused by notice dated 30 November 2020.
 - The development proposed is conversion of garage/outbuilding to two annexes.
-

Decision

1. The appeal is dismissed.

Main Issues

2. The main issues in this case are:

- whether the proposed annexe would comply with polices which seek to manage the risk of flooding.
- whether the proposed annexe would be ancillary to the host dwelling.

Reasons

Flooding

3. The Framework¹ says that inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk. Where development is necessary in such areas, it should be made safe for its lifetime without increasing flood risk elsewhere. In order to achieve this, the Framework requires proposals for certain types of development to pass both the 'sequential test' and the 'exceptions test'.
4. Paragraph 168 of the Framework advises that planning applications for some minor development and changes of use should not be subject to the sequential or exception tests but should still meet the requirements for site-specific flood risk assessments as set out in footnote 55. The footnote makes it clear that a site-specific flood risk assessment should be provided for all development which is located in Flood Zones 2 and 3.

¹ National Planning Policy Framework, Ministry of Housing Communities and Local Government,

20 July 2021.

5. Allermoor Barn is situated within Flood Zone 3. Therefore, even if I were to accept that the proposal would constitute minor development and should not be subject to the sequential or exceptions tests, there would still be a need to provide an appropriate site-specific flood risk assessment.
6. The flood risk assessment provided by the appellant says that there are flood defences in place and that there is no recent history of the site being flooded. Amongst other things, it indicates that the proposed annexe would be higher than surrounding dwellings and that the floor level would be raised by an additional 200mm. Further information is provided about an automatic pumping system that is already installed on the site. It is stated that a flood risk assessment was previously carried out on the site in 2011 and there is an extract of correspondence with the Environment Agency from 2018 which recommends using flood resilient construction practices. The appellant's appeal statement goes on to describe how occupiers of the annexe would achieve safe refuge in the event of a flood and says that the appellant would sign up to the Environment Agency early warning system.
7. Although this goes some way to explaining how the proposed development would address flood risk, many of the assertions made within the flood risk assessment are not backed with a great deal of technical evidence. I am aware that the Planning Practice Guidance¹ advises that the level of detail that needs to be provided in a site-specific flood risk assessment should be proportionate to the scale of development. However, while the proposal concerns a relatively small building, it is nonetheless situated in Flood Zone 3 (a zone which is classified as having a high risk of flooding) and would provide self-contained accommodation for a number of potentially elderly residents. In recognition of this, and the particularly strong emphasis placed on flooding in government policy, the proposal requires an appropriate level of scrutiny.
8. A comparison of the information provided by the appellant and the advice contained with the Planning Practice Guidance in relation to site-specific flood risk assessments (including the checklist) leads me to conclude that there are a number of unanswered questions. For instance, the evidence does not clearly discount the possibility of the

¹ Planning Practice Guidance, Ministry of Housing Communities and Local Government.

development increasing flood risk elsewhere in the vicinity. In the absence of such information, I am unable to verify with sufficient certainty that the annexe would comply with the criteria set out in Paragraph 167 of the Framework, which govern whether or not development should be permitted within the flood zone. For similar reasons, I am also unable to determine that the development would comply with Policy CP8 of the Core Strategy² which also seeks to manage flood risk.

9. I therefore conclude on this issue that the proposal does not demonstrate compliance with policies which seek to manage the risk of flooding.

Whether ancillary

10. Policy D6 of the SADMP³ says that the conversion of an appropriate building within the curtilage of a dwelling for ancillary accommodation will be permitted. The policy goes on to specify five criteria (A-E) which apply to the erection of new buildings within the curtilage of a dwelling for ancillary use. However, as the proposal is to convert an existing outbuilding rather than construct a new one, these criteria are not directly applicable in this case.
11. Nonetheless, it is still necessary to ensure that the proposal would constitute 'ancillary accommodation' as permitted by Policy D6 and would not amount to a new dwelling in the countryside (which would need to be assessed against a different set of policies including Policy DM2 of the Core Strategy). With this in mind, I note that Allermoor Barn occupies a very spacious plot of land which benefits from a particularly long road frontage. Due to the size and shape of the plot and the linear arrangement of buildings on the site, the host dwelling would be well separated from the proposed annexe. Considering that the annexe would have its own gated access onto the road and would contain facilities necessary for day-to-day living, I have little doubt that it would be physically capable of being occupied as a self-contained dwelling entirely independent of Allermoor Barn.
12. However, the development before me in this appeal is a residential annexe and not an independent dwelling. Although the building would be quite sizeable for an annexe, it would be notably smaller than the host dwelling and would share private garden space with it. Furthermore, there is little to substantiate the Council's claim that the annexe would occupy a different curtilage than the host dwelling. While the annexe would contain facilities for day-to-day living, it does not necessarily follow that a separate planning unit would be created.
13. Overall, it seems to me that the development would be capable of being used for the intended ancillary use. If planning permission was granted and the building was not used as proposed, or there was a material change of use in the future to create a separate dwelling, then a separate grant of planning permission would be required and there would be a risk of enforcement action if such permission were not granted.
14. This leads me to conclude on this issue that the proposed annexe would be ancillary to the host dwelling. For the reasons given above, the development would comply with Policy D6 of the SADMP. As I have found that the proposed development would result in a residential annexe (rather than a new dwelling in the countryside) Policy DM2 of the Core Strategy is of somewhat less relevance in this particular case.

² Taunton Deane Borough Council Adopted Core Strategy 2011-2028.

³ Taunton Deane Adopted Site Allocations and Development Management Plan 2016.

Other Matters

15. I am mindful that the proposed annexe would provide accommodation for family members and, in this regard, would contribute to the social objectives of sustainable development as outlined in the Framework. However, the annexe is for permanent development that would outlast any personal needs of this nature. It is therefore important to ensure that new accommodation on the site takes account of flood risk. Hence, while I sympathise with the appellant in wishing to provide accommodation for elderly members of his family, this is not sufficient to outweigh my concerns in respect of flooding.
16. The Council's reasons for refusal say that the development could adversely impact upon the Somerset Levels and Moors Ramsar Site by adding to the concentration of phosphates in the area. In response, the appellant has proposed mitigation measures. However, as I am dismissing the appeal for other reasons, I have not considered this matter any further.

Conclusion

17. Although I have found the proposal to be acceptable with regard to ancillary use, it has not been sufficiently demonstrated that the development would comply with policies which seek to manage flood risk.
18. The appeal is therefore dismissed.

C Cresswell INSPECTOR

Site: BROOK VIEW, TUDOR PARK, PRIORSWOOD, TAUNTON, TA2 8TD

Proposal: Land off Shurton Lane, Stogursey

Application number: 3/32/20/003

Reason for refusal: Allowed – Appeal
Allowed - Costs

Original Decision: Chair – Refused

Appeal Decision

Hearing Held on 3 August 2021

Site visit made on 5 August 2021 **by**

Mrs H Nicholls FdA MSc MRTPI

An Inspector appointed by the Secretary of State

Decision date: 17 September 2021

Appeal Ref: APP/W3330/W/21/3272670

Land off Shurton Lane, Stogursey, TA5 1RW

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant outline planning permission.
- The appeal is made by Land Allocation Ltd against the decision of Somerset West and Taunton.
- The application Ref 3/32/20/003, dated 9 January 2020, was refused by notice dated 9 October 2020.
- The development proposed is outline application with all matters reserved except for access for a residential development of up to 27 No. dwellings (resubmission of 3/32/19/011).

Decision

1. The appeal is allowed and planning permission is granted for outline application with all matters reserved except for access for a residential development of up to 27 No. dwellings (resubmission of 3/32/19/011) at Land off Shurton Lane, Stogursey, TA5 1RW, in accordance with the terms of the application, Ref 3/32/20/003, dated 9 January 2020, subject to the conditions in the attached schedule.

Preliminary Matters

2. The application was made in outline form with all matters saved for access reserved for future consideration. Consequently, all plans pertaining to the layout of the site have been treated as purely indicative.
3. During the course of the appeal application, the proposed number of dwellings was reduced from a maximum of 32 to 'up to 27 no. dwellings'. I have taken the description of development from the Council's decision notice to reflect this change and took account of the parties' reasoning behind the change.

4. The National Planning Policy Framework (the Framework) was revised in July 2021. Though the submitted evidence of the parties was based on the superseded version of the Framework, the changes of relevance were discussed during the hearing and the views of the parties were taken into account in reaching my decision.
5. A Unilateral Undertaking (UU) made as a deed under Section 106 of the Town and Country Planning Act 1990, executed on 22 June 2021, was submitted prior to the hearing. The Council confirmed in writing that the UU addressed the reasons for refusal (RfR) relating to the absence of affordable housing (RfR 2), children's play space (RfR 3) and a travel plan (RfR 4). As such, I have considered the appeal on the basis of the single outstanding reason for refusal.

Application for costs

6. An application for costs was made by Land Allocation Ltd against Somerset West and Taunton. This application is the subject of a separate Decision.

Main Issue

7. The single main issue is whether the site would provide an appropriate location for the development, having regard to local and national planning policies relating to the location for new development.

Reasons

8. This appeal follows an earlier scheme on the same site which was dismissed on 29 March 2021 following an appeal against non-determination⁴. That scheme was based on an outline application for up to 70 houses.
9. The current scheme is for a much reduced scale of up to 27 houses. The figure of 27 is allegedly based on discussions between the appellant and Council on the likely acceptable scale of increase of the settlement of Stogursey up to 2032 based on Policy SC1 of the West Somerset Local Plan 2015 (WSLP).
10. Under the WSLP, Stogursey is defined as a 'Primary Village' based on the number of available facilities and services, its distant relationship from other main settlements on which it relies for higher order shopping, employment and secondary schooling opportunities, and limited public transport provision. It was agreed that no material change had occurred in relation to local services or public transport availability since the earlier appeal hearing.
11. At the hearing, it was agreed between the parties that the 'most important' policies for determination of the appeal were Policies SC1, SV1 and TR2 of the WSLP. In summary, Policy SV1 requires that new developments form an integral, harmonious addition to the settlement's existing character, help to maintain or enhance the existing level of service provision and help to create balanced communities at a level appropriate to their role and function. Policy TR2 stipulates that development should complement the existing service provision within the settlement and surroundings without generating new unsustainable transport patterns (as a consequence), and should not result in significant additional traffic over minor roads.
12. Policy SC1 is the key policy seeking to guide the scale of development relative to the hierarchy of settlements in the WSLP area. As Stogursey is a 'primary village', the relevant wording of the Policy is as follows:

⁴ Appeal Ref: APP/W3330/W/19/3243508

“Limited development in the primary villages, including... Stogursey, will be permitted where it can be demonstrated that it will contribute to wider sustainability benefits for the area.”

13. The parties agree that there is no contention with any of the criteria a) to e) listed in Policy SC1 4). However, as the Policy wording refers to the term ‘limited development’, the relevant definition from the preamble is as follows:

“... ‘Limited development’ means individual schemes of up to ten dwellings providing about a 10% increase in a settlement’s total dwelling number during the Local Plan period, limited to about 30% of this increase in any five year period.”
14. Clearly the proposal would not be an individual scheme of ‘up to 10 dwellings’ in line with that particular, unambiguous part of the Policy. The increase of ‘about’ 10% of the total dwelling number of Stogursey for the Plan period was agreed as around 39 dwellings (10% of 388). Due to other permissions either granted or very likely to be granted imminently, the remainder of the dwellings that could be permitted in line with the Policy would be around 25, taking into account deductions for the Paddons Farm scheme⁵ and Castle Street scheme⁶.
15. In reference to the ‘limit [of] about 30% of this increase [i.e. 39 dwellings] in any five year period’, the first nine years of the Plan period have elapsed, nearly five since its adoption in 2015 and approximately 30% of that increase (around 12 dwellings) have been, or are imminently due to be permitted with incremental deliveries expected to follow therefrom. There are eleven years of the Plan’s life yet to run.
16. The scheme would comprise broadly 70% of the total allowable 39 dwelling/ 10% increase in Stogursey’s total size. It would monopolise the remaining growth quota for the Plan period by placing it all on a single site at broadly the halfway point in the Plan’s life. As this would largely preclude policy support being offered to future infill, redevelopment, intensification or other more organic, ‘limited development’ schemes, it would be counter to the aims of Policy SC1.
17. However, the overall quantum would not be disproportionate to the scale of growth envisaged for Stogursey within the Plan. In this context, the dwellings would maintain or enhance the existing level of service provision and help to maintain a balanced community at a level appropriate to its role and function. It would do so without an unacceptable impact on transport patterns or significant additional traffic on minor roads.
18. Taking account of the above, in my view, the proposal would conflict with WSLP Policy SC1 by reason of its scale and its monopolisation of the remaining permissible growth for Stogursey. However, insofar as the scale of growth is envisaged for the settlement over the plan period in any event, the proposal would not directly conflict with Policies SV1 or TV2.

Other Considerations

19. The appellant asserts that the Council cannot demonstrate a five year supply of housing land (5YHLS). On the basis of the evidence before him in the previous appeal hearing, my colleague found that the Council was incapable of demonstrating a

⁵ Paddons Farm

⁶ Castle Street scheme

5YHLS and that it was more likely that the Council could demonstrate a supply of around 3.93 years. Whilst I am not duty bound to accept my colleague's findings in relation to the 3.93 year supply, it was confirmed by the parties that the appeal decision is a relevant and recent material consideration and the Statement of Common Ground (SoCG) defines its materiality as significant.

20. It was also clarified during the hearing that the appellant's newly revised housing supply figure of 3.74 years (scenario 2) differs from that previously accepted by my colleague of 3.93 years, due to the Council's recent inclusion of a shortfall of 174 dwellings from previous years within the supply calculation. As this explanation was accepted by the Council, I find no reason to disagree with this general approach.
21. Since the earlier appeal was determined, the Council has published its 2021 Strategic Housing Land Availability Assessment (SHLAA) 2021 which suggests a 5YHLS of 5.21 years can be demonstrated. It was confirmed at the hearing that this is the same figure before my colleague in January 2021, within the Council's 2021 SHLAA and within the Council's Statement for this appeal.
22. Clearly, events can have occurred between the date of the previous appeal decision that alter the 5YHLS situation. The discussion during the hearing included reference to the contested sites⁷ to which my colleague referred in his decision.
23. From the evidence put to me, the actual notable changes that have occurred since 29 March 2021 include the granting of the following permissions:
 - Outline permission, ref 3/37/17/019 granted on 15 June 2021, subject to a Section 106 at Liddymore Estate, Watchet for 139 dwellings.
 - Full permission, ref 3/21/21/015 granted on 14 July 2021 for 54 dwellings on Land at Seaward Way, Minehead.
24. Only the 54 dwelling scheme at Seaward Way, Minehead is a new addition to the supply and does not form one of the previously contested sites. Its contribution of 54 dwellings can be included as an entirely new contribution of dwellings to the 5YHLS calculation as it appears that there is certainty over delivery with the Council being both the landowner and developer.
25. A yield from the other two schemes at Liddymore Estate and Liddymore Farm had already been factored into the 5YHLS scenarios before my colleague, i.e. for the Liddymore Estate scheme, 105 dwellings had been factored into the calculation and in the case of Liddymore Farm, 172 dwellings had been included, even though the permission for the reserved matters consent is still not issued following the Planning Committee's resolution to grant on the 10 June 2021 (ref 3/37/20/006). So whilst a permission has been issued and some progress made with another, to add them in would amount to double counting.
26. The Council discussed the other contested sites and progress that had been made on those. It became apparent that there would be likely changes on some of those either in the near future or within a reasonable timeframe up to around the end of 2021 / early 2022, with a number of other large schemes planned to go before the Council's Planning Committee and the finalisation of S106 or conditions matters on others for which there is already a longstanding positive committee resolution. However, despite

⁷ Hopcott Road, Minehead, ref 3/21/13/120; South of Hopcott Rd, Minehead, ref 3/21/19/092; Wansborough Paper Mill, Watchet, ref 3/37/19/021; West of and North of A39, Williton, ref 3/39/20/003; South of B3192 Cleeve Hill, Watchet, ref 3/37/18/015; Liddymore Estate, Watchet, ref 3/37/17/109 and Liddymore Farm, Watchet, ref 3/37/17/020

the clear intent to progress these matters, the status of those has not yet changed to a degree that would enable me to reach an alternative view to my colleague and consider those sites deliverable, using the unchanged definition in the Framework. Nor do I have the level of evidence before me in relation to the commitment to early delivery of these contested sites as claimed exists by the Council that would enable me to reach an alternative conclusion.

27. Consequently, based on the evidence before me and the discussion which took place as part of the hearing, I reach the view that the Council is still incapable of demonstrating a 5YHLS at the present time and that the appellant's figure of 3.74 years is to be preferred. Whilst I accept that this position is dynamic and can be overtaken by changes in circumstances, I do not agree that sufficient actual changes have occurred since the previous appeal decision that enable me to reach the same view as the Council. However, without fettering any future decision on the future supply position, it is unlikely that the 5YHLS deficit will persist for long, with the five year anniversary of the WSLP scheduled in November 2021. At this juncture, the Council will be capable of using the Government's standard methodology for calculating housing supply and a materially different outcome could be reached.
28. Nevertheless, the pertinent conclusion is that the Council is presently incapable of demonstrating a 5YHLS and thus, the Policy which is agreed as being most important to the determination of the appeal, Policy SC1, is considered out-of-date in the context of paragraph 11 d) of the Framework. The 'tilted balance' outlined in the same requires that where policies that are most important for determining an application are out-of-date, permission should be granted unless any adverse impacts of doing so would significantly and demonstrably outweigh the benefits. The tilted balance is engaged in this case.
29. The harm would result from the large scale of the scheme in contrast with the desired organic growth envisaged by the Plan, essentially monopolising the increase in housing in the village for the remainder of the plan. The Council also raise concerns with the previous slow rate of delivery of large housing schemes in Stogursey, which further explains the desire to enable smaller schemes to come forward over the Plan period.
30. In terms of the benefits of the scheme, it is clear that the provision of housing would be beneficial both socially and economically. It would create construction phase job opportunities in the short to medium term and help to sustain local services and facilities in the longer term. It would also deliver 35% affordable housing, which inadvertently, Policy SC1 has the effect of constraining delivery of due to its upper threshold of 10 dwellings under the definition of 'limited development'. The parties agreed that there was a high level of affordable housing need and that the provision of affordable housing would be considered beneficial in this context. Overall, I attribute the benefits of the scheme considerable weight.

Other Matters

Exmoor and Quantocks Oak Woodlands Special Area of Conservation (SAC)

31. The appeal site is within around 4 km of the above SAC and could have effects on its integrity through harm, directly or indirectly, to its qualifying features and the habitats on which they rely, including Oak tree species, Barbastelle bats and Bechstein bats and otters. The harm could arise from the development considered either alone or in combination with other plans or projects from increased recreational activity from visitors to the woodlands; air quality degradation from increased car journeys around

the SAC; damage to flyways and foraging habitat for the bats; increased lighting on foraging routes, and unintentional increased disturbance to either bats, otters and their respective roosts or areas functionally linked to the SAC.

32. As such effects cannot be ruled out, I have undertaken an Appropriate Assessment using comprehensive information submitted by the parties in order to assess the likelihood and significance of effects. Though my conclusions are that such potential effects on integrity could be slight rather than significant, there are obvious opportunities to design any scheme and apply conditions that would mitigate them. These mitigation and enhancement measures would include robust landscaping and habitat features on site, conditions seeking details of external lighting schemes and adherence to a Landscape and Ecology Management Plan that would preserve the value of such features throughout the lifetime of the development. Having regard to these conclusions and the view of Natural England as the Statutory Nature Conservation Body (SNCB) which corroborate the same, as competent authority, I consider that the scheme would avoid significant effects on the integrity of the SAC. The proposal therefore complies with the requirements of the Conservation of Habitats and Species Regulations 2017, and Policy NH6 of the WSLP.

General Matters

33. I have noted the comments in objection to the scheme from the Parish Council and a number of other individuals. In respect of the subdivision of the larger field and the part which would remain undeveloped, I do not share the view that this would necessarily lead to another similar development in the future for reasons outlined above. The Council's housing position is likely to change in due course and the attribution of weight to policies of the existing WSLP would also change as a consequence.
34. Despite the claims that the highways are unsuited to additional traffic for reasons of narrowness, insufficient capacity and use by farm machinery, the absence of any objection from the Highway Authority on safety grounds suggests that they are capable of accommodating such. There is no accident data to suggest that the scheme would be so problematic in this regard or at one particular junction that it would fail to comply with the relevant local and national planning policies.
35. I note the generally limited services in the village and the suggestions that they, and other village infrastructure, would not cope with an increase in population. However, the Council indicated at the hearing that the future occupants would likely increase the patronage and consequently, the viability and vitality of these services. As such, I do not have cogent evidence on which to base an appeal on the limited nature of services or oversubscription thereof.
36. Whilst I accept that the indicative details suggest two storey houses would back onto existing bungalows, these details would be reserved for future consideration. The boundary treatment that would be maintained and improved as part of any future scheme between the existing and proposed housing would also help to protect the living conditions of neighbouring occupiers.
37. In terms of the nature and location of the indicative scheme, I do not consider that it would be unsympathetic to the area when considered alongside the existing housing. The comments from the Council's Landscape Officer also appears to corroborate this view, subject to conditions to secure a strong structural landscape treatment on the northern boundary. In this sense, the scheme would comply with Policy SV1 which

requires development to be designed to form an integral, harmonious addition to a settlement.

38. I accept that mitigation and enhancement measures are required to protect the area's biodiversity interests, and these aspects would be necessary to secure by way of planning conditions and within future reserved matters scheme/s.
39. In terms of flooding, there would be requirements for both surface water and foul water drainage schemes to be detailed by way of planning conditions to avoid any increased risks or harm in this regard. Furthermore, as the site is greenfield and has no real existing drainage infrastructure, there is an ability to seek to improve on any unmanaged flood issues that may periodically arise.

Conditions and S106 Planning Obligation

40. I have considered the suggested conditions in light of the Framework and the Planning Practice Guidance (PPG). Where necessary, with agreement, I have undertaken minor alterations in the interests of precision.
41. As the scheme is in outline form, a number of standard conditions are necessary seeking the submission of reserved matters applications and standard time limits for implementation. In the interests of certainty, a condition is also required specifying the approved plans, which are limited to the site location plan, existing site plan and site access plan.
42. In the interests of highway safety, it is necessary to ensure by way of conditions that details of estate roads, car parking layouts, the access works and footpath connection to the village are all submitted to and approved in writing, provided at the appropriate juncture and provided at suitable specifications, i.e. gradients. For similar reasons, it is also necessary to ensure that the visibility at the access junction is continually maintained as such. Additionally, in order to maintain the correct and safe number of car parking spaces, a condition is required precluding the conversion of garages to additional living accommodation under permitted development rights.
43. In order to minimise disruption to adjoining occupiers, to maintain biodiversity and in the interests of highway safety, it is necessary to seek the submission of a Construction Environmental Management Plan.
44. Given the site's proximity and the potential effects of the scheme on the SAC, relevant bat mitigation and enhancement measures must be secured by condition and subsequently delivered within any future reserved matters scheme approved. For similar reasons, but also in view of the more general site and area-specific biodiversity value, landscape quality and visual amenities, a condition is necessary to secure a Landscape and Ecological Management Plan.
45. Specifically in relation to the potential effects on bats, it is necessary to secure details of any external lighting by way of condition before installation within the scheme. For the protection of reptiles that may be present on site, a condition is necessary to ensure that preparatory works are undertaken prior to construction to encourage them to disperse to neighbouring agricultural land.
46. In the interests of flood prevention and to protect human health, it is necessary to ensure a surface water drainage scheme is agreed by way of condition and subsequently implemented prior to occupation of any dwellings hereby approved. For similar reasons, it is also necessary to secure a scheme in relation to foul water drainage.

47. Lastly, in order to protect any potential archaeological remains, it is necessary to secure approval and adherence to a Written Scheme of Investigation.
48. I have considered the suggestion about the use of a phasing condition to stagger the development in line with other housing deliveries in Stogursey over the Plan period. Due to the absence of a 5YHLS, the imposition of a condition that would in some way preclude, or delay the delivery of housing, would undermine the intent of the Framework to significantly boost the supply of housing. Additionally, I also foresee practical complications with requiring adherence to a phasing plan on a scheme which would not easily lend itself to a phased delivery, which could run into years beyond the grant of outline permission and which would require some interaction with the rate of progress of delivery of other schemes in the village. As such, I do not consider this condition necessary, reasonable or enforceable.
49. In terms of the executed UU, I have considered the obligations included therein in the context of the PPG, the Framework and the Community Infrastructure Levy Regulations 2010 (as amended) (CIL Regs).
50. In respect of the affordable housing provision, I am content that the UU provides for the requisite amount, tenure and affordability of affordable housing and contains the correct local connection clauses to meet the locally identified housing need in order to meet the requirements of WSLP Policy SC4.
51. In terms of the provision of public open spaces on site, their management, and the contribution towards the upgrade of the existing adjacent play space, I am satisfied that the obligations secure the necessary provisions, actions and timely contributions in order to comply with Policies CF1 and ID1 of the WSLP.
52. In terms of the travel plan obligations, I am satisfied that the obligation to submit a travel plan, inclusive of a schedule of payments of contributions, would fulfil the requirements of Policies TR1 and ID1 of the WSLP.
53. Considered as a whole, the UU is a deed containing obligations that are all necessary, relevant and appropriate in scale and kind to the development, thus compliant with the Framework, PPG and CIL Regs.

Overall Conclusion

54. Taking all of the above into account, the scheme is in conflict with the Development Plan when considered as a whole.
55. At the present time, I consider that the tilted balance is engaged owing to the absence of a 5YHLS. Though I accept that this is likely to be short-lived and that the Council is making progress towards achieving a more robust 5YHLS position, this in itself is not a reason to disapply the tilted balance. Similarly, there are no reasons in relation to particular sites or assets afforded greater protection by the Framework for it to be disengaged.
56. The harm arising from the conflict with the development plan which seeks a more organic and staggered delivery of housing over the plan period would not significantly and demonstrably outweigh the numerous sustainability benefits of the scheme, which includes the delivery of housing of around the overall quantum envisaged for the village during the plan period, and particularly, the provision of affordable housing.

57. Consequently, the tilted balance forms a consideration of such materiality in this case that it dictates that a decision should be taken other than in strict accordance with the development plan.

58. For the reasons set out above, the appeal is allowed.

SCHEDULE OF CONDITIONS

1. Details of the appearance, landscaping, layout and scale (hereinafter called 'the reserved matters') shall be submitted to and approved in writing by the Local Planning Authority before any development commences and the development shall be carried out as approved.
2. Application for the approval of Reserved Matters shall be made to the Local Planning Authority not later than 3 years from the date of this permission. The development hereby permitted shall be begun not later than 2 years from the date of approval of the last reserved matters to be approved.
3. The development shall conform in all aspects with the plans and details shown in the application as listed below:
 - Site Location Plan Ref CAL061119 01
 - Existing Site Plan Ref CAL061119 02
 - Site Access Plan Appendix B to Transport Statement dated 18th November 2019
4. No part of the development hereby permitted shall be first occupied until the access works have been carried out.
5. There shall be no obstruction to visibility greater than 300 millimetres above adjoining road level in advance of lines drawn 2.4 metres back from the carriageway edge on the centre line of the access and extending to points on the nearside carriageway edge 43 metres either side of the access. Such visibility shall be fully provided before the development hereby permitted is brought into use and shall thereafter be maintained at all times.
6. No dwelling hereby permitted shall be occupied until details of the total number of car parking spaces, the number/type/location/means of operation and a programme for the installation and maintenance of Electric Vehicle Charging Points and points of passive provision for the integration of future charging points has been submitted to and approved in writing by the Local Planning Authority prior to construction of the above groundworks. The parking spaces and Electric Vehicle Charging Points as approved shall be installed prior to occupation and retained in that form thereafter for the lifetime of the development.
7. The proposed estate roads, footways, footpaths, tactile paving, verges, junctions, street lighting, sewers, drains, retaining walls, service routes, surface water outfall, vehicle overhang margins, embankments, visibility splays, accesses, carriageway gradients, drive gradients, car, motorcycle and cycle parking, and street furniture shall be constructed and laid out in accordance with details to be approved by the Local Planning Authority in writing before their construction begins. For this purpose, plans and sections, indicating as appropriate, the design, layout, levels, gradients, materials and method of construction shall be submitted to the Local Planning Authority. The development shall be completed in accordance with the approved details.
8. The proposed roads, including footpaths and turning spaces where applicable, shall be constructed in such a manner as to ensure that each dwelling before it is occupied shall be served by a properly consolidated and surfaced footpath and

carriageway to at least base course level between the dwelling and existing highway.

9. The gradients of the proposed drives to the dwellings hereby permitted shall not be steeper than 1 in 10 and shall be permanently retained at that gradient thereafter at all times.
10. Notwithstanding the provisions of the Town and Country Planning (General Permitted Development) Order 2015 (or any order revoking and re-enacting that Order), the use of any garage hereby permitted, as part of this development shall not be used other than for the parking of domestic vehicles and shall not be used for additional ancillary residential accommodation or business use.
11. No development shall commence unless a Construction Environmental Management Plan has been submitted to and approved in writing by the Local Planning Authority. The works shall be carried out strictly in accordance with the approved plan. The plan shall include:
 - Construction vehicle movements;
 - Construction operation hours;
 - Construction vehicular routes to and from site;
 - Construction delivery hours;
 - Expected number of construction vehicles per day;
 - car parking for contractors;
 - Specific measures to be adopted to mitigate construction impacts in pursuance of the Environmental Code of Construction Practice;
 - A scheme to encourage the use of Public Transport or car sharing amongst contractors;
 - Measures to avoid traffic congestion impacting upon the Strategic Road Network, if required.
12. A minimum accessible habitat enhancement area for Barbastelle bats of 0.34ha shall be provided, to include a bat corridor with a minimum width of 15 metres around the north western and southern boundaries of the site. The replacement habitat shall be a long sward meadow, scrub, and shall include hedgerow enhancement along the edge of the north-western and southern boundaries of the site. The layout and a planting schedule for the habitat creation and hedgerow enhancement shall be submitted to and approved in writing by the Local Planning Authority as part of the Reserved Matters layout/s or at least prior to any development commencing on site. These features shall be planted/provided as part of the development prior to occupation of any dwelling hereby approved.
13. A Landscape and Ecological Management Plan (LEMP) shall be submitted to, and approved in writing by, the Local Planning Authority prior to the occupation of any dwellings hereby approved. The content of the LEMP shall include the following.
 - a) Description and evaluation of features to be managed.
 - b) Ecological trends and constraints on site that might influence management.
 - c) Aims and objectives of management.
 - d) Appropriate management options for achieving aims and objectives.
 - e) Prescriptions for management actions.
 - f) Preparation of a work schedule (including an annual work plan capable of being rolled forward over a five-year period).

g) Details of the body or organization responsible for implementation of the plan.

h) On-going monitoring and remedial measures.

The LEMP shall also include details of the legal and funding mechanism(s) by which the long-term implementation of the plan will be secured by the developer with the management body(ies) responsible for its delivery. The plan shall also set out (where the results from monitoring show that conservation aims and objectives of the LEMP are not being met) how contingencies and/or remedial action will be identified, agreed and implemented so that the development still delivers the fully-functioning biodiversity objectives of the originally approved scheme.

The approved LEMP will be implemented in accordance with the approved details.

14. Prior to the occupation of the first dwelling, a “lighting design for bats” shall be submitted to and approved in writing by the Local Planning Authority. The strategy shall:

a) identify those areas/features on-site that are particularly sensitive for bats and that are likely to cause a disturbance in or around their resting places or along important routes used to access key areas of their territory, for example, for foraging; and

b) show how and where external lighting will be installed (through the provision of lighting contour plans and technical specifications) for all access routes and paths so that it can be clearly demonstrated that areas to be lit will not disturb or prevent the above species using their territory or having access to their resting places.

All external lighting shall be installed in accordance with the specifications and locations set out in the design, and these shall be maintained thereafter in accordance with the design. Under no circumstances should any other external lighting be installed without prior consent from the Local Planning Authority.

15. Any vegetation in the construction area should initially be reduced to a height of 10 centimetres above ground level by hand, brushings and cuttings removed and the remainder left for a minimum period of 48 hours of fine warm weather (limited rain and wind, with overnight temperatures of 10°C or above) before clearing to minimise the risk of harming/killing any reptiles that may be present and to encourage their movement onto adjoining land. Once cut or if as managed, vegetation should be maintained at a height of less than 10cm for the duration of the construction period. Written confirmation of these operations will be submitted to the Local Planning Authority.

16. No development shall be commenced until details of the surface water drainage scheme based on sustainable drainage principles together with a programme of implementation and maintenance for the lifetime of the development have been submitted to and approved in writing by the Local Planning Authority. The drainage strategy shall ensure that surface water runoff post-development is attenuated on-site and discharged at a rate and volume no greater than greenfield runoff rates and volumes. Such works shall be carried out in accordance with the approved details. These details shall include: -

- Details of phasing (where appropriate) and information of maintenance of drainage systems during construction of this and any other subsequent phases.
- Information about the design storm period and intensity, discharge rates and volumes (both pre and post-development), temporary storage facilities, means of access for maintenance (6 metres minimum), the methods employed to delay and

control surface water discharged from the site, and the measures taken to prevent flooding and pollution of the receiving groundwater and/or surface waters.

- Any works required off-site to ensure adequate discharge of surface water without causing flooding or pollution (which should include refurbishment of existing culverts and headwalls or removal of unused culverts where relevant).
- Flood water exceedance routes both on and off-site, note, no part of the site must be allowed to flood during any storm up to and including the 1 in 30 event, flooding during storm events in excess of this including the 1 in 100yr (plus 40% allowance for climate change) must be controlled within the designed exceedance routes demonstrated to prevent flooding or damage to properties.
- A management and maintenance plan for the lifetime of the development which shall include the arrangements for adoption by an appropriate public body or statutory undertaker, management company or maintenance by a Residents' Management Company and / or any other arrangements to secure the operation and maintenance to an approved standard and working condition throughout the lifetime of the development.
- Infiltration testing undertaken in accordance with Building Research Digest 365 and a viable surface water drainage strategy based on these results. If infiltration is found to be unviable a surface water drainage strategy based on using SuDS features and attenuation should be progressed further.
- Further site investigation carried out to explore the site constraints, such as groundwater levels, and the drainage design based upon these results to ensure a viable drainage strategy.

17.No development shall commence until a foul water strategy has been submitted to and approved in writing by the Local Planning Authority. No dwelling shall be occupied until the works have been carried out in accordance with the approved foul water strategy relevant to that dwelling.

18.No development shall commence until the applicant, or their agents or successor in title shall have secured the implementation of a programme of archaeological work in accordance with a Written Scheme of Investigation (WSI) which has been submitted to and approved in writing by the Local Planning Authority. The WSI shall include details of the archaeological investigation, the recording of the heritage assets, analysis of evidence recovered from the site and publication. The development shall be carried out in accordance with the approved WSI.

Costs Decision

Hearing Held on 3 August 2021

Site visit made on 5 August 2021 **by**

Mrs H Nicholls FdA MSc MRTPI

An Inspector appointed by the Secretary of State

Decision date: 17 September 2021

Costs application in relation to Appeal Ref: APP/W3330/W/21/3272670 Land off Shurton Lane, Stogursey, TA5 1RW

- The application is made under the Town and Country Planning Act 1990, sections 78, 322 and Schedule 6, and the Local Government Act 1972, section 250(5).
 - The application is made by Land Allocation Ltd for a full award of costs against West Somerset and Taunton Council.
 - The hearing was in connection with an appeal against the refusal of planning permission for outline application with all matters reserved except for access for a residential development of up to 27 No. dwellings (resubmission of 3/32/19/011).
-

Decision

1. The application for costs is allowed in the terms set out.

The submissions for Land Allocation Ltd

2. The appeal was originally to be determined under the written representations procedure. Following receipt of the Council's Statement, it became apparent that the Council was seeking to claim that a five year housing land supply existed (5YHLS), despite the earlier appeal decision of 29 March 2021¹ indicating that the Council was incapable of demonstrating a five year supply of housing land.
3. At the time a change in procedure became necessary, the applicant indicated that this would likely lead to a submission of a claim for costs from the Council, owing to the lack of account on the part of the Council of the earlier appeal decision and lack of justification in support of its case on the matter of the 5YHLS.
4. The applicant highlights the Council's failure to provide the documents requested, i.e. planning permission decisions (refs 3/37/20/006 and 3/21/21/015) and the Strategic Housing Land Availability Assessment (SHLAA), which were not forthcoming within the requested deadlines. In fact, at the time of the submission of the Council's Statement, neither permissions had actually been granted even though positive Committee recommendations may have been reached.
5. The summary of the applicant's position is that the Council have acted unreasonably and incurred unnecessary and wasted expense through the escalation of the case to an informal hearing through a failure to provide information, vague references which led to a change in the appeal procedure, relying on information which was inaccurate and persisting in concluding a

5YHLS could be demonstrated when an Inspector had reached pertinent conclusions in a materially relevant decision only a matter of months prior to the hearing.

The response by Somerset West and Taunton Council

6. The response by the Council was made in writing on the day of the closure of the hearing. The applicant was provided with an opportunity to comment on the Council's rebuttal.
7. Essentially, the Council's response highlights the importance of the development plan as the starting point for consideration of the appeal proposal and the non-compliance of the proposal therewith. The response also highlights the relevant extracts of the earlier appeal decision which indicates that the 5YHLS position was based on the evidence before my colleague at that time in relation to that particular appeal, some four months prior to the date of the hearing.
8. The summary position of the Council is that it considered that circumstances had materially changed between the time of the earlier decision and the consideration of the appeal proposal which led to its defence of the case prior to and during the hearing.

Reasons

9. The Planning Practice Guidance advises that costs may be awarded against a party who has behaved unreasonably and thereby caused the party applying for costs to incur unnecessary or wasted expense in the appeal process.
10. Awards against a local planning authority may be either procedural, relating to the appeal process or substantive, relating to the planning merits of the appeal.
11. In terms of the procedural aspects, the Council did not provide some requested documentation on request within a specified deadline, even when that deadline was subsequently extended. This led to a degree of uncertainty about the appropriate method of determining the appeal and inability to prepare fully for the hearing when the case had been escalated to be determined as such. Further, despite the ability to be sufficiently clear about reliance on a 'permission' to advance an argument on a 5YHLS, the Council presented inaccurate information alleging that such permissions had been granted when in fact, at that time, those permissions had not been granted. The Council's case provided scant detail about the evidence on which it relied to substantiate a change in circumstances between the earlier appeal decision and the hearing, which through its vague submissions, became necessary.
12. In terms of the substantive matters, the Council defended the 5YHLS position when it was found incapable of doing so by an Inspector only four months prior to the hearing. The appeal decision was agreed as being a significant relevant material consideration by both parties in the Statement of Common Ground and includes reference to the 'absence of extant planning permissions' and the definition of deliverable in the National Planning Policy Framework, which prevent the inclusion of a substantial number of homes in the housing supply calculation. As the Council again sought to promote the inclusion of a number of sites which do not yet have extant permissions, the substantive merits of the case were partially flawed and resulted in wasted time and expense.

Conclusion

13. For the above reasons, I find that unreasonable behaviour resulting in unnecessary or wasted expense, as described in the Planning Practice Guidance, has been demonstrated and that a partial award of costs is justified.

Costs Order

14. In exercise of the powers under section 250(5) of the Local Government Act 1972 and Schedule 6 of the Town and Country Planning Act 1990 as amended, and all other enabling powers in that behalf, IT IS HEREBY ORDERED that Somerset West and Taunton Council shall pay to Land Allocations Ltd, the costs of the appeal proceedings described in the heading of this decision limited to those costs incurred from the date of 17 June 2021 in respect of determination of the appeal by way of informal hearing; such costs to be assessed in the Senior Courts Costs Office if not agreed.
15. Land Allocations Ltd is now invited to submit to Somerset West and Taunton Council, to whom a copy of this decision has been sent, details of those costs with a view to reaching agreement as to the amount.

Site: LAND TO THE REAR OF YONDERDOWN AND 3 CURDLEIGH LANE,
BLAGDON HILL, TAUNTON, TA3 7SH

Proposal: Redetermination of Appeal

(Erection of 2 No. single storey dwellings in the gardens to the rear of Yonderdown and 3 Curdleigh Lane, Blagdon Hill (amended scheme to 30/16/0047))

Application number: 30/18/0035

Reason for refusal: Appeal – Dismissed
Costs - Allowed

Original Decision:

The Planning Inspectorate

Appeal Decision

Site visit made on 31 August 2021 by **Colin Cresswell BSc**

(Hons) MA MBA MRTPI

an Inspector appointed by the Secretary of State ~~for Communities and Local Government~~

Decision date: 24 September 2021

Appeal Ref: APP/W3330/W/19/3229997RD Land to the rear of Yonderdown and 3 Curdleigh Lane, Blagdon Hill, Taunton TA3 7SH

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant planning permission.
 - The appeal is made by Mr & Mrs Hoskins & Mr Cosens against the decision of Somerset West and Taunton Council.
 - The application Ref 30/18/0035, dated 22 October 2018, was refused by notice dated 14 March 2019.
 - The development proposed is erection of 2 single storey dwellings with associated works and landscaping.
 - This decision supersedes that issued on 31 January 2020. That decision on the appeal was quashed by order of the High Court.
-

Decision

1. The appeal is dismissed.

Application for costs

2. An application for costs was made by Mr & Mrs Hoskins and Mr Cosens against Somerset West and Taunton Council. This application is the subject of a separate Decision.

Background and Main Issues

3. The proposal was the subject of an appeal decision¹ dated 31 January 2020 which was subsequently quashed by the High Court. The main issue identified by the Inspector in that decision was the effect of the proposed dwellings on the character and appearance of the area. This reflects the single reason for refusal listed in the Council's Decision Notice.
4. However, attention has since been drawn to the high levels of phosphates within the Somerset Levels and Moors Ramsar Site. Natural England wrote to the Council on 17 April 2020 to advise that further residential units within the catchment may be harmful to the conservation objectives of the site by adding to waste water effluent. This is of direct relevance to the appeal as the proposed dwellings would be situated within the surface water catchment area of the Ramsar Site. That being the case, I have a statutory duty to address the matter and have therefore made the effect on the Ramsar Site a main issue in the appeal even though it is not listed as a reason for refusal. Both parties have been given an opportunity to comment.

¹ Appeal Decision: APP/W330/W/19/3229997 (quashed by order of the High Court).

5. The main issues in this case are therefore:

- the effect of the proposal on the Somerset Levels and Moors Ramsar Site having particular regard to phosphate levels.
- the effect of the proposal on the character and appearance of the area.

Reasons

Effect on Ramsar Site

6. The Ramsar Site is designated for its internationally important wetland features, including the diversity of its flora and fauna. In its letter to the Council, Natural England says that the interest features of the Ramsar Site are unfavourable, or at risk, from the effects of eutrophication caused by excessive phosphates. It is stated that additional residential units within the catchment are likely to add phosphate to the designated site via waste water treatment effluent, thus contributing to the existing unfavourable condition and further preventing the site from achieving its conservation objectives.
7. I have little reason to doubt the accuracy of the advice from Natural England and, consequently, it seems to me that that the proposed development would be likely to have a significant effect on the interest features of the Ramsar Site. In these circumstances, the Habitat Regulations⁸ require me to carry out an Appropriate Assessment. This is to determine whether or not the proposal would affect the integrity of the site.

⁸ Conservation of Habitats and Species Regulations 2017 as amended. ³
People over Wind and Sweetman v Collite Teoranta ECLI:EU:C:2018:244 ⁴

8. Recent caselaw³ requires the decision maker, when considering the effect that a proposal would have on European Sites, to consider mitigation within an Appropriate Assessment. In this particular case, the appellants indicate that they did not wish to incur further costs in seeking to establish a scheme of mitigation. Brief reference is made to potentially installing an on-site mitigation scheme, or alternatively, pursuing a strategic mitigation option. However, no specific details are provided and little more is said. Indeed, the appellants instead suggest that these matters could be addressed as part of a fresh planning application. Therefore, based on the evidence provided in this appeal and, adopting a precautionary approach, in the absence of mitigation, it is reasonable to suppose that the proposal both individually and in combination with other projects would have the potential to increase phosphate levels in the designated wetlands.
9. This leads me to conclude that there is an unacceptable risk that the proposed development would have a significantly adverse effect on the internationally important features and integrity of the Ramsar Site. It would be in conflict with the aim of Policy DM1 of the Core Strategy⁴ to protect wildlife habitats. There would also be conflict with provisions of the Framework⁵ in this regard.

Character and appearance

10. Blagdon Hill is a small village surrounded by open countryside. Most housing is situated along the frontage of the main road which runs in a north to south direction through the village. As such, much of Blagdon Hill is based around a generally linear pattern of development. However, not all development in the village is evenly distributed on either side of the main north to south route. There are also a number of adjoining roads which contain housing and, in places where these roads merge, the prevailing pattern of development becomes somewhat less linear in nature.
11. One of these adjoining roads is Curdleigh Lane, which runs in a west to east direction towards the open countryside. The lane is characterised by large detached dwellings which are well set back from the street frontage behind hedges and mature vegetation. Alongside the nearby agricultural fields, these features give Curdleigh Lane a distinctly spacious, leafy and rural appearance consistent with its location on the edge of the village.
12. The proposed dwellings would be situated in the rear gardens of Yonderdown and No 3 Curdleigh Lane. As the dwellings would be positioned behind existing properties and would be well set back from the road frontage, they would not be very conspicuous from within the lane. Although a new access drive would be constructed next to Yonderdown, this would be in keeping with the existing driveways which access Curdleigh Lane at this point. The visual impact on the lane would therefore be minimal and its open, leafy and spacious characteristics would be maintained.
13. The rear gardens of Yonderdown and No 3 adjoin open paddocks which, in turn, adjoin a wider expanse of agricultural fields. From some vantage points within these gardens, it is possible to look across these open areas towards dwellings in more distant parts of Blagdon Hill. However, due to the topography of the area and the prevalence of trees and hedgerows in the landscape, the visual exposure of the site within the wider surroundings is limited. The proposed dwellings would be very low in height and, together with the additional planting being proposed along the northern

Taunton Deane Borough Council Adopted Core Strategy 2011-2028. ⁵
National Planning Policy Framework.

boundary, they would not be easily discernible from public vantage points within the village or surrounding countryside, including from the public footpath network.

14. While the dwellings would be visible from the rear of some nearby properties in Curdleigh Lane (particularly Yonderdown and No 3) they would remain well enough separated from existing development to maintain the sense of spaciousness which characterises these rear gardens. The presence of hedges and mature vegetation within the local setting would further reduce the visual prominence of the dwellings from adjoining properties.
15. Although my attention has been drawn to another example⁹ of housing being permitted to the rear of an existing property, I nonetheless recognise that such developments are not commonplace within Blagdon Hill. However, in this particular case, I have found that the proposed dwellings would not be very noticeable features and so would not undermine the distinctive characteristics of the village, including its pattern of development.
16. I have considered the Council's argument that allowing this appeal would set a precedent for other similar developments. However, each proposal must be determined on its own merits and a generalised concern of this nature does not convince me that the development would be harmful in this case. Differing circumstances and the potential for cumulative harm would represent matters to be considered were other similar proposals to be advanced.
17. I therefore conclude on this issue that the proposal would have an acceptable effect on the character and appearance of the area. There would be no conflict with the design objectives of Policies CP1, CP8 or DM1 of the Core Strategy. Nor would the proposal conflict with Policy D7 of the Site Allocations Development Management Plan¹⁰ or the Draft Design Guide⁸, which seek appropriate standards of design.

Conclusion

18. The development would make a positive contribution to local housing supply and, due to the design of the units being proposed, may be particularly well suited to some elderly residents. However, given the small scale of the development, these benefits would be relatively minor and so I do not assign them a great deal of weight in this appeal. For similar reasons, I do not assign the ecological benefits of the proposed planting much weight either.
19. I have found that the development would be acceptable in terms of its effect on the character and appearance of the area. I also note that it would comply with a number of other planning policies, including those which permit new housing within the village. However, the lack of harm with regard to these matters does not outweigh the potential harm to the Ramsar Site that has been identified. Considering the international importance of such habitats, this harm carries substantial weight. Hence, the benefits of the proposal do not outweigh the harm. This is not the sustainable development for which the Framework says that there is a presumption in favour.
20. I therefore conclude that the appeal should be dismissed.

Costs Decision

Site visit made on 31 August 2021 by **C Cresswell BSc**

(Hons) MA MBA MRTPI

an Inspector appointed by the Secretary of State

Decision date: 24 September 2021

Costs application in relation to Appeal Ref: APP/W3330/D/21/3229997RD Land to the rear of Yonderdown and 3 Curdleigh Lane, Blagdon Hill, Taunton TA3 7SH

- The application is made under the Town and Country Planning Act 1990, sections 78, 322 and Schedule 6, and the Local Government Act 1972, section 250(5).
- The application is made by Mr & Mrs Hoskins & Mr Cosens for a full award of costs against Somerset West and Taunton Council.
- The appeal was against the refusal of planning permission for erection of 2 single storey dwellings with associated works and landscaping.

Decision

1. The application for an award of costs is allowed in part in the terms set out below.

Reasons

2. The Council acknowledge that the appeal needed to be redetermined because it made a procedural error during the notification process. It seems to me that this procedural error has the potential to fall as an example of unreasonable behaviour consistent with the those set out in paragraph 047 of the Planning Practice Guidance.
3. However, in this particular case, the main issue in dispute is not whether the Council made a procedural error, but whether this has led to the appellants incurring unnecessary or wasted expenses during the appeal process. Within their costs application, the appellants list the unnecessary and wasted expenses which they say were incurred as a result of the Council's procedural error. I have dealt with each of these in turn.
4. Firstly, it is argued that additional costs were incurred as a result of responding to the comments of interested parties. However, as the Council points out, the same

interested parties would have likely made representations anyway had they been properly notified of the appeal. I would agree that responding to representations received as part of the appeal is a normal part of the appeal process and am therefore not convinced that wasted expense was incurred in responding to these comments.

5. On the other hand, the appellants would not have needed to produce a response to the Council's comments on the redetermined appeal had procedures been properly followed. A good deal of time passed between the Council originally determining the planning application and the appeal reaching the redetermination stage. During this time, there was a significant change in circumstances and the Council produced a further statement to draw attention to the effect of phosphates on the Ramsar Site as well as new design guidance. The appellants had an opportunity to respond and did so by submitting further comments in a statement dated 28 June 2021. This would have been unnecessary if the appeal had not needed to be redetermined. Costs were therefore incurred as a result of the unreasonable behaviour.
6. The original ecology appraisal was dated August 2018 but, due to the delay caused by the procedural error, it was necessary for this to be updated and a new report was produced dated April 2021. The procedural error therefore led to wasted expenses being incurred.
7. The appellant's costs application also refers to expenses incurred as a result of "instructing Tetra Tech Planning to advise on the claim generally, the potentially town planning related implications on the allowed appeal and to establish a planning strategy for the redetermined appeal". Reference is also made to "considering the implications of the 1st and 2nd defendants' decisions not to defend Mr Meikle's claim in planning terms".
8. It is not entirely clear what the role of Tetra Tech Planning (formerly WYG) would have been in the legal processes surrounding the High Court action. Nonetheless, outside the legal processes, I accept that there would have been a certain amount of communication with the appellants in order to keep them updated and offer advice, particularly on how to proceed with their development proposals once the case had been concluded. Some costs were therefore incurred as a result of the unreasonable behaviour.
9. However, I am not convinced that it would have been necessary to establish a new planning strategy for the redetermined appeal over and above responding to the comments of the Council and interested parties (matters I have addressed above). To a large extent, the appellants relied on their original appeal evidence to defend the Council's reason for refusal.
10. I understand that the appellants have been able to recover the costs of the High Court case and the cost of instructing solicitors. However, I am informed that costs associated with instructing Counsel to advise on and subsequently defend the High Court action were not recovered. Clearly, there would have been no need to have instructed Counsel if the local planning authority had not made an error in the notification process. Yet while the appellants exercised their rights to challenge the decision, the costs of appointing a barrister related to the judicial process. The costs were not incurred as part of the planning application or appeal process. Therefore, unnecessary or wasted expense in the appeal process has not been demonstrated.

Conclusion

11. I conclude that the Council has demonstrated unreasonable behaviour during the appeal process. This has led to the appellants incurring some unnecessary expenses and a partial award of costs is justified. The actual amount of the unnecessary expense is not a matter for this costs decision.

Costs order

12. In exercise of the powers under section 250(5) of the Local Government Act 1972 and Schedule 6 of the Town and Country Planning Act 1990 as amended, and all other enabling powers in that behalf, IT IS HEREBY ORDERED that Somerset West and Taunton Council shall pay to Mr & Mrs Hoskins and Mr Cosens, the costs of the appeal proceedings described in the heading of this decision, limited only to those costs incurred in relation to: responding to the Council's comments on the redetermined appeal, receiving consultants' advice on planning matters during the High Court action and, finally preparing updated an ecological report.
13. The applicant is now invited to submit to Somerset West and Taunton Council, to whom a copy of this decision has been sent, details of those costs with a view to reaching agreement as to the amount. In the event that the parties cannot agree on an amount, a copy of the guidance note on how to apply for a detailed assessment by the Senior Courts Cost Office is enclosed.

INSPECTOR

Site: THE BARN, LUDWELLS FARM, LANGPORT ROAD, WRANTAGE, TAUNTON, TA3 6DQ

Proposal: The construction of an outbuilding at Ludwells Barn, Langport Road, Wrantage, Taunton, TA3 6DQ

Application number: E/0070/24/21

Reason for refusal: Dismissed

Original Decision:

The Planning Inspectorate

Appeal Decision

by P N Jarratt BA DipTP MRTPI

an Inspector appointed by the Secretary of State for Communities and Local Government

Decision date: 27 September 2021

Appeal Ref: APP/W3330/C/21/3272827 Ludwells Barn, Wrantage, Taunton, TA3 6DQ

- The appeal is made under section 174 of the Town and Country Planning Act 1990 as amended by the Planning and Compensation Act 1991.
- The appeal is made by Mr Christopher Fisher Dodd against an enforcement notice issued by Somerset West and Taunton Council.
- The enforcement notice, numbered E/0201/24/19 - 2, was issued on 1 March 2021.
- The breach of planning control as alleged in the notice is the construction of an outbuilding shown edged blue on the plan attached to the notice.
- The requirements of the notice are to remove from the land the outbuilding and all materials resulting from such removal.
- The period for compliance with the requirements is 9 months.
- The appeal is proceeding on the grounds set out in section 174(2) (c) and (g) of the Town and Country Planning Act 1990 as amended.

Decision

1. The appeal is dismissed

The site and relevant planning history

2. The appeal site is adjacent to Ludwell's Farm through which there is a vehicular access to a building which was the subject to a recent appeal against an enforcement notice and which was determined by myself. That appeal

(APP/W3330/C/21/3272700) related to an alleged breach of planning control for the use of a building on the land (shown edged green on the plan attached to the notice) as permanent residential accommodation in breach of Condition 3 of planning permission reference 24/00/0020. Subject to a substituted condition requiring the building to be occupied for holiday purposes only, the appeal was dismissed and the enforcement notice upheld.

3. The building subject to this appeal is situated close to the holiday building which the appellant refers to as the 'host' building. As I had carried out a site inspection for the first appeal and I was able to view the outbuilding externally at the same time it was not necessary to carry out a further site visit.

The appeal on ground (c)

4. An appeal on this ground is that there has not been a breach of planning control. The appellant considers that a 'holiday use only' restricted dwelling is a dwelling and benefits from Class E permitted development rights that allows a large range of buildings on land surrounding a house. The appellant refers to another appeal decision and case law in support. It is stated that the building is used for vehicle storage, tools and material for maintenance, general household storage, gym equipment and a yoga practice area, home office, display area for vintage tools and machinery and a woodworking area which are incidental to the enjoyment of the holiday dwelling. I note that the Council considers that some of these uses are excessive in the context of the size of appeal site, that the floor area of the outbuilding exceeds that of the holiday let and some of the uses are not reasonably required for a holiday let use and are therefore not incidental.
5. However, none of this is material in this appeal as the host building for which the appellant claims Class E permitted development rights is unlawful due to the breach of a condition on the planning permission, as set out above. Article 3(5) (b) of the Town and Country Planning (General Permitted Development) (England) Order 2015, as amended, indicates that permission granted by Schedule 2 (relating to permitted development rights) does not apply if, in the case of permission granted in connection with an existing use, that use is unlawful.
6. The appeal on this ground fails.

The appeal on ground (g)

7. The appellant has requested that the compliance period be extended from 9 months to 18 months in view of the appellant having to find a new home, removing the contents of the outbuilding, demolishing it and removing the resultant debris.
8. The appellant points out that the host dwelling has been the appellant's home since 2013 and the outbuilding has been in situ since 2018, but in view of my decision on the appeal on ground (g) in APP/W3330/C/21/3272700, there is little justification for the compliance period to be 18 months. The Council's compliance period of 9 months is adequate and proportionate to carry out the requirements of the notice.
9. The appeal on this ground fails.

Proposal: Alleged unauthorised fence along front boundary at 45 Northgate, Wiveliscombe

Application number: E/006/49/20

Reason for refusal: Dismissed

Original Decision:

The Planning Inspectorate

Appeal Decision

Site visit made on 6 September 2021 by **P N Jarratt BA DipTP MRTPI**

an Inspector appointed by the Secretary of State for Communities and Local Government

Decision date: 28 September 2021

Appeal Ref: APP/W3330/C/21/3274169 45 Northgate, Wiveliscombe, Taunton, TA4 2LF

- The appeal is made under section 174 of the Town and Country Planning Act 1990 as amended by the Planning and Compensation Act 1991.
- The appeal is made by Miss Leah Kramer against an enforcement notice issued by Somerset West and Taunton Council.
- The enforcement notice, numbered E/006/49/20, was issued on 29 March 2021.
- The breach of planning control as alleged in the notice is the erection of two outbuildings on the land in the approximate positions outlined in blue on the plan attached to the notice.
- The requirements of the notice are:
 - 1 Remove the outbuildings from the land
 - 2 Remove from the land all materials resulting from the removal of the outbuildings.
- The period for compliance with the requirements is one month.
- The appeal is proceeding on the grounds set out in section 174(2) (c), (d) and (f) of the Town and Country Planning Act 1990 as amended.

Decision

1. It is directed that the enforcement notice:

- i) be corrected by the deletion of the words 'the erection of two outbuildings on the land in the approximate positions outlined in blue on the plan attached to the notice' and their replacement with the words ' the erection of an outbuilding used as a bike store situated adjacent to the boundary with No 44 Northgate';
- ii) and varied by the deletion of the words 'outbuildings' in steps 1 and 2 of the notice and their replacement with the word 'outbuilding'.

Subject to these corrections and variations the appeal is dismissed and the enforcement notice is upheld.

Procedural Matter

2. Although nobody appeared to be at the site at the time of my site visit, I was able to view the two outbuildings the subject of the allegation from the front garden and road.
3. An enforcement notice requiring the reduction in height to 1 metre of an unauthorised timber fence adjacent to the highway which exceeds that height took effect on 28 September 2020. No appeal was made against the notice. At the time of my site visit, the requirements of that notice did not appear to have been complied with.

The appeal site and relevant planning history

4. The outbuildings subject to the notice are situated at the sides of the front garden of the appeal property, which is a semi-detached house in a residential area. The timber bike store is situated to the left of the entrance gate adjacent to No 44 Northgate and projects above the line of the fence. It is decorated with coloured lights. The second outbuilding is a log store situated to the right of the entrance gate and is of similar construction and at a slightly lower height than the bike store, with its roof also visible above the fence line.

The appeal on ground (c)

5. An appeal on this ground is that there has not been a breach of planning control. The appellant states that the log store is no higher than 3ft and the bike store should not be classified as a building as it is a simple roof attached to the side fence.
6. For the purposes of planning control both outbuildings represent development as defined in s55 for which planning permission is required.
7. The Town and Country Planning (General Permitted Development) (England) Order, as amended, sets out what may be constructed within the curtilage of a dwellinghouse without the need for express planning permission. Class E of Schedule 2 Part 1 of the Order does not permit outbuildings situated between the front elevation of the dwelling and the boundary fence adjacent to the public highway.
8. The outbuildings do not benefit from any permission and the appeal on this ground fails.

The appeal on ground (d)

9. An appeal on this ground is that it is too late to take enforcement action. The appellant claims that the log store is over 6 years old, being constructed in July 2015 although no representations are made in respect of the age of the bike store.
10. Frank Blaker Building Services confirm in an email dated 30 April 2021 that he assisted in the construction of the log store in the middle part of July 2015. The occupiers of No 45 Northgate confirmed in May 2021 that the log store has been in place for at least 5 years.
11. The Council acknowledge that there was a structure in situ at the time of an officer site visit on 5 July 2019 (partially visible on the photo at Appendix B). The Council became aware of both outbuildings in February 2021 when compliance with the extant enforcement notice was being checked.
12. The Council has not provided any evidence to contradict the appellant's version of events as supported by the neighbours and Frank Blaker Building

Services. I therefore conclude that the log store was constructed in excess of four years prior to the notice and has consequently achieved immunity from enforcement action through the passage of time. However no such immunity has been achieved by the bike store.

13. I note that compliance with the enforcement notice relating to the fence may make the log store more visible in the street scene but this is not a factor relevant to matters of law.
14. The appeal on this ground succeeds in respect of the log store.

The appeal on ground (f)

15. An appeal on this ground is that the steps are excessive and that lesser steps would overcome the objections.
16. The appellants believe that the lesser steps should only require the removal of the overhanging roof boarding to the bike store and that the bikes could be covered by a tarpaulin or other temporary cover. However, in the light of the success of the appeal in respect of the log store, it seems that other alternatives for the storage of bikes may exist such as by reorganising the log store to accommodate bikes.
17. The purpose of the requirements of a notice is to remedy the breach by discontinuing any use of the land or by restoring the land to its condition before the breach took place or to remedy an injury to amenity which has been caused by the breach. It is necessary for the requirements to match the matters alleged and therefore I consider that the requirements of the notice in this case do not exceed what is necessary to remedy the breach.
18. The appellant points out that the materials arising from the removal of the bike store have to be removed from the land. That is what step 2 of the notice requires but I note that the Council indicates that the material could be used in the back garden for a structure that complies with permitted development rights and invites the appellant to submit details to the Council beforehand.
19. The requirements do not preclude the appellants doing what they are lawfully entitled to do in the future once the notice has been complied with.

Reasons

20. I conclude on the balance of probabilities that the construction of the log store took place more than 4 years prior to the issue of the enforcement notice and that the time for issue of the enforcement notice set out in section 171B(1) the 1990 Act as amended has therefore expired. Accordingly the appeal succeeds on ground (d) in respect of the log store and I shall correct the notice and vary the requirements to reflect this.
21. The appeal in respect of the bike store is dismissed and the enforcement notice is upheld.

P N Jarratt Inspector

Site: Strawberry Fields, Holford, TA5 1RZ

Proposal: Alleged unauthorised agricultural building not in accordance with prior approval at Strawberry Field, Holford

Application number: ECC/EN/18/00005

Reason for refusal: Dismissed / Enforcement Notice Upheld

Original Decision:

Appeal Decision

Site visit made on 6 September 2021 by **P N Jarratt BA DipTP MRTPI**

an Inspector appointed by the Secretary of State for Communities and Local Government

Decision date: 4 October 2021

Appeal Ref: APP/W3330/C/21/3275167 Land on the south side of Bourne Cottage, Holford, Somerset TA5 1RZ

- The appeal is made under section 174 of the Town and Country Planning Act 1990 as amended by the Planning and Compensation Act 1991.
 - The appeal is made by Ms Jessica Wyatt against an enforcement notice issued by Somerset West and Taunton Council.
 - The enforcement notice, numbered ECC/EN/18/00005, was issued on 19 April 2021.
 - The breach of planning control as alleged in the notice is the erection of a building in the approximate position shown edged blue on the plan attached to the notice.
 - The requirements of the notice are 1) demolish the building referred to in the breach; and 2) remove from the land all materials resulting from such demolition.
 - The period for compliance with the requirements is nine months.
 - The appeal is proceeding on the grounds set out in section 174(2) (c), (d), (e), (f) and (g) of the Town and Country Planning Act 1990 as amended.
-

Decision

1. The appeal is dismissed and the enforcement notice is upheld.

Appeal site and relevant planning history

2. The site is in an isolated area of open countryside within the Quantock Hills AONB and in an SSSI. The holding is about 6.5 hectares and includes 2 hectares of woodland. Access to the site is via a track through a National Trust woodland.

3. Prior notification for the erection of an agricultural building was determined as not being required in January 2014 ((3/16/13/014).
4. The erection of an agricultural building with twin wall flue pipe and associated earthworks (retention of works already undertaken) has been refused (3/16/18/008).
5. An application for the erection of an agricultural building was submitted in November 2019 and dismissed on appeal in July 2020 (3/16/19/005 and APP/W3330/W/20/3249895).
6. An application for the retention of agricultural building including alterations to existing structure resubmission of 3/16/18/006) was refused in February 2020 (3/16/19/005).

The appeal on ground (e)

7. An appeal on this ground is that the notice was not properly served. The land was purchased jointly by the late John Hughes and Jessica Wyatt (the appellant) in November 2013 but the relationship broke up in 2017. It is the appellant's case that the notice should have been served on John Hughes children and that a Planning Contravention Notice was not served to establish ownership and other matters. Mr Hughes estate is being administered by his daughter, Miss Rosie May Hughes, who lives in New Zealand and has submitted a statutory declaration dated 6 June 2021 and sworn in Hamilton, New Zealand in respect of various photographs of the building the subject of the notice.
8. The Council served the notice on the registered owner shown on the Land Registry records and a further copy of the notice was posted on the site. The appellant's agent advised the Council that Mr Hughes' daughter had 'key responsibility' but not that she had an interest or that she was the registered owner.
9. Although it is good practice for a Council to serve a PCN to establish relevant facts, it is not a requirement prior to serving of an enforcement notice. There are limits to how far a Council needs to go in identifying the owners, occupiers and persons having an interest in the land. It was held in *Newham LBC v Miah* [2016] EWHC 1043 (Admin) that a Land Registry address is proper service if a Council has not been given another.
10. I am satisfied therefore, that on the basis of the Land Registry records, the notice was served correctly. I also note that Miss Hughes, as administrator of her late father's estate, has been fully aware of the notice and in my view, has not been substantially prejudiced by non-service of the notice, even had there been a requirement to do so.
11. The appeal on this ground fails.

The appeal on ground (c)

12. An appeal on this ground is that there has not been a breach of planning control. It is the appellant's case that the building is permitted development.
13. The building as constructed is not in accordance with the size and materials of the building as indicated on the prior approval application form in 2013. As the Council points out this has been effectively acknowledged by the appellant through the submission of retrospective planning applications in 2018 and 2019 for the building as

constructed and the plans submitted with application 3/16/19/00. I note however that the agent is unaware of what pressure/guidance was placed on Mr Hughes resulting in the first application and that he remains of the view that the building is permitted development.

14. Paragraph 6 of the Council's appeal statement compares the prior approval dimensions with those 'as built' and I note that the height has increased from 4m to 4.12m; building length from 10m to 10.4 m and building width from 5m to 5.3m, with the height to eaves remaining at 2.4m. The appellant points out that the discrepancy is due to the method of wall construction and had metal cladding been applied to the steel frame, it would not have exceeded the dimensions. It is further added that the ground area is well below PD limits of 465sqm ground area and 12m in height. The appellant's view is that as the slightly larger isolated structure has no discernible increased impact on the countryside and is not materially different from the brief details in the prior notification application, it should be allowed to remain. Whilst this may be the case, the building was not constructed to the dimensions indicated in the prior approval application.
15. In responding to the prior notification application, the Council confirmed that the development was permitted under the GPDO and that the development did not require prior approval for the siting, design and external appearance, which in view of its location in an AONB is surprising. I note that there was no requirement to submit plans showing the floor plan or elevations of the proposed building in these circumstances and that the application form described the building as a 'modern steel frame box profile clad agricultural barn' and that it was required for 'the secure storage for tractor/machinery/feedstuffs/rainwater collection/hygiene and welfare'.
16. At my site inspection, I observed an incomplete building on a sloping site (contrary to the officer report in the prior approval application referring to the proposed building being on level ground). The lower floor is of blockwork construction having openings for the addition of a window, doors and frames. It contained an old tractor at the time of my visit. Externally the upper/main floor had been felted and battened ready for the installation of an external cladding finish. The main floor appears to have insulated walls with plasterboard in part; plumbing for sanitary facilities; a temporary external access door and glazed domestic windows on three of its four elevations and openings for others. Drawings submitted with applications subsequent to the prior notification application indicate the main floor to have a welfare area as part of an open plan storage and work area, an enclosed shower room (but indicating no toilet) and small store. The roof space appeared to be used as storage space.
17. Development is not permitted by Part 6, Class A of the GDPO if it would involve the provision of a building, structure or works not designed for agricultural purposes. In this case, visually the building appears to have been designed for a dual purpose, with limited storage/agricultural space on the ground floor and for more domestic activities at the upper level, notwithstanding the stated intentions of the appellant that the proposed facilities on this floor would provide a welfare area.
18. The appellant also states that the purpose of the main floor would also be to allow higher quality native timber planks from the woodland to dry/season before being sold for joinery/furniture manufacturing.
19. I struggle to understand how the upper floor of the building with its domestic windows and insulation would provide a suitable environment as indicated by the appellant to

dry/season higher quality native timber planks when the process of timber seasoning is one that can take place either out in the open air or within special wood-drying kilns which provide the timber with optimum levels of heat and air flow required for the drying process. The provision of domestic style windows and limited ventilation would not be conducive to this process in my view.

20. I conclude that the appellant has not demonstrated on the balance of probabilities that the development meets the conditions and limitations in respect of permitted development for agricultural buildings and that no planning permission exists for the development.
21. The fact that applications subsequent to the prior notification were recommended for approval by officers is not relevant to a legal ground of appeal.
22. The appeal on this ground fails.

The appeal on ground (d)

23. An appeal on this ground is that it was too late to take enforcement action. The appellant states that work commenced in 2014 and that by 17 April 2017, the building was shown to be watertight which is when the appellant believes that substantial completion of the new building was achieved, thus achieving immunity from enforcement action under s171B(1).
24. It is clear to me from my own observations and from the photographic evidence of the Council of 9 August 2018 that the building was not substantially complete when claimed as external cladding had not been installed, a number of windows and doors had not been installed at the main and lower levels and that scaffolding was in place. The Council cites Sage v SSETR [2003] UKHL 22 in supporting their conclusion that work was still in progress and could not be regarded as substantially complete.
25. Whilst the appellant may have a different interpretation as to what may constitute 'substantial completion' for an agricultural building and that regard should be had of the developers' original intentions as to the totality of the operations, I attach little weight to the application for prior notification being 'reasonably necessary for the purposes of agriculture'. What has been constructed is different to the prior approval details and, in its present form, raises considerable doubt in my mind whether the facilities provided and the design of the building or the intentions of the appellant were for agricultural purposes alone.
26. The appeal on this ground fails.

The appeal on ground (f)

27. An appeal on this ground is that the steps required are excessive.
28. The purpose of the requirements of a notice is to remedy the breach by discontinuing any use of the land or by restoring the land to its condition before the breach took place or to remedy an injury to amenity which has been caused by the breach. In this case, the purpose is to remedy the breach. It is necessary for the requirements to match the matters alleged and therefore I consider that the requirements of the notice in this case do not exceed what is necessary to remedy the breach. However it is necessary to consider whether there is any 'obvious alternative' or 'lesser step' which would achieve the purposes of the EN with less cost and disruption. The requirements of the EN should be 'proportionate' in that sense.

29. The appellant anticipates a 'foreseeable reasonable need' for an agricultural building and suggests lesser requirements of either
- i) The building to be completed in accordance with Drawing No 118/2/A (Appendix B of the appellant's statement) which the previous inspector (in appeal APP/W3330/W/20/3249895) concluded caused no visual harm and conditions regarding completion of the works and future use of the building could be imposed; or
 - ii) Drawing No 2113/3 (Appendix F of the appellant's statement) shows the reduction in the size of the building and retention of the steel frame to meet the dimensions given in the prior notification application.
30. It is noted that there is no ground (a) appeal (which I assume is due to the appeal being dismissed in July 2020 (APP/W3330/W/20/3249895)). Although that inspector concluded that the development subject to that appeal would not harm the character or appearance of the area, including the AONB, he nevertheless had doubts over the ability of the building meeting a functional need of the farming business and concluded that the proposal was not acceptable in principle. Furthermore, no convincing justification of a 'foreseeable reasonable need' has been made in this appeal. Accepting the appellant's first option would circumvent a properly made decision on appeal. Where an appeal is not brought on ground (a), it is not appropriate for appellants to introduce arguments on the merits in the context of an appeal on ground (f).
31. In respect of the appellant's second option relating to the reduction in the size of the building, whilst this would permit a building akin to what the prior notification application related to, as there is no ground (a) appeal and the purpose of the notice is to remedy a breach of planning control, any lesser step that would not remedy the breach cannot be accepted through ground (f). The second option would not remedy the breach and is therefore unacceptable.
32. The appellant also requests that to reduce the amount of demolition material to be transported from the site could cause potential damage to the SSSI. It is requested that where the ground has been excavated for the lower ground floor some materials such as concrete blocks could be left on site and the ground remodelled using soil previously excavated and grassed over. The appellant points out that the requirements of the notice do not require the reinstatement of the ground.
33. Without detailed proposals and cross sections of the reinstated ground to provide a full understanding of how this would be implemented in practice, I am not convinced that step 2 of the requirements is unreasonable. It will be a matter for the appellant to pursue such matters with the Council and to decide whether to submit any necessary planning application for any such engineering operations.
34. The requirements do not preclude the appellants doing what they are lawfully entitled to do in the future once the notice has been complied with.
35. The appeal on this ground fails.

The appeal on ground (g)

36. An appeal on this ground is that the compliance period is too short. The appellant considers the compliance period to be generally reasonable but requests that the notice be varied to allow the removal of materials in drier weather and more

favourable ground conditions, and suggests that the compliance period should be up to the end of June.

37. Bearing in mind the date of this decision, the compliance period will extend into early July 2022. Consequently the compliance period meets the appellant's request.

38. The appeal on this ground therefore fails.

Conclusions

39. For the reasons given above I consider that the appeal should not succeed.

BSc (Hons) PGDip MRTPI

an Inspector appointed by the Secretary of State

Decision date: 4 October 2021

Appeal Ref: APP/W3330/D/21/3277398 Top Cottage, Coombe Lane, West Monkton, Taunton TA2 8RB

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant planning permission.
 - The appeal is made by Mr S Argall against the decision of Somerset West and Taunton Council.
 - The application Ref 14/21/0003, dated 14 February 2021, was refused by notice dated 29 April 2021.
 - The development proposed is an extension to the existing cottage.
-

Decision

1. The appeal is dismissed.

Appeal Procedure

2. The site visit was undertaken by an Appeal Planning Officer whose recommendation is set out below and to which the Inspector has had regard before deciding the appeal.

Procedural Matter

3. On 20 July 2021 the Government published a revised version of the National Planning Policy Framework (the Framework). I have had regard to this as a material consideration however, planning decisions must still be made in accordance with the development plan unless material considerations indicate otherwise. The issues most relevant to this appeal remain unaffected by the revisions to the Framework. I am therefore satisfied that there is no requirement to seek further submissions on the revised Framework, and that no party would be disadvantaged by such a course of action.

Main Issues

4. The main issues in this appeal are the effect of the proposed development on:
- the character and appearance of the host dwelling and surrounding area; and
 - the living conditions of the occupiers of Bottom Cottage, with particular regard to privacy.

Reasons for the Recommendation

5. The appeal property forms part of a semi-detached pair. Both properties have a traditional cottage style, partly displayed by the relatively mismatched fenestration. The appeal dwelling is located on elevated ground above the neighbouring property. The semi-detached pair have a unique amenity space layout, with the neighbouring property, Bottom Cottage, having its garden to the north and the appeal dwelling having its garden to the south, stretching along the south elevation of Bottom Cottage.

Character and Appearance

6. The proposal would add a large extension to the elevation that is seen when approaching the south of the property. This extension would be a substantial addition and, although very slightly set down from the ridgeline and being slightly shorter than the host dwelling, the length and width would add significant bulk to this part of the property. This size would bring the proposal into close proximity with the existing porch area, which would have an awkward juxtaposition and overwhelm this part of the property. The proposal would therefore not appear as a subservient addition.
7. On the most visible south and west elevations of the proposal, the fenestration, whilst not entirely symmetrical, would not have the same mismatched arrangement and size that is seen on the host dwelling. The proposal would thus appear unsympathetic to the character of the host dwelling. The proposal would use materials and built details such as a gable and roof pitch to match the host dwelling. However, this would not reduce the lack of subservience to an acceptable level.
8. Properties in the vicinity of the appeal site have a range of built design, some with alterations, though these are significantly different properties to the appeal proposal. This therefore would not alter the harm that the proposal would cause to the appeal dwelling. The appeal property would not be visible from the nearby listed building, due to the distance and substantial level of greenery. This would also not diminish the harm found to the character and appearance of the host dwelling.
9. Overall, the proposal would cause harm to the character and appearance of the host dwelling. It would therefore not comply with Policies DM1 and CP8 of the Taunton Deane Core Strategy 2011-2028 (adopted 2012), which together aim to ensure proposals do not harm the appearance and character of affected buildings and landscapes, with particular regard to scale. It would also conflict with Policy D5 of the Taunton Deane Adopted Site Allocations and Development Management Plan (adopted 2016), which seeks to protect the form and character of development and ensure extensions remain subservient. It would likewise go against the aims of Policy CSM4 of the Creech St Michael Parish Council Neighbourhood Development Plan 2018-2028 (adopted 2019), which require development to complement and enhance local character.

Living Conditions

10. The proposed extension would have multiple windows and two doors on the elevation facing Bottom Cottage. The proposal would be a reasonable distance from this property, however due to the unique garden layout of the semidetached pair, there

would be a lack of screening between the proposed windows and the south elevation of Bottom Cottage. This means that there would be overlooking towards the south elevation of Bottom Cottage from the two first-floor windows furthest out on the proposed projection. The position of the proposal on higher ground than the neighbouring property means there would also be overlooking from the set of double doors furthest out on the proposed projection. This would cause significant harm to the privacy of the occupiers of Bottom Cottage.

11. The neighbour may not have objected to the principle of an extension; however, they do raise concerns over the effect of the proposal on their privacy. Regardless of this, for the above reasons, the proposal would cause harm to the living conditions of the occupiers of Bottom Cottage.
12. It would therefore conflict with Policy DM1 of the Taunton Deane Core Strategy 2011-2028 (adopted 2012), which aims to protect the amenity of residential areas. Likewise, it would not comply with Policy D5 of the Taunton Deane Adopted Site Allocations and Development Management Plan (adopted 2016), which looks to prevent development that would harm the residential amenity of neighbouring dwellings. The Council's decision refers to Policy CSM4 of the Creech St Michael Parish Council Neighbourhood Development Plan 2018-2028 (adopted 2019). However, this Policy does not appear to relate to living conditions and is therefore not relevant to this issue.

Other Matters

13. The planning permission granted in 2008 considered a proposal for an extension that had a slightly smaller size than the appeal development, had different fenestration and was not in close proximity to the porch. These differences mean that the previously granted proposal, when compared to the appeal proposal, would have been more acceptable in terms of appearance and the privacy granted to the neighbouring property.
14. The desire for the appellant to provide additional accommodation and living space, as well as the challenges of COVID-19, have been considered. However, they would not outweigh the harm caused to the character and appearance of the host dwelling and the living conditions of the occupiers of the neighbouring property.
15. The actions of the Council during the application process do not alter the substantive planning considerations in this appeal.

Conclusion and Recommendation

16. For the reasons given above and having had regard for the Development Plan when it is considered as a whole, I recommend that the appeal is dismissed.

Max Webb

APPEAL PLANNING OFFICER

Inspector's Decision

17. I have considered all the submitted evidence and the Appeal Planning Officer's report and on that basis the appeal is dismissed.
